*The Cyborg Experiments* Joanna Zylińska, 2002-06-13 The *Cyborg Experiments* analyzes the challenges posed to corporeality by technology Taking as their starting point the work of the highly influential performance artists Orlan and Stelarc the essays in this timely and important collection raise a number of questions in relation to new conceptions of embodiment identity and otherness in the age of new technologies Has the body become obsolete Does transgender challenge traditional ideas of agency Have we always been cyborgs In addition to highlighting the playful character of digital aesthetics the contributors investigate ethical issues concerning the ownership of our bodies and the experiments we perform on them In this way the book explores how humanism and ideas of the human have been placed under increasing scrutiny as a result of new developments in science media and communications Contributors John Appleby Rachel Armstrong Fred Botting Julie Clarke Gary Hall Chris Hables Gray Meredith Jones Orlan Mark Poster Jay Prosser E A Scheer Zdzisław Stelarc Scott Wilson Joanna Zylińska

Life after New Media Sarah Kember, Joanna Zylińska, 2014-12-05 An argument for a shift in understanding new media from a fascination with devices to an examination of the complex processes of mediation In *Life after New Media* Sarah Kember and Joanna Zylińska make a case for a significant shift in our understanding of new media They argue that we should move beyond our fascination with objects computers smart phones iPods Kindles to an examination of the interlocking technical social and biological processes of mediation Doing so they say reveals that life itself can be understood as mediated subject to the same processes of reproduction transformation flattening and patenting undergone by other media forms By Kember and Zylińska's account the dispersal of media and technology into our biological and social lives intensifies our entanglement with nonhuman entities Mediation all encompassing and indivisible becomes for them a key trope for understanding our being in the technological world Drawing on the work of Bergson and Derrida while displaying a rigorous playfulness toward philosophy Kember and Zylińska examine the multiple flows of mediation Importantly they also consider the ethical necessity of making a cut to any media processes in order to contain them Considering topics that range from media enacted cosmic events to the intelligent home they propose a new way of doing media studies that is simultaneously critical and creative and that performs an encounter between theory and practice

*Human Nature in an Age of Biotechnology* Tamar Sharon, 2013-10-11 New biotechnologies have propelled the question of what it means to be human or posthuman to the forefront of societal and scientific consideration This volume provides an accessible critical overview of the main approaches in the debate on posthumanism and argues that they do not adequately address the question of what it means to be human in an age of biotechnology Not because they belong to rival political camps but because they are grounded in a humanist ontology that presupposes a radical separation between human subjects and technological objects The volume offers a comprehensive mapping of posthumanist discourse divided into four broad approaches two humanist based approaches dystopic and liberal posthumanism and two non humanist approaches radical

and methodological posthumanism The author compares and contrasts these models via an exploration of key issues from human enhancement to eugenics to new configurations of biopower questioning what role technology plays in defining the boundaries of the human the subject and nature for each Building on the contributions and limitations of radical and methodological posthumanism the author develops a novel perspective mediated posthumanism that brings together insights in the philosophy of technology the sociology of biomedicine and Michel Foucault's work on ethical subject constitution In this framework technology is neither a neutral tool nor a force that alienates humanity from itself but something that is always already part of the experience of being human and subjectivity is viewed as an emergent property that is constantly being shaped and transformed by its engagements with biotechnologies Mediated posthumanism becomes a tool for identifying novel ethical modes of human experience that are richer and more multifaceted than current posthumanist perspectives allow for The book will be essential reading for students and scholars working on ethics and technology philosophy of technology poststructuralism technology and the body and medical ethics

