synthesize and distill the latest research and practice guidelines to create these timely topic based reviews      **The Kelalis--King--Belman Textbook of Clinical Pediatric Urology** Steven G. Docimo,Douglas Canning,Antoine Khoury,Joao Luiz Pippi Salle,2018-09-03 The sixth edition of The Kelalis King Belman Textbook of Clinical Pediatric Urology presents state of the art knowledge and common sense practice in all areas of clinical pediatric urology in a single easily accessible volume Clinical in orientation and practical in presentation it covers every disorder and disease diagnostic method and appropriate treatment in pediatric urology from the embryo onwards Widely acknowledged as the leading reference in the field the book is essential reading for all practitioners who deal with urological disorders of childhood whether trainees residents or experienced specialists The book begins with chapters on evaluating the patient and general principles of pediatric urology including the use of advanced diagnostic imaging techniques and the increasing importance of minimally invasive surgical techniques It then proceeds through the entire urinary tract from adrenal gland to external genitalia discussing anatomy normal and abnormal development anomalies and diseases and their treatment      *Pediatric Endocrinology* Fima Lifshitz,2013-12-19 Celebrating more than twenty years as the single best source in the field this Fifth Edition has now expanded into two cornerstone volumes with 53 fully inclusive chapters and 73 renowned contributors that comprehensively address every topic and trend relevant to the identification diagnosis and management of endocrine and endocrine related disorders      Exploring Cancer Metabolic Reprogramming through Molecular Imaging Franca Podo,Zaver M. Bhujwala,Egidio Iorio,2017-07-27 The inclusion of oncogene driven reprogramming of energy metabolism within the list of cancer hallmarks Hanahan and Weinberg Cell 2000 2011 has provided major impetus to further investigate the existence of a much wider metabolic rewiring in cancer cells which not only includes deregulated cellular bioenergetics but also encompasses multiple links with a more comprehensive network of altered biochemical pathways This network is currently held responsible for redirecting carbon and phosphorus fluxes through the biosynthesis of nucleotides amino acids lipids and phospholipids and for the production of second messengers essential to cancer cells growth survival and invasiveness in the hostile tumor environment The capability to develop such a concerted rewiring of biochemical pathways is a versatile tool adopted by cancer cells to counteract the host defense and eventually resist the attack of anticancer treatments Integrated efforts elucidating key mechanisms underlying this complex cancer metabolic reprogramming have led to the identification of new signatures of malignancy that are providing a strong foundation for improving cancer diagnosis and monitoring tumor response to therapy using appropriate molecular imaging approaches In particular the recent evolution of positron emission tomography PET magnetic resonance spectroscopy MRS spectroscopic imaging MRSI functional MR imaging fMRI and optical imaging technologies combined with complementary cellular imaging approaches have created new ways to explore and monitor the effects of metabolic reprogramming in cancer at clinical and preclinical levels Thus the progress of high tech engineering and molecular imaging technologies combined with new generation genomic proteomic and phosphoproteomic

methods can significantly improve the clinical effectiveness of image based interventions in cancer and provide novel insights to design and validate new targeted therapies The Frontiers in Oncology Research Topic Exploring Cancer Metabolic Reprogramming Through Molecular Imaging focusses on current achievements challenges and needs in the application of molecular imaging methods to explore cancer metabolic reprogramming and evaluate its potential impact on clinical decisions and patient outcome A series of reviews and perspective articles along with original research contributions on humans and on preclinical models have been concertedly included in the Topic to build an open forum on perspectives present needs and future challenges of this cutting edge research area
