The Analysis of Gothic Architecture ,2022-12-05 The essays in this volume reflect on and build on the remarkable legacies of Robert Mark and Andrew Tallon who pioneered the application of high technology research methods to the study of Gothic architecture Combining personal reminiscences and historiographical discussions with meticulous geometrical and structural analyses based on photogrammetric and laser scanned building surveys this book offers valuable new perspectives not only on Mark and Tallon themselves but also on major churches including the abbeys of Saint Denis and Alcobá a Santa Maria Novella in Florence Notre Dame in Paris and the cathedrals of Clermont Reims and Wells Contributors are Sheila Bonde Robert Bork Lindsay S Cook Michael Davis James Hillson Kyle Killian Peter Kurmann Clark Maines Ethan Mark Stephen Murray Sergio Sanabria Dany Sandron Ellen Shortell Elizabeth B Smith Rebecca Smith Arnaud Timbert Stefaan Van Liefveringe and Nancy Wu See inside the book **French Gothic Architecture of the Twelfth and Thirteenth Centuries** Jean

Bony,2023-11-15 Gothic architecture is the most visible and striking product of medieval European civilization Jean Bony whose reputation as a medievalist is worldwide presents its development as an adventure of the imagination allied with radical technical advances the result of a continuing quest for new ways of handling space and light as well as experimenting with the mechanics of stone construction He shows how the new architecture came unexpectedly to be invented in the Paris region around 1140 and follows its history in the great cathedrals of northern France and dozens of other key buildings to the end of the thirteenth century when profound changes occurred in the whole fabric of medieval civilization Rich illustrations including comprehensive maps enhance the text and themselves constitute an exceptionally valuable documentation Despite its evident scholarly intention this book is not meant for specialists alone but is conceived as a progressive infiltration into the complexities of history at work revealing its unpredictable vitality to the uninitiated curious mind **New Approaches to Medieval Architecture** Robert Odell Bork,William W. Clark,Abby McGehee,2011 The

contributors to this book are among those at the forefront of the emergence of new critical perspectives and new technologies Several of the essays present dramatic reinterpretations of canonical monuments consider broader methodological issues such as the applications of geometry workshop practice and the shaping of historical narratives and others demonstrate how high tech scanning and visualization methods can enhance our understanding of construction methods and the behavior of buildings *The Sainte-Chapelle and the Construction of Sacral Monarchy* Meredith Cohen,2015 This book offers a novel perspective on one of the most important monuments of French Gothic architecture the

Sainte Chapelle constructed in Paris by King Louis IX of France between 1239 and 1248 especially to hold and to celebrate Christ's Crown of Thorns Meredith Cohen argues that the chapel's architecture decoration and use conveyed the notion of sacral kingship to its audience in Paris and in greater Europe thereby implicitly elevating the French king to the level of suzerain and establishing an early visual precedent for the political theories of royal sovereignty and French absolutism By setting the chapel within its broader urban and royal contexts this book offers new insight into royal representation and the rise of Paris as a political and cultural capital in the thirteenth century **Ove Arup** Peter H. Conference on Research Methods in Business and Management Dr Manuel Au-Yong-Oliveira, Prof Carlos Costa, 2021-06-07 Conference Proceedings of 20th European Conference on Research Methods in Business and Management Rethinking Prototyping Christoph Gengnagel, Axel Kilian, Julien Nembrini, Fabian Scheurer, 2013-10-02 Design modelling has benefited from computation but in most projects to date there is still a strong division between computational design and simulation leading up to construction and the completed building that is cut off from the computational design modelling The Design Modelling Symposium Berlin 2013 would like to challenge the participants to reflect on the possibility of computational systems that bridge design phase and occupancy of buildings This rethinking of the designed artifact beyond its physical has had profound effects on other industries already How does it affect architecture and engineering At the scale of engineering and building systems new perspectives may open up by engaging built form as a continuous prototype which can track and respond during use and serve as a real world implementation of its design model This has been tried many times from intelligent facades to smart homes and networked grids but much of it was only technology driven and not approached from a more holistic design perspective **Building Technology and Culture in the Asia-Pacific Region** Giaime Botti, Eugenio Mangi, Hiroyuki Shinohara, 2024-09-16 This book compiles a curated selection of texts authored by architects and scholars hailing from Asia Europe and North America Their research often intertwined with practical applications delves into the intricate relationship between material culture technology and architecture within the broader cultural and social milieu Three keywords construction materials encounters serve as the organizing framework for the book guiding readers through a diverse array of case studies and experiences where these elements intertwine seamlessly Indeed these terms are intricately interwoven reflecting the inseparability of technology from culture The first part of the book delves into the poetics and theoretical underpinnings of construction drawing from the works of various designers across China Japan and India The subsequent section navigates the terrain of construction materials exploring their evolution manufacturing processes and utilization with a particular focus on diverse timber products and bamboo The final part of this compilation embarks on a journey through historical encounters between the East and West spanning over a century It meticulously investigates the exchanges misunderstandings and innovations catalyzed by these interactions Collectively

these texts offer a profound and original perspective on the myriad experiences and challenges associated with the intricate interplay between technological advancements tectonic preferences and socio cultural dynamics within the architectural landscape of the Asia Pacific region

Plotting Gothic Stephen Murray,2015-03-06 A historian of medieval art and architecture with a rich appreciation of literary studies Stephen Murray brings all those fields to bear on a new approach to understanding the great Gothic churches of the twelfth and thirteenth centuries Plotting Gothic positions the rhetoric of the Gothic as a series of three interlocking plots a spatial plot tied to the material construction of the churches a social plot stemming from the collaborative efforts that made Gothic output possible and a rhetorical plot involving narratives that treat the churches as objects of desire Drawing on the testimony of three witnesses involved in church building Abbot Suger of Saint Denis Gervase of Canterbury and the image maker Villard de Honnecourt and a range of secondary sources Murray traces common patterns in the way medieval buildings were represented in words and images Our witnesses provide vital information about the way the great churches of Gothic were built and the complexity of their meanings Taking a fresh approach to Gothic architecture Plotting Gothic offers an invigorating new way to understand some of the most lasting achievements of the medieval era