**Arts-Based Research** Jan Jagodzinski, Jason Wallin, 2013-04-19 A provocative book an important book jagodzinski s and Wallin s betrayal is in fact a wake up call for art based research a loving critique of its directions jagodzinski s and Wallin s reference is the question what art can do not what it means Theirs is an ultimate affirmation that uncovers the singularities that compose and give consistency to art not as an object but as an event Their betrayal consists in an affirmation of life and becoming positing a performative machinics of the arts which is in absolute contraposition with the hegemonic discourse of art and as an object of knowledge and representation This does not only concern academia but also politics and ethics an untimely book that comes just at the right time Bernd Herzogenrath Goethe Universit t Frankfurt am Main Germany author of *An American Body Politic A Deleuzian Approach* and editor of *Deleuze Pedagogies Against the State* [The Scientific Imaginary in Visual Culture](#) Anneke Smelik, 2010 Popular media art and science are intricately interlinked in contemporary visual culture This book analyses the scientific imaginary that is the result of the profound effects of science upon the imagination and conversely of the imagination in and upon science As scientific developments in genetics occur and information technology and cybernetics open up new possibilities of intervention in human lives cultural theorists have explored the notion of the posthuman *The Scientific Imaginary in Visual Culture* analyses figurations of the posthu man in history and philosophy as well as in its utopian and dystopian forms in art and popular culture The authors thus address the blurring boundaries between art and science in diverse media like science fiction film futurist art video art and the new phenomenon of bio art In their evaluations of the scientific imaginary in visual culture the authors engage critically with current scientific and technological concerns [Mimetic Posthumanism](#) , 2024-10-21 It is tempting to affirm that on and about November 2022 post human character changed The revolution in A I simulations certainly calls for an update of the ancient realization that humans are imitative animals or homo mimeticus But the mimetic turn in posthuman studies is not limited to A I from simulation to identification affective contagion to viral mimesis robotics to hypermimesis the essays collected in this volume articulate the multiple facets of homo mimeticus 2 0 Challenging rationalist accounts of autonomous originality internal to the history of Homo sapiens this volume argues from different artistic philosophical technological perspectives that the all too human tendency to imitate is paradoxically central to our ongoing process of becoming posthuman [Cultures of Addiction](#) , **Corporeality, Medical Technologies and Contemporary Culture** Francisco Ortega, 2013-12-17 Corporeality Medical Technologies and Contemporary Culture engages the confusions and contradictions in current attitudes to and practices of the body *The Ethics of Cultural Studies* Joanna Zylińska, 2005-05-01 Ethical questions feature prominently on today s cultural and political agendas *The Ethics of Cultural Studies* presents an

ethical manifesto for Cultural Studies an exploration of its current ethical and political concerns and of its future challenges The book is concerned with ethics in the material world and draws on examples as diverse as cloning and genetics asylum and immigration experiments in plastic surgery and in electronic and digital art memories of the Holocaust September 11th and media representations of violence and crime The Ethics of Cultural Studies is a groundbreaking intervention that sets the debate on ethics in cultural study and offers an invaluable source of ideas for students of contemporary culture Data Made Flesh Robert Mitchell, Phillip Thurtle, 2013-02-01 In an age of cloning cyborgs and biotechnology the line between bodies and bytes seems to be disappearing Data Made Flesh is the first collection to address the increasingly important links between information and embodiment at a moment when we are routinely tempted in the words of Donna Haraway to be raptured out of the bodies that matter in the lust for information whether in the rush to complete the Human Genome Project or in the race to clone a human being **Imaginary Neighbors** Dorota Glowacka, Joanna Zylinska, 2007-01-01 Imaginary Neighbors offers a unique and significant contribution to the contemporary debate concerning Holocaust memory by exploring the most important current political topic in Poland Jewish Polish relations during and after World War II

**Monstrous Liminality** Robert G. Beghetto, 2022-01-24 This book examines the transformation of the figure of the stranger in the literature of the modern age in terms of liminality As a spectral monster that has a paradoxical and liminal relationship to both the sacred and the secular the figure of the modern stranger has played a role in both adapting and shaping a culturally determined understanding of the self and the other With the advent of modernity the stranger the monster and the spectre became interconnected Haunting the edges of reason while also being absorbed into normal society all three together with the cyborg manifest the vulnerability of an age that is fearful of the return of the repressed Yet these figures can also become reappropriated as positive symbols able to navigate between the dangerous and chaotic elements that threaten society while serving as precarious and ironic symbols of hope or sustainability The book shows the explanatory potential of focusing on the resacralizing in a paradoxical and liminal manner of traditionally sacred concepts such as messianic time and the utopian and the conflicts that emerged as a result of secularized modernity's denial of its own hybridization This approach to modern literature shows how the modern stranger a figure that is both paradoxically immersed and removed from society deals with the dangers of failing to be re-assimilated into mainstream society and is caught in a fixed or permanent state of liminality a state that can ultimately lead to boredom alienation nihilism and failure These monstrous aspects of liminality can also be rewarding in that traversing difficult and paradoxical avenues they confront both traditional and contemporary viewpoints enabling new and fresh perspectives suspended between imagination and reality past and future nature and artificial In many ways the modern stranger as a figure of literature and the cultural imagination has become more complicated and challenging in the post modern contemporary age both clashing with and encompassing people who go beyond simply the psychological or even spiritual inability to blend in and out of society

