Contemporary Architecture An Architectural Design Profile:

Contemporary Architecture, 1988 *Craft Theory and Contemporary Architecture* Grant Alford, 2025-05-28 This book offers a comprehensive exploration of craft theory in relation to contemporary architecture. Craft is an old and familiar idea but the line between craft and art or craft and mere manufacturing for example is notoriously hard to describe. In architecture a similarly blurred line between the design process on the one hand and the physical making of buildings on the other lies at the center of various debates about what it means to do architecture. The growth and development of craft theory in recent years suggest new insights into these architectural debates but situating the meaning of craft within architecture within today's technological landscape is a complex problem. Alford responds to this challenge by collecting various narratives from craft theory and other fields and discerning among them new lenses through which to view contemporary architectural practice. Episodes from this expanded view of craft in architecture go beyond predictable accounts of Ruskin and Morris to envision new models of practice, new ways of engaging other building professionals and new ways for architects to understand their own labor and the nature of how and what kinds of things they themselves craft. Architecture is changing and within the ongoing story of craft explored in this book are new and surprising ways to understand design and construct the built environment. Written for students and scholars, this book challenges and extends the legacy of craft thinking in architecture.

Contemporary Architecture Marta Tobolczyk, 2021-07-05 This book offers an exciting journey into the most recent architectural achievements seen in their complexity and plurality and described in the most objective and truthful way. The development of contemporary architecture is presented as it commenced more than a century ago as it tried to reconcile democratic ideals with the forces of the Industrial Era. In contrast to many books on the modern day art of building, the development of architecture is not described chronologically here but rather independently for each selective architectural trend. This allows a better explanation of some evolutionary processes and the continuity of each trend. Thanks to such an approach, this book will serve as a convenient tutorial for courses on history of contemporary architecture in all art and architectural schools.

Architecture, Crisis and Resuscitation Tahl Kaminer, 2011-01-20 Studying the relation of architecture to society, this book explains the manner in which the discipline of architecture adjusted itself in order to satisfy new pressures by society. Consequently, it offers an understanding of contemporary conditions and phenomena ranging from the ubiquity of landmark buildings to the celebrity status of architects. It concerns the period spanning from 1966 to the first years of the current century, a period which saw radical change in economy, politics and culture and a period in which architecture radically transformed, substituting the alleged dreariness of modernism with spectacle.

The Architect Maggie Toy, 2001 The objective of this book is to banish the notion of architecture being a male dominated field by showcasing the work of a wide variety of world class women architects, demonstrating the role women are playing in contemporary architecture. First book of its kind to survey the role of women in architecture. Features a wide

international selection of world class contemporary women architects Beautifully illustrated throughout *A Critical History of Contemporary Architecture* Elie G. Haddad, David Rifkind, 2016-12-05 1960 following as it did the last CIAM meeting signalled a turning point for the Modern Movement From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi and gave rise to the first revisionary movement following Modernism Bringing together leading experts in the field this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 It consists of two parts the first section providing a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects **Modern Architecture and the Critical Present** Kenneth Frampton, 1982 **Vittorio Gregotti. Architect of the Modern Project** Lorenzo Ciccarelli, 2025-03-31 This is not only a book about Vittorio Gregotti's projects and works but rather a historical critical analysis of his peculiar figure Like a few others Gregotti embodied the model of the architect intellectual that characterised post war Italian design culture Editor of leading magazines author of influential books and essays professor at prestigious universities curator of memorable exhibitions and events such as the 1976 Venice Biennale and founder of a firm that developed a wide range of projects for over 40 years Gregotti tenaciously occupied all the territories available to the architectural profession promoting cultural and design trends and triggering long lasting controversies This book examines the formation of Gregotti's theoretical positions around the notions of territory and modification the connection with the profession the relationship with history and the tradition of modern architecture the notion of critical internationalism and the idea of the city and urban design in an era of increasing disurbanism All aspects of a cultural project aimed at shaping and elaborating a certain tradition of modern architecture in the different social and economic conditions of his time namely the emerging society of entertainment and consumption and then of information technologies and global financial markets This work will be of interest to postgraduate researchers and academics in architectural theory and history as well as urban design and planning theory and history *Architectural Possibilities in the Work of Eisenman* Michael Jasper, 2022-11-11 This book examines the central decades of Peter Eisenman's work through a formal and thematic analysis of key architectural projects and writings revealing underlying characteristics and arguing for their productive continuity and transformative role The book explores Eisenman's approach to architectural form generation and thinking It does this through a thematic and formal analysis of projects and writings from the mid 1970s to the mid 1990s Following an introductory chapter addressing the theme of potentialities the book is organised in two parts The first part focuses on key period writings of Eisenman framing the close reading around a practice of resistance the architect's approach to history as analysis and the transformative conceptualisation of time In the second part the book undertakes an

analysis of select projects from the 1980s and 1990s Three formal preoccupations and conceptual orientations ground manipulations figuration and spatial events organise this part of the book Previously unpublished material from the Peter Eisenman fonds Canadian Centre for Architecture Montreal provides primary source material A concluding chapter addresses Eisenman's teaching its relation to his larger project and possible legacies for educators practitioners scholars and theorists

Gannon, 2025-02-18 This book examines the life and legacy of Franklin D Israel an influential member of the Los Angeles school of architects Acclaimed Los Angeles architect Franklin D Israel 1945 1996 created innovative residential projects and office interiors that made him one of the most talked about designers of his generation In this vivid account architectural historian Todd Gannon draws on archival resources analyses of Israel s buildings and recent interviews with the architect s colleagues clients and contemporaries including Frank Gehry Thom Mayne and Robert A M Stern Gannon traces Israel s development from his early years and career on the East Coast to his formative world travels and residence at the American Academy in Rome The author guides readers through the Los Angeles architectural context Israel s influential teaching at UCLA his dalliance with Hollywood and the personal motivations behind his architecture and design work all aspects of an influential career that was cut short by his death from AIDS related complications at the age of fifty Franklin D Israel is a compelling work of architectural history and biography chronicling one gay man s engagement with the largely heteronormative world of American architectural culture It explores the achievement of this central figure in the still largely unstudied history of late twentieth century avant garde Los Angeles architecture **NATØ: Narrative Architecture in**

