Pi: A Source Book Jonathan M. Borwein,2013-06-29 Our intention in this collection is to provide largely through original writings an extended account of pi from the dawn of mathematical time to the present The story of pi reflects the most seminal the most serious and sometimes the most whimsical aspects of mathematics A surprising amount of the most important mathematics and a significant number of the most important mathematicians have contributed to its unfolding directly or otherwise Pi is one of the few mathematical concepts whose mention evokes a response of recognition and interest in those not concerned professionally with the subject It has been a part of human culture and the educated imagination for more than twenty five hundred years The computation of pi is virtually the only topic from the most ancient stratum of mathematics that is still of serious interest to modern mathematical research To pursue this topic as it developed throughout the millennia is to follow a thread through the history of mathematics that winds through geometry analysis and special functions numerical analysis algebra and number theory It offers a subject that provides mathematicians with examples of many current mathematical techniques as well as a palpable sense of their historical development Why a Source Book Few books serve wider potential audiences than does a source book To our knowledge there is at present no easy access to the bulk of the material we have collected **Design Cost & Data** ,1994 Pi: A Source Book J.L.

Berggren,Jonathan Borwein,Peter Borwein,2014-01-13 This book documents the history of pi from the dawn of mathematical time to the present One of the beauties of the literature on pi is that it allows for the inclusion of very modern yet accessible mathematics The articles on pi collected herein include selections from the mathematical and computational literature over four millennia a variety of historical studies on the cultural significance of the number and an assortment of anecdotal fanciful and simply amusing pieces For this new edition the authors have updated the original material while adding new material of historical and cultural interest There is a substantial exposition of the recent history of the computation of digits of pi a discussion of the normality of the distribution of the digits new translations of works by Viete and Huygen as well as Kaplansky's never before published Song of Pi From the reviews of earlier editions Few mathematics books serve a wider potential readership than does a source book and this particular one is admirably designed to cater for a broad spectrum of tastes professional mathematicians with research interest in related subjects historians of mathematics teachers at all levels searching out material for individual talks and student projects and amateurs who will find much to amuse and inform them

in this leafy tome The authors are to be congratulated on their good taste in preparing such a rich and varied banquet with which to celebrate pi Roger Webster for the Bulletin of the LMS The judicious representative selection makes this a useful addition to one's library as a reference book an enjoyable survey of developments and a source of elegant and deep mathematics of different eras Ed Barbeau for MathSciNet Full of useful formulas and ideas it is a vast source of inspiration to any mathematician A level and upwards a necessity in any maths library New Scientist

Old-House Journal, 1996-03 Old House Journal is the original magazine devoted to restoring and preserving old houses For more than 35 years our mission has been to help old house owners repair restore update and decorate buildings of every age and architectural style Each issue explores hands on restoration techniques practical architectural guidelines historical overviews and homeowner stories all in a trusted authoritative voice

Civil Engineer's Illustrated Sourcebook Robert O. Parmley, 2003-03-04 PUT A WEALTH OF INFORMATIVE ENGINEERING INFO RIGHT AT YOUR FINGERTIPS ALL IN A SINGLE HANDY VOLUME When it comes to civil engineering handy access to the right schematics and plans can mean the difference between a winning idea and a concept that dies on the drawing board That's why if adding efficiencies to your work as an engineer is essential McGraw Hill's Civil Engineer's Illustrated Sourcebook is the one volume you shouldn't be without Written by a noted engineering expert with lengthy consultative experience Civil Engineer's Illustrated Sourcebook provides practical step by step information on a broad array of engineering processes From planning materials and design to bidding construction and more this book will show how using a consistent organizational methodology will add power and quality to your work Plus the book also delivers Practical charts tables plans and other data encountered in everyday practice Plan layouts from actual engineering projects Source material from a wide variety of engineering projects And much much more Robust enough for civil engineers contractors technicians and architects and still relevant for students pursuing engineering degrees and certifications Civil Engineer's Illustrated Sourcebook will add a world of invaluable insight to how you do your work Packed with 900 informative illustrations

Source Book for Rule Collectors with Rule Concordance and Value Guide Phil Stanley, 2021-12-15 Rule collectors rejoice In A Source Book for Rule Collectors with Rule Concordance and Value Guide Philip Stanley has crafted a masterfully comprehensive illustrated reference guide to the history uses and values of measuring instruments A Source Book for Rule Collectors includes reprints of the best articles from the past 100 years dealing with rules and measurement extensive coverage of the materials construction graduations and uses of rules a detailed table of the European measures used before the metric system for identifying rules by size and county of origin a thorough cataloging of rule accessories and a complete bibliography of reprints articles books and publications dealing with measuring instruments The included Rule Concordance and Value Guide gives complete information for identifying and comparing all rules by all major American makers estimates for each rule s value based on condition and maker extensive information on rule value including condition selling environment and charisma This book is an essential reference Rule enthusiasts will find the combination a pleasure to read Mr Stanley s breadth of knowledge and his regard for the rules he discusses are apparent throughout For the antique tool dealer rule collector and student of the history of technology this book is essential Signs In Law - A Source Book Jan M. Broekman, Larry Catá Backer, 2014-11-06 This volume provides a critical roadmap through the major historical sources of legal semiotics as we know them today The history of legal semiotics now at least a century old has never been written a non event itself pregnant with semiotic possibility As a consequence its sources are seldom clearly exposed and as word object and meaning change are sometimes lost They reach from an English translation of the 1916 inaugural lecture of the first Chair in Legal Significs at the Amsterdam University via mid 20th century studies on property or contract to equally fascinating essays on contemporary semiotic problems produced by former students of the Roberta Kevelson Semiotics Roundtable Seminar at Penn State University 2012 and 2013 Together the materials in this book weave the fabric of semiotics and significs two names for the unfolding of semiotics in law and legal discourse at least until the second half of the 20th century and both of which covered a lawyer s focus on sign and meaning in law The latter is embedded within the

cultural imperatives of the civilization that gave these terms meaning and made them an effective tool for the dissection of law its reconstitution as an instrument to be used by the lawyer to advance the interests of her clients and for judges as a means to restructure language as a narrative of law whose power could bend behavior to its strictures Legal semiotics has become an indispensable part of the elite lawyer s toolkit and a fundamental approach to analysis of legal texts Two previous volumes published in 2011 and 2012 explored the conceptual methodological and epistemological progress in the field of legal semiotics the modern forms of semiotics study and the mechanics of meaning making processes by lawyers Yet the great lessons of semiotics requires a focus on the origins of the concepts and frameworks that would become contemporary legal semiotics its origins as an object of the consciousness of meaning making one whose roots as lessons for the oracular conversations of law are expanded in this volume Source Book of Projects ,1981
