Consuming Power A Social History Of American Energies:

Consuming Power David E. Nye, 1999-02-18 Nye uses energy as a touchstone to examine the lives of ordinary people engaged in normal activities How did the United States become the world's largest consumer of energy David Nye shows that this is less a question about the development of technology than it is a question about the development of culture In **Consuming Power** Nye uses energy as a touchstone to examine the lives of ordinary people engaged in normal activities He looks at how these activities changed as new energy systems were constructed from colonial times to recent years He also shows how as Americans incorporated new machines and processes into their lives they became ensnared in power systems that were not easily changed they made choices about the conduct of their lives and those choices accumulated to produce a consuming culture Nye examines a sequence of large systems that acquired and then lost technological momentum over the course of American history including water power steam power electricity the internal combustion engine atomic power and computerization He shows how each system became part of a larger set of social constructions through its links to the home the factory and the city The result is a social history of America as seen through the lens of energy consumption

American Energy Policy in the 1970s Robert Lifset, 2014-04-03 This historical investigation focuses exclusively on American energy policy in the 1970s Revisiting the last time energy issues came to the forefront of national political

discourse the essays collected here provide new insight into the energy crisis of that decade insights with clear implications for our present dilemmas Research Handbook on Energy and Society Webb, Janette, Wade, Faye, Tingey,

Margaret, 2021-12-10 This incisive Research Handbook examines the relationship between energy and society across both macro and micro scales in the context of the climate crisis Featuring an extensive examination of current research in the field from fifty expert international contributors it offers important insights into the inter connections between the globally organised fossil fuel energy system and the changing structures of society *Mining North America* John R. McNeill, George Vrtis, 2017-07-03 Over the past five hundred years North Americans have increasingly turned to mining to produce many of their basic social and cultural objects From cell phones to cars and roadways metal pots to wall tile and even talcum powder minerals products have become central to modern North American life As this process has unfolded mining has also indelibly shaped the natural world and North Americans relationship with it Mountains have been honeycombed rivers poisoned and forests leveled The effects of these environmental transformations have fallen unevenly across North American societies Mining North America examines these developments Drawing on the work of scholars from Mexico the United States and Canada this book explores how mining has shaped North America over the last half millennium It covers an array of minerals and geographies while seeking to draw mining into the core debates that animate North American environmental history generally Taken together the authors contributions make a powerful case for the centrality of mining in forging North American environments and societies Provided by publisher **The New Geographies of Energy** Karl

Zimmerer, 2013-09-13 The New Geographies of Energy Assessment and Analysis of Critical Landscapes is a pioneering collection of new geographic scholarship It examines such vitally important research topics as energy dilemmas of the United States large trends and patterns of energy consumption including China s role peak oil energy poverty and ethanol and other renewable energy sourcing The book offers advances in key emerging areas of energy research each distinguished in the following sections i geographic approaches to energy modeling and assessment ii fossil fuel landscapes iii the landscapes of renewable energy iv landscapes of energy consumption and v an overview of the new geographies of energy Karl Zimmerer Annals Nature Society and Energy issue editor and an essay on America s oil dependency Vaclav Smil renowned energy geographer In addition there is a specially commissioned book review This book was published as a special issue of the Annals of the Association of American Geographers

Moral Energy in America Rebecca K. Wright, 2025-04-29 This book offers an illuminating exploration of how the concept of energy shaped American thought culture and politics throughout the first half of the twentieth century This essential history traces how politicians sociologists geographers urban planners economists and intellectuals adopted the idea of energy to bolster their social programs and visions of the future through distinctive energy imaginaries *Cultures of Energy* Sarah Strauss, Stephanie Rupp, Thomas Love, 2016-06-16 This path breaking volume explores cultures of energy the underlying but under appreciated dimensions of both crisis and innovation

in resource use around the globe Theoretical chapters situate pressing energy issues in larger conceptual frames and ethnographic case studies reveal energy as it is imagined used and contested in a variety of cultural contexts Contributors address issues including the connection between resource flows and social relationships in energy systems cultural transformation and notions of progress and collapse the blurring of technology and magic social tensions that accompany energy contraction and sociocultural changes required in affluent societies to reduce dependence on fossil fuels Each of five thematic sections concludes with an integrative and provocative conversation among the authors The volume is an ideal tool for teaching unique contemporary and comparative perspectives on social theories of science and technology in undergraduate and graduate courses

