

Cyberspace Law: Cases and Materials (Aspen Casebook)

Description :

Written by the Director for the newly created Center for Cyberspace Law & Policy at Case Western Reserve University, the Fourth Edition of Cyberspace Law: Cases and Materials reflects the broad knowledge and experience of a pioneer in the teaching of Cyberspace law. This was the first casebook devoted exclusively to the study of cyberspace law, and is the only one that presents it as the study of the creation, dissemination, and acquisition of human thought, creativity, and information in the digital age. Of note is the casebook's organization, which allows instructors to adapt the materials to their approaches. Features: The Supreme Court's recent decisions in J. McIntyre v Nicaastro (jurisdiction), Brown v Entertainment Merchants (video games), ABC v Aereo (copyright), Bilski v Kappos (business method patents), and Riley v California (Smart phone privacy) Lower court cases including: Authors Guild v Google (Google books fair use), Lenz v Universal Music (DMCA notice), Fraley v Facebook (Misappropriation), and Verizon v FCC (net neutrality) Presentation of current Internet law as well as related policy concerns that will drive future legal analysis when new issues emerge

Cyberspace Law Casebook:

Computer and Cyber Law Ralph D. Clifford,1999 **Cyberlaw** Patricia L. Bellia,Paul Schiff Berman,David G. Post,2007

This edition has been reorganized to clarify the themes of the book and updated to illuminate new debates at the heart of this evolving field It groups the material into units addressing the who how and what of governance regulation fundamental questions that pertain to any legal system in cyberspace or elsewhere It includes unit ending case studies on governance of the domain name system efforts to control the exchange of counterfeit goods in the online marketplace and the Google Books Settlement as well as updated treatment of a number of topics including peer to peer file sharing online behavioral advertising and more Publisher s website **Cyberlaw** Patricia Bellia,Paul Berman,David Post,Brett Frischmann,2018-04-04

This law school casebook starts from the premise that cyberlaw is not simply a set of legal rules governing online interaction but a lens through which to re examine general problems of policy jurisprudence and culture The book goes beyond simply plugging Internet related cases into a series of doctrinal categories instead emphasizing conceptual issues that extend across the spectrum of cyberspace legal dilemmas While the book addresses all of the traditional subject matter areas of cyberlaw it asks readers to consider both how traditional legal doctrines can be applied to cyberspace conduct and how the special problems encountered in that application can teach us something about those traditional legal doctrines The fifth edition has been updated shortened and reconceptualized to make the book even more effective as a teaching tool and to illuminate new debates at the heart of this evolving field The book groups the material into units addressing the who how and what of governance regulation fundamental questions that pertain to any legal system in cyberspace or elsewhere The fifth edition also includes updated treatment throughout as well as a more stream lined approach that should make an already effective casebook even more unified and teachable **Cyberspace Law** Raymond S.
