Consumer Decision-Making, Analytics and AI Andrew Smith, Evgeniya Lukinova, John Harvey, Gavin Smith, Roberto Mansilla, James Goulding, Georgiana Nica-Avram, 2025-06-27. Many decisions in our lives are decisions we make as consumers and buyers. Analytics-driven marketing underpinned by machine learning and AI has had a seismic impact on the execution of these decisions and on behavioural outcomes. This book dissects processes and issues at the heart of our emerging reality as human actors embedded in a system of exchange driven by fast-evolving technologies. It is a seminal work on a complex but urgent issue in social and behavioural science. Based on extant and emerging research, the book presents new evidence and innovative theoretical structures and concepts to explore how data analytics and AI can influence consumer thinking and behaviour. It synthesizes consumer research with the relevant literature on computational thinking, human-computer interaction, AI decision delegation and consumer analytics, linking them in a coherent fashion. The authors utilize original exhibits and real-world data in an accessible format to both engage and challenge the reader. This cutting-edge book is a must-read for scholars and upper-level students researching and studying marketing, consumer behaviour, AI decision making and behavioural science.
