Ends and Means in Social Work E. Matilda Goldberg,R. William Warburton,2021-11-07 Originally published in 1979 Ends and Means in Social Work was the first book to provide research based evidence on what social workers actually do what they were aiming to achieve and what sense their activities made both in terms of their own subjective perspectives and those of their clients The authors describe and analyse a series of surveys and action studies based on a year s referrals and the long term clientele of an area office They aimed first to find out what the clients thought of and expected from the newly reorganised social services and how social workers saw the changes and their new responsibilities The second aim was to discover how social work skills and other resources were being used to meet different client needs Third the research was designed to enable social workers by developing a new monitoring tool the Case Review System to become more explicit about both the ends and means of their activities Widespread interest had been aroused by the Case Review System It had raised intriguing questions about who gets what and why On an individual level the Case Review System can enable social workers to evaluate their practice by comparing plan with achievement as an educational tool it can assist supervision as a management tool it can provide aggregated data on client characteristics the use of resources and outcomes as a research tool it can answer questions on the relationships between client characteristics problems and social work practice and provide longitudinal data on client careers It is in response to insistent demands for a rounded account of this research project and its results that this book has been written It endeavours to bring together all the aspects of the specific research studies and to discuss their wider implications for the organisation of the personal social services Particularly valuable for students and practitioners alike will be the concluding discussion in which the evidence which emerged about the use of social work resources is subjected to critical review Questions are raised about the current deployment of social work skills and suggestions are made about how these skills might be redeployed tasks defined more realistically and how statutory functions could mesh more easily with voluntary activities

Think Consumer Jamil Ammar, 2011-01-18 The availability of a wide range of branded products makes the selection of the right type of goods a difficult process This is particularly true in the case of goods whose characteristics consumers do not have complete information about which they can only learn about after purchasing experiencing goods A trade mark quality guarantee facilitates consumers choice by sending quality signals It also enables a trader of branded goods to differentiate the quality of his goods from those of his competitors Accordingly trade mark protection is said to enhance economic efficiency and thus the production of quality goods and reduce consumer search costs In order for this to work however among other conditions the trader must maintain consistent quality over time and across consumers Otherwise trade mark protection will enhance artificial product differentiation and thus distort competition To date despite its profound significance the quality guarantee is seen as performing an economic function that trade mark law is ill equipped to deal with As a result this function is not enforced under trade mark law Contrary to mainstream thinking this book argues that the quality function of a trade mark should be recognised and enforced through trade mark law What is at stake is far from insignificant it is about bridging the ever increasing gap between the legal rationales for trade mark protection and the economic consequences of this protection in practice The book is also about how consumers should shape their relationship with trade marks and what role law should play in constructing that relationship By giving independent

legal substance to the quality function trade mark law encourages a trader to improve the quality of his goods instead of simply improving the persuasive or advertising value of the mark which in turn enhances artificial product differentiation increases rather than decreases consumer search costs and distorts competition
