Rahayu,2004-01-01 The era of web technology has enabled information and application sharing through the Internet The large amount of information on the Internet the large number of users and the complexity of the application and information types have introduced new areas whereby these issues are explored and addressed *Database and Expert Systems Applications* Abdelkader Hameurlain,Rosine Cicchetti,Roland Traunmüller,2003-08-02 th 2002 DEXA the 13 International Conference on Database and Expert Systems Applications was held on September 2 6 2002 at the Universit Aix Marseille II France The quickly growing field of information systems required the establishment of more specialized discussion platforms the DaWaK conference EC Web conference eGOV conference and DEXA workshops and there were held in parallel with DEXA also in Aix en Provence The resulting book was prepared with great effort Starting with the preparation of submitted papers the papers went through the reviewing process The accepted papers were revised to final versions by their authors and arranged to the conference program This year 241 papers were submitted and our thanks go to all who have contributed The program committee and the supporting reviewers produced altogether about 730 referee reports on average three reports per paper and selected 89 papers for presentation The papers presented here encompass the extensive domain of databases together with the other conferences and workshops of the DEXA event cluster a vast part of applied computer science was covered In this way DEXA has blazed the trail At this point we would like to acknowledge to all institutions which actively supported this conference and made it possible These are IUT Universit Aix Marseille II FAW DEXA Association the Austrian Computer Society and Microsoft Research *Advances in Data Mining: Applications and Theoretical Aspects* Petra Perner,2013-07-11 This book constitutes the refereed proceedings of the 13th Industrial Conference on Data Mining ICDM 2013 held in New York NY in July 2013 The 22 revised full papers presented were carefully reviewed and selected from 112 submissions The topics range from theoretical aspects of data mining to applications of data mining such as in multimedia data in marketing finance and telecommunication in medicine and agriculture and in process control industry and society

Intelligent Exploration of the Web Piotr S. Szczepaniak,Javier Segovia,Lotfi A. Zadeh,2012-11-08 The Web is the nervous system of information society As such it has a pervasive influence on our daily lives And yet in some ways the Web does not have a high MIQ Machine IQ What can be done to enhance it This is the leitmotif of Intelligent Exploration of the Web IEW a collection of articles co edited by Drs Szczepaniak Segovia Kacprzyk and to a small degree myself The articles that comprise IEW address many basic problems ranging from structure analysis of Internet documents and Web dialogue management to intelligent Web agents for extraction of information and bootstrapping an ontology based information extraction system Among the basic problems one that stands out in importance is the problem of search Existing search engines have many remarkable capabilities But what is not among them is the deduction capability the capability to answer a query by drawing on information which resides in various parts of the knowledge base An example of a query might be How many Ph D degrees in computer science were granted by European universities in 1996 No existing search engine is capable of dealing with

queries of comparable or even much lower complexity Basically what we would like to do is to add deduction capability to a search engine with the aim of transforming it into a question answering system or a QI A system for short This is a problem that is of major importance and a challenge that is hard to meet Web Information Systems - WISE 2006 Karl Aberer,2006-10-10 This book constitutes the proceedings of the 7th International Conference on Web Information Systems Engineering WISE 2006 held in Wuhan China in October 2006 The 37 revised full papers and 17 revised short papers presented together with three invited lectures were carefully reviewed and selected from 183 submissions *Inclusive Design Guidelines for HCI* Collette Nicolle,Julio Abascal,2001-06-28 The elderly population is growing and disabilities tend to increase with age Professionals in the field of human computer interaction HCI are becoming increasingly aware of the needs of the elderly and people with disabilities They also need to ensure that systems are designed for all with specific consideration of these groups not only computing systems but also other assistive and adaptive technologies such as information services and the use of smart cards assistive robotics systems for travellers and home and environmental control systems Designers need to monitor the latest developments in the design of HCI and to appreciate their impact on accessibility and usability **Physically Based Rendering, fourth edition** Matt Pharr,Wenzel Jakob,Greg Humphreys,2023-03-28 A comprehensive update of the leading edge computer graphics textbook that sets the standard for physically based rendering in the industry and the field with new material on GPU ray tracing Photorealistic computer graphics are ubiquitous in today s world widely used in movies and video games as well as product design and architecture Physically based approaches to rendering where an accurate modeling of the physics of light scattering is at the heart of image synthesis offer both visual realism and predictability Now in a comprehensively updated new edition this best selling computer graphics textbook sets the standard for physically based rendering in the industry and the field Physically Based Rendering describes both the mathematical theory behind a modern photorealistic rendering system as well as its practical implementation A method known as literate programming combines human readable documentation and source code into a single reference that is specifically designed to aid comprehension The book s leading edge algorithms software and ideas including new material on GPU ray tracing equip the reader to design and employ a full featured rendering system capable of creating stunning imagery This essential text represents the future of real time graphics Detailed and rigorous but accessible approach guides readers all the way from theory to practical software implementation Fourth edition features new chapter on GPU ray tracing essential for game developers The premier reference for professionals learning about and working in the field Won its authors a 2014 Academy Award for Scientific and Technical Achievement Includes a companion site complete with source code *Web Document Analysis* Apostolos Antonacopoulos,Jianying Hu,2003 This book provides the first comprehensive look at the emerging field of web document analysis It sets the scene in this new field by combining state of the art reviews of challenges and opportunities with research papers by leading researchers Readers will find in depth
