timely and relevant issues of International Humanitarian Law These range from starvation as a method of warfare to emerging technologies of warfare and also includes reflections on humanitarian assistance Lastly the volume concludes with the Year in Review describing the most important armed conflict related events and legal developments that took place in 2020 The Yearbook of International Humanitarian Law is a leading annual publication devoted to the study of international humanitarian law It provides a truly international forum for high quality peer reviewed academic articles focusing on this crucial branch of international law Distinguished by contemporary relevance the Yearbook of International Humanitarian Law bridges the gap between theory and practice and serves as a useful reference tool for scholars practitioners military personnel civil servants diplomats human rights workers and students

Larsen,2008-10-29 This edited volume explores stability security transition and reconstruction operations SSTR highlighting the challenges and opportunities they create for the US Navy The book argues that SSTR operations are challenging because they create new missions and basing modes and signal a return to traditional naval methods of operation Mission accomplishment requires collaboration with a wide range of actors representing governmental non governmental and commercial organizations which often creates politically and bureaucratically charged issues for those involved However although from a traditional warfighting perspective stability operations might be viewed as having little to do with preparing for high intensity conventional combat these kinds of operations in fact correspond to traditional missions related to diplomacy engagement maritime domain awareness piracy and smuggling and intervention to quell civil disturbances SSTR operations can be therefore depicted as a return to traditional naval operations albeit operations that might not be universally welcomed in all quarters

### **Killing in a Gray**

**Area between Humanitarian Law and Human Rights** Jan Römer,2010-01-12 Armed forces can be confronted with the problem of correctly classifying a targeted group as one that is or is not party to an armed conflict In particular this happens in a context of a high level of violence where a non international armed conflict is likely occurring at the same time such as in Iraq Afghanistan Brazil or Mexico The difficulty of qualifying the targeted group leads to a legal uncertainty in which it is unclear whether an operation is governed by international humanitarian law or the international law of human rights The

problem is of particular interest when lethal force is resorted to as killing might be illegal under one of the two branches. The book attempts to provide guidance on how this uncertainty can be overcome. In order to do so, the requirements to kill under IHL and human rights law are analyzed and compared as well as assessed in concrete operations of the National Police of Colombia who face this problem on a regular basis.
