*Contemporary Cathedrals* Robert W. Collier, 1975      **Changing Social Geography of Canadian Cities** Larry S. Bourne, David F. Ley, 1993-04-19 The contributors to this volume demonstrate the richness and diversity of the social landscapes and communities in Canadian urban centres emphasizing changes which occurred in the period from the mid 1960s to the early 1990s The nineteen non technical and integrative essays include reviews of the literature empirical studies and discussions of policy issues CONTENTS Introduction The Social Context and Diversity of Urban Canada David F Ley and Larry S Bourne Part One Patterns People and Place in Urban Canada Evolving Urban Landscapes D W Holdsworth Measuring the Social Ecology of Cities W K D Davies and R A Murdie Demography Living Arrangement and Residential Geography J R Miron Urban Social Behaviour in Time and Space D G Janelle Part Two Contexts Social Structure and Urban Space Migration Mobility and Population Redistribution E G Moore and M W Rosenberg The Emerging Ethnocultural Mosaic S H Olson and A L Kobayashi Work Labour Markets and Households in Transition D Rose and P Villeneuve Housing Markets Community Development and Neighbourhood Change Larry S Bourne and T Bunting Part Three Places Selected Locales Integrating Production and Consumption Industry Class Ethnicity and the Jews of Toronto D Hiebert Past Elites and Present Gentry Neighbourhoods of Privilege in the Inner City David F Ley From Periphery to Centre The Changing Geography of the Suburbs L J Evenden and G E Walker The Social Geography of Small Towns J C Everitt and A M Gill Part Four Needs Social Well being and Public Policy Social Planning and the Welfare State J T Lemon The Meaning of Home Home Ownership and Public Policy R Harris and G J Pratt Homelessness M J Dear and J Wolch Geography of Urban Health S M Taylor Changing Access to Public and Private Services Non family Childcare S Mackenzie and M Truelove Cities as a Social Responsibility Planning and Urban Form P J Smith and P W Moore      **A Social Geography of Canada** Guy M. Robinson, 2013-12-30 This collection of essays focus on subjects which formed the basis of his life s work the changing character of Canadian landscape and society and the urbanization of that society including aspects of its historical evolution its present spacial forms and current social issues      **The Modern Urban Landscape** E. C. Relph, 1987-08 Why do the cities of the late twentieth century look as they do What values do their appearance express and enfold Their sheer scale and the durability of their materials assure that our cities will inform future generations about our era in the same way that gothic cathedrals and medieval squares tell us something of the Middle Ages In the meantime our urban landscapes can tell us much about ourselves For E C Relph the urban landscape must be envisioned as a total environment not just streets and buildings but billboards and parking meters as well The Modern Urban Landscape traces the developments since 1880 in architecture technology planning and society that have formed the visual context of daily life Each of these shaping influences is often viewed in isolation but Relph surveys the ways in which they have operated independently to create what we see when we walk down a street shop in a mall or stare through a windshield on an expressway Two sets of ideas and fashions Relph argues have had

an especially important impact on urban landscapes in the twentieth century An internationalism made possible by new building technologies and more rapid communications has replaced regional style and custom as the dominant feature of city appearance while a firm belief in the merits of self consciousness has imposed logical analysis and technical manipulation on such commonplace objects as curbstones and park benches As a result writes Relph the modern urban landscape is both rationalized and artificial which is another way of saying that it is intensely human      *Planning Twentieth Century Capital Cities* David Gordon,2006-09-27 This book examines the plans for sixteen important capital cities around the world each with its own fully illustrated chapter written by an expert on the urban development of that city      *The Modern Urban Landscape (Routledge Revivals)* Edward Relph,2016-04-06 First published in 1987 this book provides a wide ranging account of how modern cities have come to look as they do differing radically from their predecessors in their scale style details and meanings It uses many illustrations and examples to explore the origins and development of specific landscape features More generally it traces the interconnected changes which have occurred in architecture and aesthetic fashions in planning in economic and social conditions and which together have created the landscape that now prevails in most of the cities of the world This book will be of interest to students of architecture urban studies and geography      **Building Cities that Work** Edmund P. Fowler,1993 Since 1945 North Americans have spent hundreds of billions of dollars on urban development literally transforming the landscape of the continent This development has been disastrous Edmund Fowler maintains because it is inordinately expensive destructive of the environment and disruptive of healthy social life and authentic politics Revealing the connections between our basic cultural beliefs and why we build the way we do he stresses that to build cities that work we must become aware of how our personal choices contribute to the form of the built environment      **Art Et Architecture Au Canada** Loren Ruth Lerner,Mary F. Williamson,1991-01-01 Identifies and summarizes thousands of books article exhibition catalogues government publications and theses published in many countries and in several languages from the early nineteenth century to 1981      Reconstructing Urban Regime Theory Mickey Lauria,1997 Providing a robust conceptual framework urban regime theory has despite its cited shortcomings gained a dominant position in the literature on local politics in addition to its recent use in contexts outside the United States and in comparative cross national research Reconstructing Urban Regime Theory presents a challenging argument for the need to reconceptualize urban regime s middle level abstractions by interpreting it through the higher level abstractions of regulationist theory The contributors propose stronger conceptual linkages between local agents and institutions regime transformation and the restructuring of urban space The blend of empirical and case study provides an excellent mix of theory and practice      *Canadian Cities in Transition* Trudi E. Bunting,Pierre Filion,2006 This collection of articles includes the work of newer younger urban scholars There are new chapters on Canadian perspectives on globalization and world city growth immigration and urban change and many extensively re written chapters from the previous edition      *Cities of Oil* Timothy Cobban,2014-01-31 Cities of Oil is

