Virtual America John Opie, 2008-01-01 Virtual America traces the complex relationship between Americans technology and their environment as it has unfolded over the past several centuries Throughout history Americans have constructed mental pictures of unique places such as the American West that have taken on more authority than the actual gritty landscapes This disconnect from reality is magnified by the new world of virtual realities on the computer screen where personal immersion in interactive simulations becomes the default environment Virtual America identifies the connections or lack thereof between our individual selves an American identity and the geography out there John Opie examines what he calls First Nature the natural world Second Nature metropolitan infrastructure built environment and Third Nature virtual reality in cyberspace He also explores how Americans have historically dreamed about a better life in daily ordinary existence and then fulfilled it through the Engineered America of our built environment the Consumer America of material well being and the Triumphal America of our conviction that we are the world s exceptional model But these dream worlds have also encouraged placelessness and thus indifference to our dwelling in home ground Finally Opie explores Last Nature a sense of place and argues that when we identify an authentic place we can locate authenticity of self a reification of place and self by their connectedness

America in JeruSALEm Anat First, Eli Avraham, 2009-10-26 In *America in JeruSALEm* the authors examine the effects of globalization and Americanization on the national identity of small nations Using Israel as a case study First and Avraham analyzed the changes in Israeli advertising over the past two decades They found that since the 90s Israeli advertisers began using American symbols values sights and heroes to promote diverse products without any consideration of the place they were actually made The perspective offered in this book a consideration of advertising as a locus of the tension between national identity and globalization Americanization is an innovative one generating a model that can be used to analyze national identity through advertising in the age of globalization Americanization Although many books have focused on numerous aspects of Israeli society *America in JeruSALEm* offers a

new and accessible perspective on the changes in Israeli identity Buying Power Lawrence B. Glickman,2009-06-10 A definitive history of consumer activism Buying Power traces the lineage of this political tradition back to our nation s founding revealing that Americans used purchasing power to support causes and punish enemies long before the word boycott even entered our lexicon Taking the Boston Tea Party as his starting point Lawrence Glickman argues that the rejection of British imports by revolutionary patriots inaugurated a continuous series of consumer boycotts campaigns for safe and ethical consumption and efforts to make goods more broadly accessible He explores abolitionist led efforts to eschew slave made goods African American consumer campaigns against Jim Crow a 1930s refusal of silk from fascist Japan and emerging contemporary movements like slow food Uncovering previously unknown episodes and analyzing famous events from a fresh perspective Glickman illuminates moments when consumer activism intersected with political and civil rights movements He also sheds new light on activists relationship with the consumer movement which gave rise to lobbies like the National Consumers League and Consumers Union as well as ill fated legislation to create a federal Consumer Protection Agency **The American** ,1897 **Winning Back America** Mark J. influence and inheritance will inevitably come up Rather than bypass them the book refines such terms in order to meet some of the challenges posed by contemporary critical theory in the field of comparative studies In this more nuanced comparative reading of these texts which looks beyond a linear paradigm Jacques Derrida's term *destinerrance* is taken up as a means for thinking how the work of this successor Rushdie dialogues with Milton conferring on the epic an elusive kind of afterlife *Destinerrance* will be taken here to signal an ongoing process of re-signification of texts that does away with the notions of adhesion or similarity to an original central point In the case of Milton and his successor the fictional work of Salman Rushdie will be seen as constituting sites in which collaboration and contestation in relation to the epic are simultaneously and continually staged Rushdie can then be seen to interweave Miltonic images of Eden of the fall and a Satanic discourse of transgression to write territories and characters constituted in the crossings of domains of difference territories in which colonial past and contemporary cultural formations and power structures are continually questioned and negotiated In this way his work enacts a re-signifying of Milton's text mediating in these deviations the way it reaches us today
