Geography Standards

- 36 weekly lessons, each including:
  - teacher resource page
  - geography vocabulary
  - reproducible map
  - two questions per day
  - challenge question
  - answer key
- Includes access to 36 downloadable maps

**WEEK 5**

**Daily Geography**

**ANSWER KEY**

**Monday**

1. parallels or lines of latitude
2. meridians or lines of longitude

**Map Coordinates**

Share with students that most people describe a location using relative location. Relative location is a description of location using the relation of one place to another. To find the exact location of a place, people use absolute location.

To find the absolute location of a place, people use grid coordinates. Tell students that lines of latitude, or parallels, and lines of longitude, or meridians, form a geographic grid. The grid helps to identify points on Earth and record their exact locations north or south of the equator, and east or west of the prime meridian. The coordinates are the latitude and longitude address of a place.

map of Australia

Notice that the latitude lines are all of the equator. Lines on the
