Cyber-Marx Nick Dyer-Witheford, 1999 In this highly readable and thought provoking work Nick Dyer Witheford assesses the relevance of Marxism in our time and demonstrates how the information age far from transcending the historic conflict between capital and its laboring subjects constitutes the latest battleground in their encounter Cyber-Marx Nick Dyer-Witheford, 1999 In this highly readable and thought provoking work Nick Dyer Witheford assesses the relevance of Marxism in our time and demonstrates how the information age far from transcending the historic conflict between capital and its laboring subjects constitutes the latest battleground in their encounter Dyer Witheford maps the dynamics of modern capitalism showing how capital depends for its operations not just on exploitation in the immediate workplace but on the continuous integration of a whole series of social sites and activities from public health and maternity to natural resource allocation and the geographical reorganization of labor power He also shows how these sites and activities may become focal points of subversion and insurgency as new means of communication vital for the smooth flow of capital also permit otherwise isolated and dispersed points of resistance to connect and combine with one another Cutting through the smokescreen of high tech propaganda Dyer Witheford predicts the advent of a reinvented autonomist Marxism that will rediscover the possibility of a collective communist transformation of society Refuting the utopian promises of the information revolution he discloses the real potentialities for a new social order in the form of a twenty first century communism based on the common sharing of wealth **Revitalizing Marxist Theory for Today's Capitalism** Paul Zarembka, Radhika Desai, 2011-11-07 Amidst a capitalist crisis that has upturned mainstream orthodoxies this title underscores the importance of historical and materialist understandings of capitalist economies It exposes the limitations of neoclassical economics endogenous growth theory and how it in fact gropes for understandings well established within Marxism **The Handbook of Media and Mass Communication Theory, 2 Volume Set** Robert S. Fortner, P. Mark Fackler, 2014-05-05 The Handbook of Media and Mass Communication Theory presents a comprehensive collection of original essays that focus on all aspects of current and classic theories and practices relating to media and mass communication Focuses on all aspects of current and classic theories and practices relating to media and mass communication Includes essays from a variety of global contexts from Asia and the Middle East to the Americas Gives niche theories new life in several essays that use them to illuminate their application in specific contexts Features coverage of a wide variety of theoretical perspectives Pays close attention to the use of theory in understanding new communication contexts such as social media 2 Volumes **Cybernetic Capitalism** Jan Overwijk, 2025-01-07 This book offers a conceptual interrogation of how capital navigates its cybernetic environment Taking an immanent perspective the book develops a unique synthesis between Niklas Luhmann's systems theory and the critical theory tradition Overwijk shows how neoliberal capitalism's version of rationalization depends on the organization and management of society on the basis of cybernetic

