Current Topics in Developmental Biology, 1992-03-23 **Cytoskeletal Mechanisms During Animal Development**, 1996-02-09 The cytoskeleton is central to cell biology and is instrumental in developmental events Volume 31 is divided into two major sections nonchordate development and chordate development Summaries of each section compare evolutionary conservation among organisms **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1993 **Current Catalog** National Library of Medicine (U.S.),1993 First multi year cumulation covers six years 1965 70 *Handbook of Physiology* Joseph F. Hoffman,James D. Jamieson,1997 The aim of this handbook is to survey key areas in modern cellular and molecular physiology The topics covered range from the most fundamental biophysical and biochemical bases of cellular physiology to more concerted cellular biological processes A more elusive goal of this volume is to provide a framework for future research linking these various processes in whole animal systems The chapters begin with descriptions of basic membrane processes including membrane structure as it relates to function the biophysics of membrane transport and cell volume regulatory mechanisms The organization and function of the plasma membrane and intracellular organelles involved in membrane trafficking and the biogenesis of cell polarity are then reviewed in depth Energy generation and transduction subserving cellular function are covered in another series of chapters The structure and function of the cytoskeleton and its relationship to events regulated by interaction with the extracellular matrix are examined in detail Chapters on the integrative aspects of cellular physiology including immunobiology cellular interactions fertilization and interactions of cells with the extracellular matrix round out this authoritative survey of contemporary cellular physiology Researchers instructors post doctorate and graduate students will find it a uniquely useful resource **Handbook of Physiology**, 1997 The Caenorhabditis Elegans Alkali Myosin Light Change Gene Mlc-3 Suzanne Anita Sprunger,1993 **Books in Print**, 1994 Cell Physiology Joseph F. Hoffman,James D. Jamieson,American Physiological Society (1887-),1997 Books in Print Supplement, 1994 **Tissue Remodeling and Epithelial Morphogenesis** Thomas Lecuit,2009-09-25 For more than 30 years *Current Topics in Developmental Biology* has provided a forum for dissemination and discussion of new ideas and thought in developmental biology Bringing together a series of articles on the structural functional and developmental characteristics of epithelials this thematic volume represents a timely and valuable contribution to an exciting and multidisciplinary field of study Because defects in epithelial function and growth control play a major role in human disease cancerous tumors spina bifida cardiac malformations for example this volume will be of particular interest to researchers working in cancer drug design and development and those working in therapeutic areas to treat developmental abnormalities Coverage of current research findings and thought on cell cell and cell extracellular matrix interactions gives researchers a better understanding of the processes of remodeling and morphogenesis which are critical to the development of drugs aimed at disrupting the early formation and proliferation of

cancerous tumors Inclusion of chapters that discuss the most contemporary thought on cell polarity and tissue morphogenesis providing researchers with a better understanding of the control of cellular organization and polarity particularly important to researchers who are developing treatments for developmental abnormalities and those working in cancer drug development Use of a variety of animal models allowing researchers to compare and contrast the molecular mechanisms that underlie cell cell and cell extracellular matrix interactions in a variety of research models **Journal of Cell Science** ,1993 **Epithelial and Neuronal Cell Polarity and Differentiation** Enrique Rodriguez-Boulan,1993
