## **Contemporary Caribbean Cultures And Societies In A Global Context:**

**Contemporary Caribbean Cultures and Societies in a Global Context** Franklin W. Knight, Teresita Martínez Vergne, 2005 Caribbean peoples have a long history of connections often painful ones with people from all over the globe and especially from European colonial nations and the United States Since the advent of globalization the name given to the unprecedented multidirectional transfer of products people and ideas over the past several decades the region's struggle to articulate its own identity has sharpened In addition say Knight and Martínez Vergne scholars and policy makers of the Caribbean feel an increasing urgency to redefine the terms of their analyses of the region This multidisciplinary collection of ten essays commissioned expressly for this book is aimed at identifying and illuminating important social and cultural aspects of the Caribbean region as its peoples and nations navigate the global context that increasingly inscribes their future The volume takes a twofold approach First it provides case studies that illuminate important phenomena especially sensitive to globalization the influence and diffusion of currents of thought ideology and culture for example or the movements of goods and populations in a world market Second it provides a measure of and model for new scholarship on the region The contributions range from an economist's view of the challenge to Caribbean economies in the era of globalization to a cultural critic's assessment of creolization in Havana from a sociologist's analysis of the relationship between nationalism and race in Puerto Rican boxing to a cultural historian's study of identity as manifested in Jamaican reggae Throughout the volume is focused on highlighting the regional manifestations of forces resulting from globalization the growing agency of the Caribbean peoples in the modern world and the delicate balance between homogeneity and difference among residents of the region

**Contemporary Caribbean Cultures and Societies in a Global Context** Franklin W. Knight, Teresita Martínez-Vergne, 2006-05-18 The Caribbean ranks among the earliest and most completely globalized regions in the world From the first moment Europeans set foot on the islands to the present products people and ideas have made their way back and forth between the region and other parts of the globe with unequal but inexorable force An inventory of some of these unprecedented multidirectional exchanges this volume provides a measure of as well as a model for new scholarship on globalization in the region Ten essays by leading scholars in the field of Caribbean studies identify and illuminate important social and cultural aspects of the region as it seeks to maintain its own identity against the unrelenting pressures of globalization These essays examine cultural phenomena in their creolized forms from sports and religion to music and drink as well as the Caribbean manifestations of more universal trends from racial inequality and feminist activism to indebtedness and economic uncertainty Throughout the volume points to the contending forces of homogeneity and differentiation that define globalization and highlights the growing agency of the Caribbean peoples in the modern world Contributors Antonio Benítez Rojo 1931 2004 Alex Dupuy Wesleyan University Juan Flores City University of New York Graduate Center Jorge L Giovannetti University of Puerto Rico Aline Helg University of Geneva Franklin W Knight The Johns Hopkins University

Blouet,2007-04-16 When Americans seek an escape from the worries and dilemmas of everyday life the crystal blue waters and white sands of the Caribbean islands seem like the answer to a prayer Yet this image of a tourist s paradise hides a tumultuous history marked by strife and division over race political power and economic inequality Olwyn Blouet explores the story of the Caribbean over the last 50 years revealing it to be a region positioned at the heart of some the most prominent geopolitical issues of modern times Navigating a rich m lange of cultures and histories Blouet unearths a complex narrative that is frequently overlooked in histories of the Americas In stark contrast to widely read guidebooks this chronicle unflinchingly probes two strikingly different worlds in the Caribbean islands those of the haves and the have nots created by the volatile mixture of colonial politics racial segregation and economic upheaval The strategic political relations between Caribbean nations Cuba in particular and the world powers during the Cold War the economic transformations instigated by tourism and the modernizing efforts of Caribbean nations in order to meet the demands of a globalizing twenty first century market are among the numerous issues explored by Blouet in her efforts to redress the historical record s imbalance The Contemporary Caribbean also explores the proud histories of the region s many nations in sports such as cricket and baseball as well as their famed cuisines and the uneasy balance today between local traditions and the vestiges of colonial influence

**Méthod(e)s** Jean-Bernard Ouédraogo, 2021-08-09 The bilingual French English journal *Méthod(e)s* founded in 2015 is an African initiative with the objective to enlarge the methodological debates on the Global South The desire for a strong understanding of methodology is to situate it above academic trends thereby placing it in line with a universal history of the sciences Just as calling dominant paradigms into question leaves room for creative opportunities so does the comparison of theoretical approaches and technical models of data collection Questions related to methods are not purely technical or merely philosophical reflections The examination of the method used in scientific investigations necessarily leads us to question the validity and consequences of research results From this point of view the journal *Méthod(e)s* is not a forum for simple discussions on the mechanics of research but a tool to question social interests influencing academic research and giving it a political function It is also intended to lead to a more critical look at the creation of theories dealing with the status of individuals and societies in Africa and the Global South *Méthod(e)s* aims to bring into question connect and compare the theoretical technical and political foundations of the social sciences as applied to human societies Each contribution is followed by a summary in the respectively other language In order to ensure a broad intellectual reach the editors reserve the right to include articles written in other languages All the abstracts of the papers are also available in Arabic Chinese and Spanish

**Glocalization** Victor Roudometof, 2016-06-10 This book seeks to provide a critical introduction to the under theorized concept of Glocalization While the term has been slowly diffused into social scientific vocabulary to date there is no book in circulation that specifically discusses this concept Historically theorists have intertwined the concepts of the global and the glocal or have subsumed the glocal under other concepts such as cosmopolitanization Moreover theorists have failed to give local due attention in their theorizing The book argues that the terms global the local and the glocal are in need of unambiguous and theoretically and methodologically sound definitions This is a prerequisite for their effective operationalization and application into social research Glocalization is structured in two parts Part I introduces the term seeking to provide a history and critical assessment of theorists past use of glocalization and offering an alternative

perspective and a clear effective and applicable definition of the term explaining the limitations of the term globalization and the value of defining glocalization Part II then moves on to illustrate how the concept of glocalization can be used to broaden our understanding and analysis of a wide range of issues in world politics including the 21st century culture of consumption transnationalism cosmopolitanism nationalism and religious traditions Utilizing a wide range of historical ethnographic and real life examples from various domains this work will be essential reading for students and scholars of Globalization and will be of great interest to those in the field of Global Transnational and Cosmopolitan Studies