Postmodern London Claire Jamieson, 2017-01-20 Chronicling the last radical architectural group of the twentieth century NAT Narrative Architecture Today who emerged from the Architectural Association at the start of the 1980s this book explores the group s work which echoed a wider artistic and literary culture that drew on the specific political social and physical condition of 1980s London It traces NAT s identification with a particular stream of post punk postmodern expression a celebration of the abject an aesthetic of entropy and a do it yourself provisionality NAT has most often been documented in reference to Nigel Coates the instigator of NAT which has led to a one sided one dimensional record of NAT s place in architectural history This book sets out a more detailed contextual history of NAT told through photographs drawings and ephemera restoring a truer polyvocal narrative of the group s ethos and development **Architecture and**

Urbanism in Modern Korea Inha Jung, 2013-07-31 Although modernization in Korea started more than a century later than in the West it has worked as a prominent ideology throughout the past century in particular it has brought radical changes in Korean architecture and cities Traditional structures and ways of life have been thoroughly uprooted in modernity s continuous negation of the past This book presents a comprehensive overview of architectural development and urbanization in Korea within the broad framework of modernization Twentieth century Korean architecture and cities form three distinctive periods The first defined as colonial modern occurred between the early twentieth century and 1945 when Western civilization was transplanted to Korea via Japan and a modern way of life albeit distorted began taking shape The second is the so called developmental dictatorship period Between 1961 and 1988 the explosive growth of urban populations

resulted in large scale construction booms and architects delved into modern identity through the locality of traditional architecture The last period began in the mid 1990s and may be defined as one of modernization settlement and a transition to globalization With city populations leveling out urbanization and architecture came to be viewed from new perspectives Inha Jung however contends that what is more significant is the identification of elements that have remained unchanged Jung identifies continuities that have been formed by long standing relationships between humans and their built environment and despite rapid modernization are still deeply rooted in the Korean way of life For this reason in the twentieth century regionalism exerted a great influence on Korean architects Various architectural and urban principles that Koreans developed over a long period while adapting to the natural environment have provided important foundations for architects works By exploring these sources this carefully researched and amply illustrated book makes an original contribution to defining modern identity in Korea s architecture housing and urbanism *Heidegger in America* Martin Woessner,2010-12-20 Heidegger in America explores the surprising legacy of his life and thought in the United States of America As a critic of modern life Heidegger often lamented the growing global influence of all things American However it was precisely in America where his thought inspired the work of generations of thinkers not only philosophers but also theologians architects novelists and even pundits As a result the reception and dissemination of Heidegger s philosophical writings transformed the intellectual and cultural history of the United States at a time when American influence was itself transforming the world A case study in the complex and sometimes contradictory process of transnational exchange Heidegger in America recasts the scope and methods of contemporary intellectual and cultural history in the age of globalization challenging what we think we know about Heidegger and American ideas simultaneously *Nexus Network Journal* 14,1 Kim Williams,2014-05-15 The Winter 2012 vol 14 no 1 issue of the Nexus Network Journal is dedicated to the theme Architecture Systems Research and Computational Sciences This is an outgrowth of the session by the same name which took place during the eighth international interdisciplinary conference Nexus 2010 Relationships between Architecture and Mathematics held in Porto Portugal in June 2010 Today computer science is an integral part of even strictly historical investigations such as those concerning the construction of vaults where the computer is used to survey the existing building analyse the data and draw the ideal solution What the papers in this issue make especially evident is that information technology has had an impact at a much deeper level as well architecture itself can now be considered as a manifestation of information and as a complex system The issue is completed with other research papers conference reports and book reviews Pietro Belluschi Meredith L. Clausen,1994 Meredith Clausen reveals the enormous power that Belluschi wielded as an arbiter of taste and decision maker in the 1950s and 1960s his role in shaping the policy of the State Department in its overseas building program and his role in securing major commissions for favored architects such as I M Pei Equally important is Clausen s discussion of Belluschi s role in the development of regionalism in the Pacific Northwest

and its impact on the definition of modernism as it was emerging in the United States *The Urban Design Reader* Michael Larice, Elizabeth Macdonald, 2013-05-07 The second edition of *The Urban Design Reader* draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design Nearly 50 generous selections include seminal contributions from Howard Le Corbusier Lynch and Jacobs to more recent writings by Waldheim Koolhaas and Sorkin Following the widespread success of the first edition of *The Urban Design Reader* this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that address the myriad challenges facing designers today The six part structure of the second edition guides the reader through the history theory and practice of urban design The reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places These selections are largely describing the outcomes of mid century urban design and voicing concerns over the placeless quality of contemporary urbanism The fourth part of the Reader explores key issues in urban design and development Ideas about sprawl density community health public space and everyday life are the primary focus here Several new selections in this part of the book also highlight important international development trends in the Middle East and China Part Five presents environmental challenges faced by the built environment professions today including recent material on landscape urbanism sustainability and urban resiliency The final part examines professional practice and current debates in the field where urban designers work what they do their roles their fields of knowledge and their educational development The section concludes with several position pieces and debates on the future of urban design practice This book provides an essential resource for students and practitioners of urban design drawing together important but widely dispersed writings Part and section introductions are provided to assist readers in understanding the context of the material summary messages impacts of the writing and how they fit into the larger picture of the urban design field