However while the stranger may be altering once again the defining or essentializing the figure could result in the creation of other sets of binaries and thereby dissolve the purpose and productiveness of both strangeness and liminality The intention of Monstrous Liminality is to trace the liminal sphere located between the secular and sacred that has characterized modernity itself This space has consequently altered the makeup of the stranger from something external into a figure far more liminal which is forced to traverse this uncanny space in an attempt to find new meanings for an age that is struggling to maintain any

*Neuroprosthetic Supersystems Architecture* Matthew E. Gladden, 2017-05-13 This volume serves a resource for the design and analysis of neuroprosthetic supersystems which can be defined as organizations either small or large simple or complex whose human members have been neuroprosthetically augmented While numerous other texts focus on the biomedical engineering of neuroprostheses as technological devices or on the biocybernetic engineering of the host device system comprising a neuroprosthesis and its

human host this volume presents a unique investigation of the intentional creation of higher order supersystems that allow multiple neuroprosthethically augmented human beings to interact with one another and with external information systems in order to accomplish some shared task In essence this can be understood as the work of designing and managing neuroprosthethically enhanced organizations Individual chapters present an ontology of the neuroprosthesis as a computing device a biocybernetic ontology of the host device system an ontology of the neuroprosthesis as an instrument of cyborgization motivating and inhibiting factors for the organizational deployment of posthumanizing neuroprostheses by military organizations and other early adopters an introduction to enterprise architecture in the context of technological posthumanization an exploration of the implications of neuroprosthetic augmentation for enterprise architecture and considerations for the development of effective network topologies for neuroprosthethically augmented organizations The conceptual frameworks formulated within this book offer a wide range of tools that can be of use to policymakers ethicists neuroprosthethic device manufacturers organizational decision makers and others who must analyze or manage the complex legal ethical and managerial implications that result from the use of emerging neuroprosthethic technologies within an organizational context

*New Directions in Sociology* Ieva Zake, Michael DeCesare, 2011-07-25 Written by the new generation of sociologists these essays chart a course for the future of the discipline both by revisiting forgotten theories and methods and by suggesting innovative theoretical and methodological approaches Comprised of seven essays on theory and five on methodology the volume also attempts to reconnect theorists and methodologists in a discussion about the future of the sociological enterprise

*Children's Literature and the Posthuman* Zoe Jaques, 2015-02-11 An investigation of identity formation in children's literature this book brings together children's literature and recent critical concerns with posthuman identity to argue that children's fiction offers sophisticated interventions into debates about what it means to be human and in particular about humanity's relationship to animals and the natural world In complicating questions of human identity ecology gender and technology Jaques engages with a multifaceted posthumanism to understand how philosophy can emerge from children's fantasy disclosing how such fantasy can build upon earlier traditions to represent complex issues of humanness to younger audiences Interrogating the place of the human through the non human whether animal or mechanical leads this book to have interpretations that radically

depart from the critical tradition which in its concerns with the socialization and representation of the child has ignored larger epistemologies of humanness The book considers canonical texts of children s literature alongside recent bestsellers and films locating texts such as Gulliver s Travels 1726 Pinocchio 1883 and the Alice books 1865 1871 as important works in the evolution of posthuman ideas This study provides radical new readings of children s literature and demonstrates that the genre offers sophisticated interventions into the nature boundaries and dominion of humanity