principles Overwijk seeks to update earlier critiques of cybernetic capitalism that stressed the system's colonization of its environment its making the entirety of social life communicable Under today's cybernetic rationalization things are radically different Neoliberal political economy aims to incite the incalculability of the market platform capitalists venture to capitalize on the unpredictable efforts of their users and post Fordist management seeks to encourage the creativity of service workers As this book uniquely shows capital no longer aims at total communicability but instead seeks to provoke and exploit the incommunicability of its environment In this sense it offers an ecological theory of capitalism laying conceptual the groundwork for understanding the extractivist logic of the Anthropocene Cybernetic Capitalism shows how the cultural obsession with incommunicability that animates cybernetic rationalization has taken an irrationalist turn resurfacing in the mysticism of conspiracy theory and radical right politics The book offers a novel and compelling materialist interpretation of today's paradoxical connections between neoliberal rationalism and radical right irrationalism Capitalism, Citizenship and the Arts of Thinking Kathryn Dean, 2014-03-26 Capitalism Citizenship and the Arts of Thinking proposes a historical materialist ethic of human flourishing understood in terms of the practice of citizenship It focuses on the ways in which capitalism's necessary mode of thinking analytical thinking impedes the nurturing of capabilities for citizenship as understood from a Marxian Aristotelian point of view It includes a systematic discussion of the Aristotelian resonances in Marx's critique of capitalism as well as an elaboration and critique of Alfred Sohn Rethel's account of the origins of analytical thinking in his book Intellectual and Manual Labor A Critique of Epistemology Dean's critique of this book draws on the language theories of Lev Vygotsky Alexander Luria Jack Goody Eric Havelock and Walter Ong so as to identify the origins of analytical thinking in literacy rather than in monetised exchange relations as claimed by Sohn Rethel Having traced the development of analytical thinking so as to bring out the ways in which this thinking was a condition of possibility for the division of head and hand in nineteenth century England Dean brings the analysis into the contemporary world by examining the changes effected by digitalised communication in terms citizenship capabilities now drawing on the work of Michael Hardt and Antonio Negri in order to do so The book's ground breaking content is in the fusion of Marxian Aristotelian and linguistic elements to develop a critique of capitalism's hegemonic mode of thinking analytical thinking as manifested in the modern sciences and to show how the draining of intelligibility from the everyday world permitted by this thinking becomes an obstacle to the practice of meaningful citizenship Its main appeal will be to Marxist thinkers whose main concern is with the alienating as opposed to exploitative character of capitalist modes of life It is written to complement the work of such Marxists these being in the main writers such as Michael Hardt and Antonio Negri and is pitched at researchers in the field It could be used on post graduate courses in political theory as well as social and cultural theory **The Wiley-Blackwell Companion to Major Social Theorists** George Ritzer, Jeffrey Stepnisky, 2011-03-31 Reflecting emerging research and ongoing reassessments of social theory The Wiley Blackwell Companion to Major Social Theorists offers significant updates

and revisions to the original Blackwell Companion published a decade ago Volume 1 Features updates and revisions to all essays from original volume plus the addition of 11 new authors Includes six new essays featuring coverage of theorists not included in original volume Ibn Khaldun de Tocqueville Schumpeter Mannheim Veblen and Adorno Supplemented with comprehensive bibliographies on primary and secondary sources with a brief reader's guide accompanying each essay Addresses continuing relevance of most theories and their importance to contemporary scholarship Volume 2 Features updates and revisions to all essays from original volume plus the addition of 16 new authors Includes 11 new essays featuring coverage of theorists not included in original volume including Deleuze Bauman Smith Luhmann Agamben and others Supplemented with comprehensive bibliographies on primary and secondary sources with a brief reader's guide accompanying each essay Essays placed in social and historical context to allow readers to see how theorists have responded to pressing contemporary social and political issues

Literature and the Creative Economy Sarah Brouillette, 2014-04-15 This book contends that mainstream considerations of the economic and social force of culture including theories of the creative class and of cognitive and immaterial labor are indebted to historic conceptions of the art of literary authorship It shows how contemporary literature has been involved in and has responded to creative economy phenomena including the presentation of artists as models of contentedly flexible and self managed work the treatment of training in and exposure to art as a pathway to social inclusion the use of culture and cultural institutions to increase property values and support for cultural diversity as a means of growing cultural markets Contemporary writers have tended to explore how their own critical capacities have become compatible with or even essential to a neoliberal economy that has embraced art's autonomous gestures as proof that authentic self articulation and social engagement can and should occur within capitalism Taking a sociological approach to literary criticism Sarah Brouillette interprets major works of contemporary fiction by Monica Ali Aravind Adiga Daljit Nagra and Ian McEwan alongside government policy social science and theoretical explorations of creative work and immaterial labor

Unruly Equality Andrew Cornell, 2016-01-13 In this highly accessible social and intellectual history of American anarchism in the United States Andrew Cornell reveals an amazing continuity and development across the twentieth century Far from fading away anarchists dealt with major events such as the rise of Communism the New Deal atomic warfare the black freedom struggle and a succession of artistic avant gardes stretching from 1915 to 1975 This book traces U S anarchism as it evolved from the creed of poor immigrants militantly opposed to capitalism early in the twentieth century to one that today sees resurgent appeal among middle class youth and foregrounds ecology feminism and opposition to cultural alienation Provided by publisher

