## **Construction Of Nationhood Ethnicity Religion And Nationalism:**

*The Construction of Nationhood* Adrian Hastings, 1997-11-06 The Construction of Nationhood first published in 1997 is a thorough re analysis of both nationalism and nations In particular it challenges the current modernist orthodoxies of such writers as Eric Hobsbawm Benedict Anderson and Ernest Gellner and it offers a systematic critique of Hobsbawm s best selling Nations and Nationalism since 1780 In opposition to a historiography which limits nations and nationalism to the eighteenth century and after as an aspect of modernisation Professor Hastings argues for a medieval origin to both dependent upon biblical religion and the development of vernacular literatures While theorists of nationhood have paid mostly scant attention to England the development of the nation state is seen here as central to the subject but the analysis is carried forward to embrace many other examples including Ireland the South Slavs and modern Africa before concluding with an overview of the impact of religion contrasting Islam with Christianity while evaluating the ability of each to support supra national political communities

**The Construction of Nationhood** Adrian Hastings, 1999 **The Construction of Nationhood: Ethnicity, Religion and Nationalism** , 1997 Ecclesial Boundaries and National Identity in the Orthodox Church

Tamara Grdzeldze, 2023-05-15 Grdzeldze s study evaluates the present state of ecclesiology in the Orthodox Church focusing on the history of autocephaly and its relationship with the rise of religious nationalism To date the Orthodox Church has not sufficiently addressed the pressing problem of religious nationalism Tamara Grdzeldze s Ecclesial Boundaries and National Identity in the Orthodox Church fills this lacuna offering a solution to the ecclesiological problems posed by the rise of group related sentiment in Orthodox communities Grdzeldze s monograph begins with an examination of the history of autocephaly and synodality in the Orthodox Church As she explains the political autonomy of local churches in the Eastern Roman Empire which was later transformed into autocephaly instinctively carried the kernel of group related sentiments whether national or ethnic Over time such sentiments have given rise to religious nationalism which has further resulted in the inability of autocephalous churches to disengage from their national political involvements Consequently Orthodox Churches are unable to conduct a conversation on the hermeneutics of authority After sketching this historical background Grdzeldze offers a solution to this ecclesiological problem proposing a eucharistic hermeneutics by which the concepts of autocephaly and synodality might be preserved from misappropriation by religious nationalists This proposal is centered on the principle that the Church represents the Body of Christ and thus embraces the whole people of God and the whole of God s creation through the sacramental life Ultimately this eucharistic mode of visioning the Church furnishes a solution to the crisis of borders and boundaries in the Orthodox Church Protestant Nationalists in Ireland, 1900-1923 Conor

Morrissey, 2019-10-10 An innovative and original analysis of Protestant advanced nationalists from the early twentieth century to the end of the Irish Civil War John Foxe and His World Christopher Highley, John N. **Patterns of Secularization** Daphne Halikiopoulou,2017-05-15 The politicization of religion is a central feature of the modern world pointing to the continued relevance of the secularization debate does modernization result in the decline of the social and political significance of religion or rather in a reaffirmation of religious values This book examines the emergence of different patterns of secularization It identifies the circumstances under which religion may remain or cease to be politically active and legitimate in societies where secularization has been initially inhibited given a strong identification with the nation Arguing that in such societies the Church draws its power not only from its relationship with the state but also its relationship with the nation this book identifies two patterns of secularization a co optation and b confrontation The redefinition of the Church state and nation nexus is likely to result in secularization if a the church obstructs the modernisation process church and state and b if external threat perceptions decline church and nation The simultaneous presence of these constraints serves to redefine the role of religion in the formation of national identity Comparing Greece and the Republic of Ireland as two cultural defence cases with a strong variation in the political and social salience of religion this book explains Ireland s current secularization drive in terms of the fluidity of Irish national identity and the rigidity of the Irish Catholic Church confrontation It contrasts this with the Greek case where the Church s resilience is linked to institutional flexibility on the one hand and a reliance on an ethnic religious national identity on the other co optation In conceptualizing the contemporary role of religion in the Republic of Ireland and Greece this book draws a number of generalizable conclusions about the political role of religion in cultural defence cases

