Gray, William Ambrose Jr., Anna Szaniawska, 2012-12-06 Oceanographic discontinuities e g frontal systems upwelling areas ice edges are often areas of enhanced biological productivity Considerable research on the physics and biology of the physical boundaries defining these discontinuities has been accomplished see I D The interface between water and sediment is the largest physical boundary in the ocean but has not received a proportionate degree of attention The purpose of the Nato Advanced Research Workshop ARW was to focus on soft sediment systems by identifying deficiencies in our knowledge of these systems and defining key issues in the management of coastal sedimentary habitats Marine sediments play important

roles in the marine ecosystem and the biosphere They provide food and habitat for many marine organisms some of which are commercially important More importantly from a global perspective marine sediments also provide ecosystem goods and services 2J Organic matter from primary production in the water column and contaminants scavenged by particles accumulate in sediments where their fate is determined by sediment processes such as bioturbation and biogeochemical cycling Nutrients are regenerated and contaminants degraded in sediments Under some conditions carbon accumulates in coastal and shelf sediments and may be removed from the carbon cycle for millions of years having a potentially significant impact on global climate change Sediments also protect coasts The economic value of services provided by coastal areas has recently been estimated to be on the order of 12 568 9 10 y 3J far in excess of the global GNP

**Fire, Climate Change, and Carbon Cycling in the Boreal Forest** Eric S. Kasischke,Brian J. Stocks,2012-08-22 In boreal forests which contain large amounts of the world s terrestrial organic carbon fire is a natural and fundamental disturbance regime essential in controlling many ecosystem processes As a result of predicted climate change in the future the fire regime and consequently the forest cover and carbon storage of boreal regions will undergo dramatic alterations This volume discusses the direct and indirect mechanisms by which fire and

climate interact to influence carbon cycling in North American boreal forests The first section summarizes the information needed to understand and manage fire s effects on the ecology of boreal forests and its influence on global climate change issues Following chapters discuss in detail the role of fire in the ecology of boreal forests Subsequent sections present data sets on fire and the distribution of carbon discuss the use of satellite imagery in monitoring these regions and discuss approaches to modeling the relevant processes The book offers the following new results improved estimates of carbon released during fires at a variety of scales from individual sites to the entire North American boreal forest region direct evidence of enhanced soil respiration after fire in Alaskan boreal forests studies of the influence of fire on long term forest succession patterns modeling results of the effects of climate warming on the fire regime examples of the use of satellite imagery to monitor surface characteristics important in carbon cycling modeling results of how climate change will interact with the fire regime to influence carbon storage

Soviet Life ,1980      *Brenton Plays: 2* Howard Brenton,2013-12-04 Howard Brenton is one of Britain s best known and most controversial dramatists The Romans in Britain was the play that brought calls to bring back censorship when it was first staged at the National in 1980 It conjures up an era that is culturally as well as historically remote which is a notoriously difficult task but Mr Brenton acheives it with great skill and effect a very good play indeed In The Thirteenth Night He sets the characters of Shakespeare to find the elements in the British character which could transform an Englishman into a Stalin and closes in on his creation with an overall wit to match his horror The Times The Genius is teeming with memorable stage pictures and bristling with Brenton s very best writing flinty impassioned explosive Financial Times In Bloody Poetry Brenton is doing something markedly ambitious in this phantasmagoric play He is celebrating the idea of the committed artist who seeks to stir and provoke sullen defeated bourgeois England At the same time with clear eyed honesty he shows how difficult it is to upset the moral order The Guardian Greenland is on the one hand a cry of disillusionment with established political forms on the other it is full of typically lively Brentonesque satire and lampoons Brenton s message is a welcome antidote to the madness in which we all now seem to be living and a sharp blast against patriarchy as well as other attendant woes City Limits
