Constructs For Understanding Japan Yoshio Sugimoto, Ross E. Mouer, 2013-09-05 First published in 1989 This volume has emerged from the International Colloquium on the Comparative Study of Japanese Society Held at Noosa Heads in Queensland from 29 January to 6 February 1982 the colloquium brought together participants from eight countries to discuss about thirty papers The participants came with a common sense of dissatisfaction with the group model or consensus oriented theories as a means of understanding Japanese society The papers and discussion focused on alternative approaches for conceptualizing Japanese society and on methodological issues in the comparative study of Japanese society **An Introduction to Japanese Society** Yoshio Sugimoto, 2020-11-12 Taking a sociological approach this text provides a sophisticated highly readable introduction to Japanese society *Japanese Civilization* S. N. Eisenstadt, 1996 One of the world's leading social theorists provides a monumental synthesis of Japanese history religion culture and social organization Equipped with a thorough command of the subject S N Eisenstadt focuses on the non ideological character of Japanese civilization as well as its infinite capacity to recreate community through an ongoing past *Australian National Bibliography*, 1978 Japanese Encounters With Postmod Yoshio Sugimoto, Johann P. Arnason, 2012-11-12 This is a systematic study of the sociological debate on postmodernity in the Japanese context The volume consists of a collection of 12 papers that explore the idea of postmodernity primarily from sociological perspectives covering a wide range of domains including work feminism communication science and technology social stratification fine arts and literature The contributors come from diverse disciplines ranging from sociology and history to political science and linguistics They include advocates of postmodern theories and postmodernist analyses of Japanese society as well as critics who argue that a suitable revised theory of modernity is still an adequate framework for comparing Japan and the West Others take the view that an intermediate position might be more productive than a qualified or provisional version of postmodern can throw new light on issues traditionally neglected by social theory While the postmodernity debate has been carried out chiefly in the context of European and American experiences this book aims to pave the way for the postmodernity question to be explored in the non western but highly industrialized setting of Japan and brings forward a series of open ended questions about the bias in the debate Written by academics based in universities in Japan and Australia the volume itself is postmodern in its internal diversity and multi cultural orientation Language and Society in Japan Nanette Gottlieb, 2005-02-03 *Language and Society in Japan* deals with issues important to an understanding of language in Japan today among them multilingualism language and nationalism and literacy and reading habits It is organised around the theme of language and identity in particular how language is used to construct national international and personal identities Contrary to popular stereotypes Japanese is far from the only language used in Japan and does not function in a vacuum but comes with its own particular cultural implications Language has played an important role in Japan's cultural and foreign policies and language issues are

intimately connected both with technological advance and with minority group experiences Nanette Gottlieb is a leading authority in this field Her book builds on and develops her previous work and promises to be essential reading for students scholars and all those wishing to understand the role played by language in Japanese society *Institutional Diversity and Innovation* Cornelia Storz, Sebastian Schäfer, 2011-05-27 The concept of innovation systems has gained considerable attention from scholars and politicians alike The concept promises not only to serve as a tool to explain sustained economic development but also to provide policy makers with scientifically grounded policy options to advance the growth of economies The thrust of much recent literature has been to review existing empirical findings in order to deduce best practice models which are assumed to benefit all countries in a similar fashion However as this book argues such universal models often fail in both analysis and policy prescriptions as they do not take into account sufficiently the circumstances and development trajectories of particular countries With a foreword by Richard Whitley this book discusses the extent to which the diagnoses and reform recommendations of recent work on innovation theory and the related policy recommendations actually apply to Japan and China Making links between behavioural economics and institutional analysis the book covers their regulatory framework legal and science system the labour and capital market and intra firm relations It examines the present design and reasons underlying the Japanese and Chinese innovation systems and based on those findings emphasises the necessity for reform to secure the future competitiveness of both countries The book is introduced by a foreword by Richard Whitley Professor of Organisational Sociology at Manchester Business School Intercultural Communication Fred E. Jandt, 2004 Contains 36 articles showcasing the development and diversity of intercultural communication theories in countries such as China Africa the United States New Zealand Mexico Egypt and others Topics discussed include identity and communication intercultural verbal and nonverbal processes and interactions relationships and ethics Publisher description