Constructing a German Diaspora Stefan Manz, 2014-06-05 This book takes on a global perspective to unravel the complex relationship between Imperial Germany and its diaspora Around 1900 German speakers living abroad were tied into global power political aspirations They were represented as outposts of a Greater German Empire whose ethnic links had to be preserved for their own and the fatherland s benefits Did these ideas fall on fertile ground abroad In the light of extreme social political and religious heterogeneity diaspora construction did not redeem the all encompassing fantasies of its engineers But it certainly was at work as nationalism went global in many German ethnic communities Three thematic areas are taken as examples to illustrate the emergence of globally operating organizations and communication flows Politics and the navy issue Protestantism and German schools abroad as bulwarks of language preservation The public negotiation of these issues is explored for localities as diverse as Shanghai Cape Town Blumenau in Brazil Melbourne Glasgow the Upper Midwest in the United States and the Volga Basin in Russia The mobilisation of ethno national diasporas is also a feature of modern day globalization The theoretical ramifications analysed in the book are as poignant today as they were for the nineteenth century

individual and collective identity the imposition of secular policies from above may not facilitate democratization but may rather impede the embedding of democracy in society Moreover the inclusion or exclusion of religion following statehood may facilitate a certain type of path dependent political culture one with long term political consequences Aviad Rubin s refreshing analytical approach comparing and contrasting the region s only two longstanding democratic entities and the dynamics of religion and the state in two different religions Islam and Judaism facilitates generalizable lessons for emergent political regimes in the post Arab Spring Middle East Religion, Nation and Democracy in the South Caucasus Alexander Agadjanian, Ansgar Jödicke, Evert van der Zweerde, 2014-10-10 This book explores developments in the three major societies of the South Caucasus Armenia Azerbaijan and Georgia focusing especially on religion historical traditions national consciousness and political culture and on how these factors interact It outlines how despite close geographical interlacement common historical memories and inherited structures the three countries have deep differences and it discusses how development in all three nations has differed significantly from the countries declared commitments to democratic orientation and European norms and values The book also considers how external factors and international relations continue to impact on the three countries

**The Routledge Handbook of Ethnic Conflict** Karl Cordell, Stefan Wolff, 2016-01-22 A definitive global survey of the interaction of ethnicity nationalism and politics this handbook blends rigorous theoretically grounded analysis with empirically rich illustrations to provide a state of the art overview of the contemporary debates on one of the most pervasive international security challenges today Fully updated for the second edition the book includes a new section which offers detailed analyses of contemporary cases of conflict such as in Ukraine Kosovo the African Great Lakes region and in the Kurdish areas across the Middle East thus providing accessible examples that bridge the gap between theory and practice The contributors offer a 360 degree perspective on ethnic conflict from the theoretical foundations of nationalism and ethnicity to the causes and consequences of ethnic conflict and to the various strategies adopted in response to it Without privileging any specific explanation of why ethnic conflict happens at a particular place and time or why attempts at preventing or settling it might fail or succeed The Routledge Handbook of Ethnic Conflict enables readers to gain a better insight into such defining moments in post Cold War international history as the disintegration of the Soviet Union and Yugoslavia and their respective consequences the genocide in Rwanda and the relative success of conflict settlement efforts in Northern Ireland By contributing to understanding the varied and multiple causes of ethnic conflicts and to learning from the successes and failures of their prevention and settlement the Handbook makes a powerful case that ethnic conflicts are neither unavoidable nor unresolvable but rather that they require careful analysis and thoughtful and measured responses

**Towards World Heritage** Melanie Hall, 2016-02-24 Historic preservation whether of landscapes or buildings was an important development of the nineteenth century in many countries There is however surprisingly little understanding about how it took place and research into it is narrowly focused For example generally

landscape preservation from this time is examined separately from buildings preservation is seen in terms of national narratives or considered within the contexts of area studies and it is usually seen from a specific disciplinary perspective All of these later categorizations did not apply at the time and consequently a very partial view is achieved In order to begin unlocking a very complex phenomenon that has helped to define our own age this dynamic collection of essays brings together an international and transdisciplinary line up of academics and practitioners to reconsider preservation s origins in the second half of the nineteenth and early part of the twentieth century With a focus on Britain and the British Empire and including case studies from the United States Canada Sweden France Germany Sri Lanka The Holy Land and Turkey this book places preservation in imperial international and national contexts demonstrating that there was far more interaction between different countries in this arena than may be supposed and revealing remarkable but hitherto hidden overlaps and intersections It examines three main themes the influence of religion the political and sub diplomatic aspects of preservation and the professionalization of preservation practice Internationalizing trends already existed through the churches the universities and the diplomatic services as well as familial ties that had an important impact on preservation s epistemic communities and its targets Other internationalizing factors include an interest in national histories and the histories of architecture and art particularly when known through illustration a growing interest in biography especially of founding fathers or famous literary figures and tourism Although the focus is on architectural preservation this book demonstrates that in this formative period the preservation of buildings and landscapes needs to be considered together as it often was at the time and in context The conclusion reached is that the preservation movement has to be understood in imperial and international contexts rather than in simply national or regional ones
