In Africa Peter Koehn, 2019-09-16 Originally published in 1990 A look at the vast historically and socially complex nature of the Nigeria This book is intended to share what he has learned about public policy and administration in Africa over the past ten years This book is based upon a decade of research reflection and writing The field research period corresponds with the

Making Policy, Making Law Mark Carlton Miller, Jeb Barnes, 2004 This volume proposes a new way of understanding the policymaking process in the United States by examining the complex interactions among the three branches of government executive legislative and judicial Collectively across the chapters a central theme emerges that the U.S. Constitution has created a policymaking process characterized by ongoing interaction among competing institutions with overlapping responsibilities and different constituencies one in which no branch plays a single static part At different times and under various conditions all governing institutions have a distinct role in making policy as well as in enforcing and legitimizing it This concept overthrows the classic theories of the separation of powers and of policymaking and implementation specifically the principal agent theory in which Congress and the presidency are the principals who create laws and the bureaucracy and the courts are the agents who implement the laws if they are constitutional The book opens by introducing the concept of adversarial legalism which proposes that the American mindset of frequent legal challenges to legislation by political opponents and special interests creates a policymaking process different from and more complicated

than other parliamentary democracies The chapters then examine in depth the dynamics among the branches primarily at the national level but also considering state and local policymaking Originally conceived of as a textbook because no book exists that looks at the interplay of all three branches it should also have significant impact on scholarship about national lawmaking national politics and constitutional law Intro conclusion and Dodd s review all give good summaries

Routledge Handbook of Public Policy Eduardo Araral,2013 This Handbook provides a comprehensive global survey of the policy process Written by an outstanding line up of distinguished scholars and practitioners the Handbook covers all aspects of the policy process including Theory from rational choice to the new institutionalism Frameworks network theory advocacy coalition and development models Key stages in the process formulation implementation and evaluation Agenda setting and decision making The roles of key actors and institutions This is an invaluable resource for all scholars graduate students and practitioners in public policy and policy analysis Publisher description 21st Century Political Science: A Reference Handbook John T Ishiyama,Marijke Breuning,2011 Offering full coverage of major subthemes and subfields within political science this reference handbook includes entries on topics from theory and methodology to international relations and institutions **Power by Design** Suisheng Zhao,1995-12-01 First established as a cabinet system in Guangzhou in 1925 the Nationalist Government of China was replaced three years later by a presidential system under a unified Nationalist government in Nanjing The cabinet government was restored in 1931 and existed until the presidential system was again installed by the 1936 constitution Why did presidential and cabinet systems exist alternately during this formative period of the Nationalist government Why was the presidential system finally adopted in 1936 Suisheng Zhao answers these and other questions fundamental to understanding authoritarian regimes in this pioneering study of the design of the Nationalist Government of China from 1925 to 1937 although scholars of comparative politics have shown great interest in the institutional choice between parliamentarianism and presidentialism in democratic countries they have paid little attention to the study of constitutional frameworks in authoritarian settings By offering a clear and original re interpretation of the history of this power struggle between Chiang Kai shek and his rivals over institutional design Zhao challenges the conventional wisdom that has underestimated the importance of formal institutions in non democratic regimes Borrowing ideas from public choice theory Zhao proposes that political actors who design governmental institutions are driven by power maximization strategies just as business firms are driven by wealth maximization strategies Constitution making reflects the underlying distribution of power among authoritarian leaders who attempt to design political institutions that will consolidate their personal power and position Thus Zhao argues if political actors possess more power resources than their rivals and anticipate themselves becoming dominant they will choose the singular leadership of the presidential system If they are in a weaker position and do not anticipate becoming dominant they will prefer the collective leadership of the cabinet form of government Notable for its persuasive integration of political science theory and the historical evidence Power by Design is

an insightful re interpretation of Chinese history that will be welcomed by scholars of modern China and those interested in the consequences of the nationalist politics that continue to reverberate in contemporary China as well as by comparative political scientists studying constitution making and institutional design