Biesecker, John Louis Lucaites, 2009 *Rhetoric Materiality and Politics* explores the relationship between rhetoric's materiality and the social world in the late modern political context Taking as their point of departure a reprint of Michael Calvin McGee's 1982 call to reconceptualize rhetoric as the palpable experience of sociality the authors in this volume grapple anew with

the role of communication practices in contemporary collective life Drawing upon the work of Michel Foucault Jacques Lacan and Jacques Derrida these twelve original essays supplement extend and challenge McGee s position collectively advocating on behalf of a shift in theoretical and critical attention from rhetorical materialism to rhetoric s materiality Book Jacket

Teacher Power in the Digital Age Matt Reichel,2025-07-11 This book is an examination of the confluence of social political and communicative forces animating recent teachers uprisings beginning with the accession of a militant slate to the Chicago Teachers Union CTU in 2011 and continuing with myriad strikes walkouts and other protest actions taken throughout the country since then During this time thousands of teachers have participated in protest actions in dozens of states and jurisdictions throughout the country thus ending a lengthy period of relative dormancy on the part of teachers unions as a political organizing force This movement is situated amongst the other digitally enabled movements of the squares that have occurred in recent years including the Occupy movement and the Arab Spring which all emerge out of the ongoing crisis of neoliberal capitalism though this book argues that the teachers movement has been central to this wave of contestation due its institutional grounding This book will be of interest to readers with a background in Political Sociology Education Policy Political Communication and related fields

Social Transformation and the Global Economy Ronaldo Munck,2024-06-28 The overall context of this book is set by the decline of the globalization paradigm s ability to grasp the complexity and uncertainty of the current era It takes a new approach based on the frame of transformation viewed as a catalyst to understand the complex interconnected nature of the world around us from a concrete grounded perspective Labour or work is still what makes the world go round and Latin America offers a unique laboratory of social transformation since the pink tide of the 2000s The left it refers to is a new non dogmatic version that does not just recycle old debates but rather opens up new perspectives The book is at once global in its ambition while grounded in labour and Latin American realities Theoretically based and empirically robust it will enthuse the reader to pursue their own research on matters covered here Part I deals with several key debates around labour including the emergence of a precariat from a standpoint that foregrounds labour agency but also the view from the South that is the majority world Part II takes up various debates around contemporary Latin America from a cultural political economy perspective with an emphasis on the dynamics of social transformation Part III explores the contributions from the broadly defined left towards an understanding

The Commons Vangelis Papadimitropoulos,2020-10-20 This book explores the potential creation of a broader collaborative economy through commons based peer production P2P and the emergent role of information and communication technologies ICTs The book seeks to critically engage in the political discussion of commons based peer production which can be classified into three basic arguments the liberal the reformist and the anti capitalist This book categorises the liberal argument as being in favour of the coexistence of the commons with the market and the state Reformists on the other hand advocate for the gradual adjustment of the state and of capitalism to the commons while anti capitalists situate the commons against capitalism and the state By discussing these three viewpoints the book contributes to contemporary debates concerning the future of commons based peer production Further the author argues that for the commons to become a fully operational mode of peer production it needs to reach critical mass arguing that the liberal argument underestimates the reformist insight that technology has the potential to decentralise production thereby forcing capitalism to transition to post capitalism Surveying the three main strands of commons based peer production this book makes the case for a post capitalist commons orientated transition that moves beyond neoliberalism

Constructing East Asia Aaron Stephen Moore,2013-06-19 The conventional understanding of Japanese wartime ideology has for years been summed up by just a few words anti modern spiritualist and irrational Yet such a cut and dried picture is not at all reflective of the principles that guided national policy from 1931 1945 Challenging the status quo Constructing East Asia examines how Japanese intellectuals bureaucrats and engineers used technology as a system of power and mobilization what historian Aaron Moore terms a technological imaginary to rally people in Japan and its expanding empire By analyzing how these different actors defined technology in public discourse national policies and large scale infrastructure projects Moore reveals wartime elites as far more calculated in thought and action than previous scholarship allows Moreover Moore positions the wartime origins of technology deployment as an essential part of the country s national policy and identity upending another predominant narrative namely that technology did not play a modernizing role in Japan until the economic miracle of the postwar years
