**Making Choices, Making Do** Lois Rita Helmbold, 2022-10-14 Making Choices Making Do is a comparative study of Black and White working class women s survival strategies during the Great Depression Based primarily on analysis of employment histories and Depression era interviews of 1 340 women in Chicago Cleveland Philadelphia and South Bend Lois Helmbold discovered that while going through the Depression both Black and White women lost work fairly equally but the benefits that White women accrued because of structural racism meant that they avoided utter destitution that more commonly swallowed their Black peers For example when let go from a job a White woman was more successful in securing a less prestigious job which allowed her continuous employment while Black women especially older Black women were pushed out of the labor force entirely Helmbold found other ways that Black and White working class women s lives intertwined sometimes positively sometimes not She found that overall working class women were less racially segregated than men in their jobs Making Choices Making Do strives to fill the gap in the labor history of women both Black and White during the Depression The book will challenge the limits of segregated histories and encourage more comparative analysis

 and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative  
 than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass  
 into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his  
 analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What  
 emerges from this survey is often surprising the classical world for instance was largely barren of new technology the  
 relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the  
 Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments  
 associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity  
 Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness  
 to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such  
 factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed  
 comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe  
 and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state  
 the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean  
 going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such

commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential *The Concise Oxford Companion to African American Literature* William L.
