Strategic Planning for Exploration Management Allen N. Quick,Neal A. Buck,2012-12-06 In all the industries in which I do management consulting each manager considers his own industry to be truly unique Of course each is different in some respects and each has its own quirks and features However the similarities among in dustries far outweigh the

differences The critical dynamics and the management issues have a great deal in common However there are I believe two industries or segments of industries that have an important critical uniqueness that does distinguish them from the rest One of these is the exploration for undiscovered natural resources notably for oil and gas the other is research In these two industry segments the competition is not nearly so much one firm against another as it is each firm against nature or if you prefer against the unknown This uniqueness not only sets these two industry segments apart from the rest it also helps us to see what they have in common with each other Pure scientific talent ability and genius have direct commercial value We do not have the zero sum game of competition in the market place A discovery by one firm does not usually perceptibly lessen the opportunity of a competitor for a discovery On the contrary a discovery by one firm usually increases the knowledge of the whole industry increasing competitors opportunity for discovery We see the source of continuing life for the rest of the firm
