management consultancy service Timothy Clark examines how these problems are overcome by revealing the foundations of a successful and long term client consultant relationship In a departure from previous analyses of management consultancy he argues that the key to understanding consultancy and its success is to appreciate that successful consultancy in its methods at least emphasizes the active management of the client consultant relationship At the core of successful consultancy is the art of impression management A consultant seeks to create a reality which persuades the client that they have purchased a high quality service The work of consultants is analysed and understood in terms of the theatrical analogy or dramaturgical metaphor A consultancy intervention is therefore conceived of as a dramatic event This is illustrated with reference to two types of consultancy work executive search i e headhunting and the work of management gurus
