Food and Nutrition Information and Educational Materials Center Catalog Food and Nutrition Information Center (U.S.), 1976 **Cumulative Index to the Catalog of the Food and Nutrition Information and Education Material Center 1973-1975** National Agricultural Library (U.S.), 1975 Consumer attitudes to food quality products Marija Klopčič, Abele Kuipers, Jean-François Hocquette, 2013-03-12 Quality foods such as traditional EU certified organic and health claimed are part of a growing trend towards added value in the agri food sector In these foods elements of production processing marketing agro tourism and speciality stores are combined Paramount above all is the link to the consumer which requires a personal approach At this point one enters the field of food consumer science This can be seen as a hybrid of two distinct sciences On one hand there is the hardware component i e the science of food On the other hand the software component related to the science of consumers preferences and behaviour In animal science nearly all attention is given to the hardware aspect However to build a successful business in quality food products the software aspect is essential This publication devotes special attention to the consumer and gives insight into an area of knowledge still very much in

development It is intended to enhance understanding of the complex relationships in the route from products to consumers and offers practical solutions in this field This publication includes review articles covering basic aspects of food consumer science and research trends in the field and a series of country reports and articles on relevant studies related to the topic with emphasis on Southern Europe

Food Quality and Consumer Value Monika J.A. Schröder, 2013-03-09 Consumer markets for foods and beverages in developed countries are well supplied and highly fragmented Yet the question being asked is how close retailers actually come to fulfilling their customers requirements The concept of consumer value is one of the main pillars underpinning the theory of market differentiation This book takes an interdisciplinary approach to the analysis of satisfaction in relation to the consumption of food with both food science and consumer science playing central parts It approaches food quality from both the technical and the consumer satisfaction perspectives and assesses the roles of management and regulatory tools in delivering food quality for all Each area is discussed in detail using the appropriate technical terminology but keeping the text accessible to readers from both academic traditions as well as to non specialist readers
