Perspectives on Methodology in Consumer Research David Brinberg, Richard J. Lutz, 2012-12-06 Methodological advances in consumer behavior are increasing rapidly We can characterize these advances by work in two logically separate but functionally related areas a the philosophical underpinnings of our methods and b the analytic strategies for examining the phenomena of interest in the field An important aspect in communicating these advances is the demonstration of their use on focal problems in consumer behavior Current research strategies and analytic techniques in the field of consumer research reflect the dominant logical empiricist epistemology The development of new epistemologies e g scientific relativism hypothetical realism however is likely to modify the dominant logical empiricist approach and is also likely to influence the analytic strategies used to conduct research For instance with the increased awareness of scientific relativism and hypothetical realism greater emphasis is anticipated for idiographic rather than nomothetic designs for observational rather than experimental designs for process rather than static analyses and for more sophisticated techniques for summarizing findings across studies The major theme underlying this volume is that conceptual analytic and substantive diversity are essential for consumer behavior research to advance Collectively the chapters we present in this volume are a diverse set of perspectives for the study of consumer behavior This volume is organized into three parts 1 philosophical orientations toward consumer behavior research 2 analytic strategies for consumer behavior research and 3 applications of these orientations and strategies to current research areas **The Routledge Companion to Consumer Behavior Analysis** Gordon Foxall, 2015-08-20 The Routledge Companion to Consumer Behavior Analysis provides a unique and eclectic combination of behavioral cognitive and environmental perspectives to illuminate the real world complexities of consumer choice in a marketing oriented economy Edited by a leading authority in the field the contributing authors have created a unique anthology for understanding consumer preference by bringing together the very latest research and thinking in consumer

behavior analysis This comprehensive and innovative volume ranges over a broad multi disciplinary perspective from economic psychology behavioral psychology and experimental economics but its chief focus is on the critical evaluation of consumer choice in the natural settings of affluent marketing oriented economies By focussing on human economic and social choices which involve social exchange it explores and reveals the enormous potential of consumer behavior analysis to illuminate the role of modern marketing oriented business organizations in shaping and responding to consumer choice This will be of particular interest to academics researchers and advanced students in marketing consumer behavior behavior analysis social psychology behavioral economics and behavioral psychology