the first sustained historical account of the development of the early Canadian petroleum refining and manufacturing industry In it Timothy W Cobban documents the industry s development in southern Ontario from its beginnings in the 1850s to its later expansion on the outskirts of London to Petrolia and finally to Sarnia He accounts for all of the industry s important developments and innovations particularly the role played by municipalities in fostering its growth Using extensive archival research Cobban concludes that municipalities can stimulate the accelerated sustained development of local industry sectors thus challenging the dominant view that the influence of municipalities on economic growth is marginal Cities of Oil demonstrates the importance of accommodating the land and infrastructure needs of industry at critical junctures and implementing land use policies that encourage the dense clustering of industries This book will be essential reading for those seeking a greater understanding of industrial growth in the province of Ontario     The Way to Go ,1983 This publication examines a variety of cases that demonstrate the aesthetic quality of transportation projects These range from the relatively inexpensive painted Gus Bus in Grand Rapids to the large scale project of designing the Montreal Metro The purpose is to develop a fresh perspective on ways the visual appeal of transportation can be identified as a distinct element for consideration and on the degree to which quality design contributes to the economics and function of transportation systems A second purpose is to develop guidance and examples to assist transportation planners and citizens in dealing with these issues The projects presented represent a wide range of costs and circumstances encountered in transportation planning The study shows that the aesthetic benefits provided by quality materials sensitive design careful maintenance and appropriate inclusion of works of art translate directly into increased patronage cost efficiencies and a better public environment     **Displacing Blackness** Ted Rutland,2018-01-01 While focused on twentieth century Halifax Displacing Blackness develops broad insights about the possibilities and limitations of modern planning Drawing connections between the history of planning and emerging scholarship in Black Studies Ted Rutland positions anti blackness at the heart of contemporary city making     At the Wilderness Edge J.I. Little,2019-02-28 Vancouver prides itself on being a green city and the west coast is known for its active environmental protest culture But the roots of this mentality reach far beyond the founding of organizations such as Greenpeace Small campaigns led by local community groups from the 1960s onward left a lasting impact on the region At the Wilderness Edge examines five antidevelopment campaigns in and around Vancouver that reflected a dramatic decline in public support for large scale commercial and industrial projects J I Little describes the highly effective protests that were instrumental in preserving threatened green spaces on Coal Harbour Hollyburn Ridge Bowen Island Gambier Island and the Squamish estuary keeping these important British Columbia landmarks from becoming a high rise development project a downhill ski resort a suburban housing tract an open pit copper mine and a major coal port respectively Through detailed analysis of development proposals and protests government studies and community responses Little argues that it was not the usual suspects 1960s radicalism and anti establishment youth culture that initiated and

carried out these protests but rather middle aged middle class politically engaged citizens many of whom were women An engaging study of grassroots politics in action At the Wilderness Edge sheds new light on the rise of environmental consciousness a pivotal era in the history of British Columbia the Pacific Northwest and Canada [Directory of Canadian Urban Information Sources](#) ,1975 *Canadiana* ,1975 **Current Geographical Publications** American Geographical Society of New York,University of Wisconsin--Milwaukee.
