Diversifying Retail and Distribution in Thailand Endo Gen, 2013-03-01 The entry of transnational retailers into emerging markets inevitably disrupts the existing retail and distribution structures Thailand experienced such disruption to its traditional retailing system beginning in 1990 and continuing through the following two decades to the extent that many observers have called it a revolution But the term revolution is a misnomer according to this study The new retail and distribution formats rather than replacing traditional markets have continued to exist alongside them In addition Thailand's retail and distribution industries are heading toward diversification rather than uniformity the latter phenomenon being generally associated with the advance of multinational corporations Endo analyzes Thailand's retail structure in the light of its entire distribution system examining how changes have affected not only horizontal competitive relationships between modern and traditional retailers but also vertical relationships with manufacturers and wholesalers Rather than focusing narrowly on the urban middle class consumer market he considers the markets income differentials the mosaic structure which is an indispensable framework for discussing the retail and consumption practices of an emerging economy The book presents a thoroughgoing and positive analysis well grounded in Thailand's historical context Studies on the advance of transnational retailers into emerging markets have recently flourished most of which aim to clarify the internationalization of retail from a commercial science perspective by concentrating on the transnational retailers activities In this book greater attention is given to the particular circumstances of the host countries retail and distribution systems and consumer markets Using a comparative business history approach to a single country this research contributes significantly to our understanding of retail and distribution systems in emerging markets globally Highlights A thoroughgoing and positive analysis of Thailand's current retail and distribution system Presents data using more than 40 tables Views the current situation within its historical context Uses a broad perspective of the consumer market based on income differentials a mosaic structure
