**Neural and Metabolic Control of Macronutrient Intake** Hans-Rudolf Berthoud, Randy J. Seeley, 1999-10-25 When an excessive proportion of the human energy requirement is derived from fat the likelihood of obesity increases Any such individual is at risk for diabetes and cardiovascular disease grave and costly health hazards The selective control of fat ingestion is a promising solution to these concerns Existing data suggests that macronutrient intake can be manipulated Further research is working to create pharmacological tools that will suppress fat consumption It will also be possible to fight obesity heart disease and diabetes Neural and Metabolic Control of Macronutrient Intake systematically discusses the known physiological mechanisms involved in macronutrient selection including their molecular genetic and neurochemical aspects The book is also a critical review of the hypothesis that ingestion of the three nutrients is regulated by separate neural control mechanisms leaving open the possibility that strategies could be devised to intervene in bodily control systems and alter the proportion of fat in the diet This reference provides three types of information First the basic background of the biochemical and physiological systems as they relate to macronutrient selection Second opinions and data concerning to what degree animals and humans show evidence of macronutrient selection And third evidence about how the central nervous system might be involved in the choices animals make among macronutrients

**The New Horizon of China's Economic Law Theory** Shouwen Zhang, 2020-10-26 This book presents the development and reformation of economic law in China and explores the three relationships between the government and market between reform and rule of law and between the constitution and economic law On this basis it subsequently focuses on development theory distribution theory risk theory and crisis theory Further it addresses effective development fair distribution and prevention and resolution of related risks and crises which are important functions of economic law In order to achieve the above functions and objectives the book argues we must vigorously promote the integration of rule of law in economic law and constantly refine the theory of economic rule of law employed in China The book demonstrates that no matter how the three major relationships are adjusted or the relevant systems are reformed i e regarding the implementation of the concept of coordinated development or the optimization of economic structures the solution of distribution problems or the improvement of distribution systems the prevention of risks or the response to crises any such changes depend on economic rule of law The above mentioned theoretical discussion presents a new horizon of contemporary Chinese economic law theory which will be of great value to the future development of economic law theory

*Subject-Oriented Business Process Management* Albert Fleischmann, Werner Schmidt, Christian Stary, Stefan Obermeier, Egon Börger, 2012-10-31 Activities performed in organizations are coordinated via communication between the people involved The sentences used to communicate are naturally structured by subject verb and object The subject describes the actor the verb the action and the object what is affected by the action Subject oriented Business Process Management S BPM as presented in this book is based on this

simple structure which enables process oriented thinking and process modeling S BPM puts the subject of a process at the center of attention and thus deals with business processes and their organizational environment from a new perspective meeting organizational requirements in a much better way than traditional approaches Subjects represent agents of an action in a process which can be either technical or human e g a thread in an IT system or a clerk A process structures the actions of each subject and coordinates the required communication among the subjects S BPM provides a coherent procedural framework to model and analyze business processes its focus is the cooperation of all stakeholders involved in the strategic tactical and operational issues sharing their knowledge in a networked structure The authors illustrate how each modeling activity through the whole development lifecycle can be supported through the use of appropriate software tools The presentation style focuses on professionals in industry and on students specializing in process management or organizational modeling Each chapter begins with a summary of key findings and is full of examples hints and possible pitfalls An interpreter model a toolbox and a glossary summarizing the main terms complete the book The web site [www.i2pm.net](http://www.i2pm.net) provides additional software tools and further material

JNCL, *Journal of the National Cancer Institute* National Cancer Institute (U.S.),1980      **Popular Photography** ,1983-02      **Journal of Rehabilitation Research and Development** ,1987      **What determines green purchase behavior?** Zhongju Liao,Shufeng Xiao ,Siyang Long,2024-05-31 Green purchase behavior refers to consumers purchasing green products that are environmentally friendly using fewer resources and causing lower environmental impact and risk As a growing number of people start to recognize the importance of individual responsibility for environmental protection firms are increasingly motivated to develop green products to fit the needs of this green advocacy Despite an emerging number

of consumers claiming their preference towards green brands compared to traditional alternatives researchers have found that there is a huge gap between consumers purchase intention and actual behavior which has gained much attention The psychological process of green purchase behavior may be a complicated process influenced by various factors such as consumer values and norms the pros and cons marketed for green products and various other situational factors Scholars are calling for research that explores the psychological decision making process of green purchase behavior from both theoretical and practical perspectives Due to the high pricing of green products the trade off between the price and function of green products may lower consumers satisfaction Thus there is always a gap between green purchase intention and actual purchase behavior What determines consumers actual green purchase behavior Under what conditions will the consumers pay a premium price for green products What prompts consumers to choose green brands over traditional alternatives Will green consumption be a passing trend or a long term consumption habit What influences the frequency of consumers green purchasing Scholars are welcome to share their opinions and findings about green purchase behavior to help explore this research topic We are extremely interested in the determinants of green purchase behavior and the mechanism of facilitating green consumption considering different perspectives
