Under Construction Freek Colombijn, 2013-11-29 Freek Colombijn examines the social changes in Indonesian cities during the process of decolonization That process had major repercussions for urban society These social changes are studied from the angle of urban space in general and the provision of housing in particular This provides fresh insight into how people experienced decolonization The author challenges the idea that a shift from ethnic to class differences was the overriding social change during decolonization He argues instead that class differences had already formed the predominant dividing lines in colonial urban society Colombijn also focuses on the shifting balance of power between the main agents in the urban arena Through the use of

Mass Uprisings in the USSR V. A. Kozlov, Elaine McClarnand, 2015-06-01 Until recent times incidents of mass unrest in the USSR were shrouded in official secrecy Now this pioneering work by historian Vladimir A Kozlov has opened up these hidden chapters of Soviet history It details an astonishing variety of widespread mass protest in the post Stalin period including workers strikes urban riots ethnic and religious confrontations and soldiers insurrections Kozlov has drawn on exhaustive research in police procuracy KGB and Party archives to recreate the violent major uprisings described in this volume He traces the historical context and the sequence of events leading up to each mass protest explores the demographic and psychological dynamics of the situation and examines the actions and reactions of the authorities This painstaking analysis reveals that many rebellions were not so much anti communist as essentially conservative in nature directed to the defense of local norms being disturbed by particular instances of injustice or by the rash of Krushchev era reforms This insight makes the book valuable not only for what it tells us about postwar Soviet history but also for what it suggests about contemporary Russian society as well as popular protests in general
