Cyclone Country:

Cyclone Country Chrystopher J. Spicer, 2020-09-29 The storm has become a universal trope in the literature of crisis revelation and transformation It can function as a trope of place of apocalypse and epiphany of cultural mythos and story and of people and spirituality This book explores the connections between people place and environment through the image of cyclones within fiction and poetry from the Australian state of Queensland the northern coast of which is characterized by these devastating storms Analyzing a range of works including Alexis Wright s *Carpentaria* Patrick White s *The Eye of the Storm* and Vance Palmer s *Cyclone* it explains the cyclone in the Queensland literary imagination as an example of a cultural response to weather in a unique regional place It also situates the cyclones that appear in Queensland literature within the broader global context of literary cyclones

Cyclones in Southern Africa Godwell Nhamo, David Chikodzi, 2021-09-28 Tropical cyclones in Southern Africa also known as hurricanes or typhoons in other regions of the world is a hot subject for academic research This focus has been magnified by the need to consider tropical cyclones in the context of other global development agendas that includes the 2030 Agenda for Sustainable Development and its inseparable 17 Sustainable Development Goals SDGs the Paris Agreement the Sendai Framework for Disaster Risk Reduction and Habitat III s New Urban Agenda The ambitious SDGs challenge global and community leaders to make sure development addresses the nexus among poverty inequality and employment creation as well as care for the earth and its natural resources and biodiversity The SDGs further present an agenda to eradicate hunger bring quality education and sustain water and sanitation The infrastructure development human settlements sustainable consumption and production climate change biodiversity and the ocean blue economy agendas are also pitched Lastly the 2030 Agenda for Sustainable Development encourages partnerships on delivering various programmes and projects at all spatial levels However as tropical cyclones continue to make multiple landfalls and ravage Southern Africa and other parts of the world the achievement of the 2030 Agenda for Sustainable Development is threatened To this end this book addresses this gap by documenting the implications of tropical cyclones drawing examples and case studies from recent tropical cyclones such as cyclone Idai and cyclone Kenneth that resulted in catastrophic impacts in 2019 The book comes as part of a series with three volumes The other volumes include *Cyclones in Southern Africa Vol 1 Interfacing the Catastrophic Impact of Cyclone Idai with SDGs in Zimbabwe* and *Cyclones in Southern Africa Vol 2 Foundational and Fundamental Topics* Given the foregoing the book is suitable as a read for several professionals and disciplines such as tourism and hospitality studies economics sustainable development development studies environmental sciences arts geography life sciences politics planning and public health

B. Singh,2022-04-19 The Bay of Bengal is prone to tropical cyclones and storm surges as a result of its location and many of the mostly poor people living along the coastal regions of South Asia lose their lives almost every year These disasters have been particularly devastating and have caused serious damage During the past five decades the low lying coastal and offshore islands have experienced a tragic history of 50 severe cyclones and storm surges with more than one million victims dead or missing People accepted and waited for the next disaster as they had no alternatives Members of the poor families who survived the disasters experienced hard times recovering from damage and the loss of their loved ones After disasters epidemic diseases arise in the affected areas Many of the people in distress are also deprived of public services Providing all sorts of assistance and emergency health

preparedness are most essential to overcome such a situation The causes of these huge casualties have been mainly 1 the high population density of costal settlements 2 inadequate cyclone shelters in the disaster risk areas 3 lack of awareness of the disaster risk by the vulnerable population 4 deterministic attitudes of people who accept disasters as fate 5 houses that are weakly constructed and 6 underdeveloped central awareness programmes and weather forecast systems This book is based on an empirical study presenting a timeline analysis of major cyclones and their impacts and consequent losses through the super cyclones in the disaster prone coastal regions of India Sri Lanka and Bangladesh This study also investigates resilience mechanisms based on early warning systems technology applications including GIS and remote sensing best practices success stories and case studies that can be used for effective cyclone management and development of a resilience mechanism among coastal communities
