Cynthias Child:

CHILDREN IN THE URBAN ENVIRONMENT Norma Kolko Phillips, Shulamith Lala Ashenberg Straussner, 2016-12-23
This updated and expanded third edition examines the significant changes impacting children in our society and is a significant revision of the second edition presented 10 years previous. During that period there have been many important firsts in the United States: the first African American president, the first attempt at a health care system that includes everyone, the first time for gay marriage sanctioned by the federal government, numerous firsts in medical care, a growing globalization, and the ongoing technology revolution changing lives from day to day. At the same time, however, there have been reactionary pulls that have halted progress in many critical areas such as income inequality, racism, poverty, violence, terrorist acts, and critical flaws in the educational and criminal justice systems that continue to have disastrous consequences for children. The chapters in the book discuss the cost in human terms of some of the missing opportunities for urban children and youth and illustrate the impact of social welfare policies on children, their families, and on the broader society. To better prepare social workers to meet some of the pressing needs to children, three completely new chapters have been added to this edition: *Beyond School and Community Violence*, *Providing Environments Where Children Thrive*, *Urban Lesbian, Gay, Bisexual, and Transgender Children and Substance Use by Urban Children*. In addition to sections on *Economic, Social, and Environmental Factors Impacting on Urban Children* and *Familial Factors Impacting on Urban Children*, a new section *Behavioral and Physical Health and Urban Children* has been introduced. This new edition provides a significant resource for students and professionals in social work, family counseling, human services, psychology, and criminal justice. Most importantly, the various chapters in this text will help social workers and social work students recognize the nature of some of the current problems affecting children and come up with innovative solutions for the future.

Negotiating Adult-Child Relationships in Early Childhood Research Deborah Albon, Rachel Rosen, 2013-08-15
Negotiating Adult-Child Relationships in Early Childhood Research presents a substantive critique of technicist and neoliberal approaches to ethics through an exploration of the complicated and often messy situations faced in negotiating relationships in research with children. Despite growing acknowledgement of their centrality

relationships between adult researchers and very young participants have been neglected and under theorised and in response this book offers a comprehensive conceptualisation of adult child research relationships through examination of questions including How do power and inequity impact on adult child research relationships What does it mean for relationships when researchers intervene in the field How do bodies matter in research relationships What does an emphasis on relationships with young children mean for the research process Drawing on data from their own research the authors contend that relationships are part of a wider web of social relations and space time configurations They propose and develop a relational ethics of answerability and social justice inspired by the work of Bakhtin and in addition explore the way material bodies come to matter the ambiguity of consent in educator research and the risks and possibilities of research relationships Chapters include innovative formulations of reciprocity sensing practices and political ethical responsibility This book contributes to current debates about research with young children offering an incisive and thorough exploration of the importance of relationships to the research process Relevant for international audiences this book is essential reading for early childhood students and educators researchers and lecturers with an interest in research with children
