GROUND IMPROVEMENT TECHNIQUES JOYANTA MAITY, BIKASH CHANDRA CHATTOPADHYAY, 2017-05-01 Due to the unavailability of good construction sites owing to the growth of cities and industries the site engineers are nowadays compelled to adopt methods of forcing the weak soil to behave according to the project requirement Written in the same context the book focuses on the fundamental principles and practical methods of ground improvement The design and constructional procedure of different ground improvement methods are comprehensively covered in the text The subject matter divided into fourteen chapters is organised into a simplified and logical manner to describe first the working methods and then the possible future developments The book enables its readers to become aware of the overall methodology to be adopted in a particular case and seek possible solution to the chosen field It is primarily intended to cater the needs of undergraduate and postgraduate students of civil engineering and geotechnical engineering **KEY FEATURES** Numerous figures tables and mathematical equations are provided to support the topics discussed Several worked out examples are provided in most of the chapters Objective questions descriptive questions and references are given at the end of each chapter Numerical questions are given for practice in the relevant chapters An appendix introduces miscellaneous topics related to soil **Examining the Environmental Impacts of Materials and Buildings** Brownell, Blaine Erickson, 2020-02-28 Fundamental environmental challenges such as climate change resource depletion and pollution are still widely relevant in today's world Many of these problems have been associated with the architecture engineering and construction industries due to the level of resources used in these professions In recent years

many manufacturers in these fields have expressed the motivation to make necessary changes that would be beneficial to the environment. Despite this progress, there remains a lack of research and assessment on the methods to achieve environmental stability within these architectural fields. *Examining the Environmental Impacts of Materials and Buildings* provides emerging research exploring the theoretical and practical aspects of ecological performance within modern building design and materials-based construction. Featuring coverage on a broad range of topics such as life cycle assessment, material flows analysis, and sustainability, this book is ideally designed for architects, civil engineers, construction professionals, environmentalists, ecologists, business practitioners, scientists, policymakers, designers, researchers, and academicians seeking research on current trends in environmental performance within building design. **Proceedings of the 2020 DigitalFUTURES** Philip F. Yuan, Jiawei Yao, Chao Yan, Xiang Wang, Neil Leach, 2021-01-28. This open access book is a compilation of selected papers from 2020 DigitalFUTURES The 2nd International Conference on Computational Design and Robotic Fabrication CDRF 2020. The book focuses on novel techniques for computational design and robotic fabrication. The contents make valuable contributions to academic researchers, designers, and engineers in the industry. As well, readers will encounter new ideas about understanding intelligence in architecture. **Craftwork as Problem Solving** Professor Trevor H J Marchand, 2016-01-28. Presenting rich textured ethnographic studies of craftspeople at work around the world, *Craftwork as Problem Solving* examines the intelligent practices involved in solving a variety of problems and the ways in which these are perceived and evaluated both by makers and creators themselves and by the societies in which they work. With attention to local factors such as training regimes and formal education, access to tools, socialisation, and cultural understanding, budgetary constraints, and market demands, changing technologies and materials, and political and economic regimes, this book sheds fresh light on the multifarious forms of intelligence involved in design and making, inventing and manufacturing, and cultivating and producing. **Proceedings of the 18th Conference of the Associated Research Centers for the Urban Underground Space** Wei Wu, Chun Fai Leung, Yingxin Zhou, Xiaozhao Li, 2024-08-29. This book presents peer reviewed articles from the 18th Conference of the Associated Research Centers for the Urban Underground Space ACUUS 2023 held in Singapore from November 1 to 4, 2023. It highlights new opportunities and challenges in underground space use amid a re-focus on exploring and developing the underground space as a strategic resource and part of sustainable development. The new frontier presents unprecedented opportunities for simultaneously improving urban infrastructure, urban livability, and resilience. At the same time, special challenges exist in developing underground space both from a human design perspective and in terms of complexity, 3D planning, system integration, technical, and life cycle costs. Equally important is the need to move from the creation of underground space as a haphazard last resort solution to a well-planned and integrated use of underground space that can serve the needs of society for future generations as well as our own. As the world emerges from the COVID-19 pandemic and is faced with the many challenges in climate resilience, the works presented

in this book provide a timely opportunity and an excellent forum for engaging discussions and exchanges among planners designers engineers researchers and policy makers Embedded Commissioning of Building Systems Ömer Akin, 2011 In today's digital green and consumer driven marketplace it is critical to be knowledgeable about the latest approaches tools and systems that can help you seamlessly and reliably conduct building performance verification assessments This groundbreaking book provides you with a solid understanding of the underpinnings of embedded commissioning ECx as the overarching building evaluation approach You find a review of significant and emerging approaches within ECx including product models process models BIM building information modeling laser technology based modeling mapping between process and product models building codes and data access and exchange standards Moreover this forward looking resource provides you with details on the latest research findings in the areas of sensor networks value based design fields tools and AR AV methods just in time technologies and wearable computers
