Consuming Behaviour:

Emotions and Consumption Behaviour Isabella Soscia, 2013-01-01 A structured scientific approach to the study of emotional responses that is of interest to both managers and consumers For marketing managers this book proposes a simple method to understand how individual emotions such as guilt or happiness influence specific post purchase behaviors For consumers it illustrates the broader implications of emotions that are routinely experienced while choosing buying and consuming products and services Overall the author deals with the elusive complex but highly fascinating subject of emotions and consumer behaviour in a lucid and coherent manner Simona Botti London Business School UK Literally and metaphorically this long overdue book is full of emotions While illustrating the role and implications of human emotions on consumption behaviour the author does it passionately She comments on the evidence that consumers desire much more than functional utility and material possession of goods Positive negative and mixed emotions are better predictors of the way consumers elaborate meanings of their possessions as well as sounder explanations of the way consumption is used in order to navigate social relations Luca M Visconti ESCP Europe France This stimulating book scrutinizes how emotions function in consumers from both a psychological and a managerial perspective It demonstrates how gratitude happiness guilt anger pride and sadness determine different post consumption behaviours such as positive and negative word of mouth repurchase intention and complaint behaviour The emotional side of consumption seems to play an essential role in explaining choices made and actions taken by consumers The book explores the cognitive antecedents and the action tendencies of happiness and unhappiness and social emotions such as guilt and pride anger and gratitude are analysed The will equip managers with conceptual tools and managerial guidance either to prevent certain emotions from arising in consumers or to generate desired emotions in consumers and so inhibit or promote appropriate actions Using empirical examples Isabella Soscia demonstrates that different emotions predict specific different types of post consumption behaviours and that cognitive antecedents specified in the psychology literature elicit them Emotions and Consumption Behaviour will prove invaluable for consumer behaviour scholars and marketing scholars Students will find the examples and short case study descriptions that clarify the theoretical content illuminating As each of the emotions analysed has different managerial implications marketing managers brand and product managers as well as advertising managers will find that this book helps them to design marketing strategy
