

Transition from traditional into modern approaches to teaching Physical Education

Introduction

Education is more than learning about facts, information and skills; it is also about learning the things that have been identified by a society as essentially desirable and relevant for living in a particular community and culture. It is culture of that society that either confirms (through sustainability) the values of what is learned or rejects those, which contradict the traditional ones. Thus, there is social and cultural pressure to initiate young members of a society into some aspects of social life by providing them with selected, yet educationally valuable, backgrounds but not with all the information of all aspects of life.

In the case of physical education this process depends on the “discipline’s capacity and pedagogical responsibility to work on, effect changes in, develop and enhance the body’s intelligent capacities for movement and expression in physical culture” (Evans, 2009, p.169). Evans uses the term physical culture to refer to the variety of play¹, sport, adventure, dance and other leisure physical activities that help define the social fabric of local and national communities. I would extend it and say that physical culture today needs to be seen in a broader cultural context as a well-recognized part of life; it is concerned with developing natural, biologically-inherited, potential along cultural pathways while at the same time creating certain attitudes towards particular values concerning the domain of physical, social and moral aspects, in order to maintain health and well-being.

Over eight decades ago, Buckingham and MacLachy (1925) commented that in education “we had tended to turn our attention from the teaching of facts or mere subject-matter to education through the formulation of desirable habits and the creation of worthy attitudes and

¹ Play in this sense means a form of physical, playful activity, and a very first variety of game and sport. It refers to a range of spontaneous, voluntary, frivolous and non-serious activity. Some plays exhibits no goals or rules and is considered to be “unstructured” in the literature. For more information on play see Garvey, C. (1999). *Play*. Cambridge, MA, Harvard University Press.
