Cycle Of Juvenile Justice:

The Cycle of Juvenile Justice Thomas J. Bernard, Megan C. Kurlychek, 2010-09-14 The Cycle of Juvenile Justice takes a historical look at juvenile justice policies in the United States Tracing a pattern of policies over the past 200 years the book reveals cycles of reforms advocating either lenient treatment or harsh punishments for juvenile delinquents Bernard and Kurlychek see this cycle as driven by several unchanging ideas that force us to repeat rather than learn from our history This timely new edition provides a substantial update from the original incorporating the vast policy changes from the 1990s to the present and placing these changes in their broader historical context and their place within the cycle of juvenile justice The authors provide a provocative and honest assessment of juvenile justice in the 21st century arguing that no policy can solve the problem of youth crime since it arises not from the juvenile justice system but from deeper social conditions and inequalities With this highly anticipated new edition The Cycle of Juvenile Justice will continue to provide a controversial challenging and enlightening perspective for a broad array of juvenile justice officials scholars and students alike

Reforming Juvenile Justice National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee on Assessing Juvenile Justice Reform, 2013-05-22 Adolescence is a distinct yet transient period of development between childhood and adulthood characterized by increased experimentation and risk taking a tendency to discount long term consequences and heightened sensitivity to peers and other social influences A key function of adolescence is developing an integrated sense of self including individualization separation from parents and personal identity Experimentation and novelty seeking behavior such as alcohol and drug use unsafe sex and reckless driving are thought to serve a number of adaptive functions despite their risks Research indicates that for most youth the period of risky experimentation does not extend beyond adolescence ceasing as identity becomes settled with maturity Much adolescent involvement in criminal activity is part of the normal developmental process of identity formation and most adolescents will mature out of these tendencies Evidence of significant changes in brain structure and function during adolescence strongly suggests that these cognitive tendencies characteristic of adolescents are associated with biological immaturity of the brain and with an imbalance among developing brain systems This imbalance model implies dual systems one involved in cognitive and behavioral control and one involved in socio emotional processes Accordingly adolescents lack mature capacity for self regulations because the brain system that influences pleasure seeking and emotional reactivity develops more rapidly than the brain system that supports self control This knowledge of adolescent development has underscored important differences between adults and adolescents with direct bearing on the design and operation of the justice system raising doubts about the core assumptions driving the criminalization of juvenile justice policy in the late decades of the 20th century It was in this context that the Office of Juvenile Justice and Delinquency Prevention