Electrical Conquest W. Bernard Carlson,Erik M Conway,2024-01-08 This book drawing on fresh scholarship investigates electrification in new places and across different time periods While much of our understanding of electrification as a historical process is based on the seminal work done by Thomas P Hughes in *Networks of Power* 1983 the scholars in this volume expand and revise Hughes systems approach to suggest that electrification is a heterogeneous and contingent process Moreover the contributors suggest that the conquest of the world by electricity remains incomplete despite more than a century elapsing Above all though this book provides context for thinking about what lies ahead as humans continue their conquest of the earth through electricity As we become increasingly dependent on electricity to power our lights heat and cool our homes turn the wheels of industry and keep our information systems humming so we are ever more vulnerable when the grid runs into trouble Chapter Surveying the Landscape The Oil Industry and Alternative Energy in the 1970s is available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com)

Eco-Welfare and the Energy Transition Lorenzo De Vidovich,2024-04-12 This book provides a comprehensive overview of the emerging interplay that runs between energy seen as a basic need and a providential material service from the viewpoint of welfare studies and eco welfare seen as an emerging analytical and policy paradigm that hold together the social crisis on the one hand and the ecological crisis on the other hand At a time of energy transition the interplay between the theoretical framework of eco welfare and the topic of

energy supply is little explored and therefore this book fills a need in the literature by providing a comprehensive framework to navigate this emerging relationship. Such a framework is strengthened by insights on energy poverty and renewable energy communities identified as cornerstones of the analysis between energy transition and eco welfare. Encyclopedia of Consumer Culture Dale Southerton, 2011-09-15. The Encyclopedia of Consumer Culture is the first reference work to outline the parameters of consumer culture and provide a critical scholarly resource on consumption and consumerism.

Sustainable Energy Jefferson W. Tester, 2005. Evaluates trade offs and uncertainties inherent in achieving sustainable energy, analyzes the major energy technologies and provides a framework for assessing policy options. **Germany's**

Energy Transition Carol Hager, Christoph H. Stefes, 2016-09-26. This book analyzes Germany's path-breaking *Energiewende*, the country's transition from an energy system based on fossil and nuclear fuels to a sustainable energy system based on renewables. The authors explain Germany's commitment to a renewable energy transition on multiple levels of governance from the local to the European, focusing on the sources of institutional change that made the transition possible. They then place the German case in international context through comparative case studies of energy transitions in the USA, China, and Japan. These chapters highlight the multifaceted challenges and the enormous potential in different paths to a sustainable energy future. Taken together, they tell the story of one of the most important political, economic, and social undertakings of our time.

Energy Transitions Olivier Labussière, Alain Nadaï, 2018-04-30. This book elucidates what it means to transition to alternative sources of energy and discusses the potential for this energy transition to be a more democratic process. The book dynamically describes a recent sociotechnical study of a number of energy transitions occurring in several countries: France, Germany, and Tunisia, and involving different energy technologies including solar, on/off shore wind, smart grids, biomass, low energy buildings, and carbon capture and storage. Drawing on a pragmatist tradition of social inquiry, the authors examine the consequences of energy transition processes for the actors and entities that are affected by them, as well as the spaces for political participation they offer. This critical inquiry is organized according to foundational categories that have defined the energy transition: renewable energy resources, markets, economic instruments, technological demonstration, spatiality, scale, and temporality/horizon. Using a set of select case studies, this book systematically investigates the role these categories play in the current developments in energy transitions.

The World the Sixties Made Van Gosse, Richard R. Moser, 2008. How can we make sense of the fact that after decades of right-wing political mobilizing, the major social changes wrought by the Sixties are more than ever part of American life? *The World the Sixties Made* is the first academic collection to treat the last quarter of the twentieth century as a distinct period of U.S. history, rebuts popular accounts that emphasize a conservative ascendancy. The essays in this volume survey a vast historical terrain to tease out the meaning of the not-so-long ago. They trace the ways in which recent U.S. culture and politics continue to be shaped by the legacy of the New Left's social movements from feminism to gay liberation to black power. Together, these essays demonstrate that the America that

emerged in the 1970s was a nation profoundly even radically democratized

Past and Present Energy Societies Nina Möllers, Karin Zachmann, 2014-04-15 Abundant salutary problematic energy makes history As a symbol resource and consumer good it shapes technologies politics societies and cultural world views Focussing on a range of energy types from electricity and oil to bioenergy this volume analyzes the social cultural and political concepts and discourses of energy and their implementation and materialization within technical systems applications media representations and consumer practice By examining and connecting production mediation and consumption aspects from an international and interdisciplinary perspective the book offers an innovative view on how energy is imagined discussed staged and used
