Bureaucratizing The Good Samaritan:

Bureaucratizing The Good Samaritan Tony Waters, 2018 Bureaucratizing the Good Samaritan is about the organization of refugee relief programs. It describes the practical political and moral assumptions of the international refugee relief regime. Tony Waters emphasizes that the agencies delivering humanitarian relief are embedded in rationalized bureaucracies whose values are determined by their institutional frameworks. The demand for victims is observed in the close relation between the interests of the popular press and the decisions made by bureaucracies. This presents a paradox in all humanitarian relief organizations but perhaps no more so than in the Rwanda Relief Operations 1994-96 which ended in the largest mass forced repatriation since the end of World War II. This crisis is analyzed with an assumption that there is a basic contradiction between the demands of the bureaucratized organization and the need of relief agencies to generate the emotional publicity to sustain the interest of northern donors. The book concludes by noting that if refugee relief programs are to become more effective the connection between the press's emotional demands for victims and the bureaucratic organizations's decision processes need to be identified and reassessed. Dangerous Sanctuaries Sarah Kenyon Lischer, 2005 Since the early 1990s refugee crises in the Balkans, Central Africa, the Middle East, and West Africa have led to the spread of civil war. To understand the role of refugees in the spread of conflict, this text systematically compares violent and nonviolent crises involving Afghan, Bosnian, Rwandan refugees.

The Humanitarians David P. Forsythe, 2005-08-11 The International Committee of the Red Cross (ICRC) coordinates the world's largest private relief system for conflict situations. Its staff operates throughout the world and in recent years the ICRC has mounted large operations in the Balkans and Somalia. Yet despite its very important role, its internal workings are mysterious and often secretive. This book examines the ICRC from its origins in the mid-nineteenth century up to the present day and provides a comprehensive overview of a unique private organisation whose governing body

remains all Swiss but which is recognized in international law as if it were an inter governmental organization David Forsythe focuses on the policy making and field work of the ICRC while not ignoring international humanitarian law He explores how it exercises its independence impartiality and neutrality to try to protect prisoners in Iraq displaced and starving civilians in Somalia and families separated by conflict in the Israeli Palestinian conflict David Forsythe received the Distinguished Scholar Award for 2007 from the Human Rights Section of the American Political Science Association

Everyday Ethics Michael Lamb, Brian A. Williams, 2019-10-01 What might we learn if the study of ethics focused less on hard cases and more on the practices of everyday life In Everyday Ethics Michael Lamb and Brian Williams gather some of the world's leading scholars and practitioners of moral theology including some GUP authors to explore that question in dialogue with anthropology and the social sciences Inspired by the work of Michael Banner these scholars cross disciplinary boundaries to analyze the ethics of ordinary practices from eating learning and loving thy neighbor to borrowing and spending using technology and working in a flexible economy Along the way they consider the moral and methodological questions that emerge from this interdisciplinary dialogue and assess the implications for the future of moral theology

Re-Framing Foreign Aid History and Politics Igor Pellicciari, 2022-06-16 This book presents an integrated analysis at once conceptual historical and political of the growing impact of State Funded Aid on international relations particularly after the collapse of the Berlin Wall and the end of the bipolar system In order to observe Aid as an emerging instrument of foreign policy the book develops an original approach which puts Donors and Recipients on the same level and examines the political dynamics of their relationship The focus shifts from looking at the needs covered by Aid interventions to the political motivations of Donors and Recipients Aid is reconceptualized to include any transaction on favourable terms between these two parties regardless of the object of that Aid This framework of analysis is applied to several historical cases from the post conflict transition in Bosnia and Herzegovina and the post Soviet one in Russia in the 1990s to the medical Aid to Italy and Russian vaccine diplomacy to the Republic of San Marino during the COVID 19 pandemic In the end the book identifies ten major trends that have shaped the dynamics of the relationship between Donors and Recipients over the past few decades and on a more general level traces the impact that State Funded Aid has had on the international system By arguing that on the whole Donors have had greater political interests than Recipients the book takes a fresh and original look at Aid as instrument of Power Politics It will be of great interest to students scholars and practitioners of Foreign Aid and foreign policy and to all those interested in analysing how they have been affected by the global pandemic

Heroes, Saints, and Ordinary Morality Andrew Michael Flesher, 2003-11-25 Most of us are content to see ourselves as ordinary people unique in ways talented in others but still among the ranks of ordinary mortals Andrew Flesher probes our contented state by asking important questions How should

ordinary people respond when others need our help whether the situation is a crisis or something less Do we have a responsibility an obligation to go that extra mile to act above and beyond the call of duty Or should we leave the braver responses to those who are somehow different than we are better somehow heroes or saints Traditional approaches to ethics have suggested there is a sharp distinction between ordinary people and those called heroes and saints between duties and acts of supererogation going beyond the expected Flescher seeks to undo these standard dichotomies by looking at the lives and actions of certain historical figures Holocaust rescuers Martin Luther King Jr Dorothy Day among others who appear to be extraordinary but were in fact ordinary people Heroes Saints and Ordinary Morality shifts the way we regard ourselves in relationship to those we admire from afar it asks us not only to admire but to emulate as well further it challenges us to actively seek the acquisition of virtue as seen in the lives of heroes and saints to learn from them a dynamic aspect of ethical behavior that goes beyond the mere avoidance of wrongdoing Andrew Flescher sets a stage where we need to think and act calling us to lead lives of self examination even if that should sometimes provoke discomfort He asks that we strive to emulate those we admire and therefore allow ourselves to grow morally and spiritually It is then that the individual develops a deeper altruistic sense of self a state that allows us to respond as the heroes of our own lives and therefore in the lives of others when times and circumstance demand that of us

Global Neighbors Douglas A. Hicks, Mark R. Valeri, 2008-08-20

How can people of faith meet the challenge of living morally and faithfully within an increasingly globalized society Much of the debate about the global market economy is polarized between pro market ideology and anti globalization activism *Global Neighbors* sidesteps that dichotomy presenting instead a nuanced constructive approach Leading theologians ethicists economists and church leaders here examine the Christian call to live morally faithfully and responsibly in today's global marketplace and offer alternative perspectives to such utilitarians as Peter Singer Contributors Robert D Austin Rebecca M Blank Lee Devin William Goettler Eric Gregory Douglas A Hicks Janet Parker Rebecca Todd Peters Shirley J Roels Mark Valeri Jeff Van Duzer Kent Van Til Thomas W Walker

Celebrity Humanitarianism and North-South Relations Lisa Ann Richey, 2015-08-20

Discussion over celebrity engagement is often limited to theoretical critique or normative name calling without much grounded research into what it is that celebrities are doing the same or differently throughout the world Crucially little attention has been paid to the Global South either as a place where celebrities intervene into existing politics and social processes or as the generator of Southern celebrities engaged in do gooding This book examines what the diverse roster of celebrity humanitarians are actually doing in and across North and South contexts Celebrity humanitarianism is an effective lens for viewing the multiple and diverse relationships that constitute the links between North and South New empirical findings on celebrity humanitarianism on the ground in Thailand Malawi Bangladesh South Africa China Haiti Congo US Denmark and Australia illustrate the impact of celebrity humanitarianism in the Global South and celebrityization participation and democratization in the donor North By investigating one of the most mediatized and distant representations

of humanitarianism the celebrity intervention from a perspective of contextualization the book underscores the importance of context in international development This book will be of interest to students and researchers in the fields of development studies celebrity studies anthropology political science geography and related disciplines It is also of great relevance to development practitioners humanitarian NGOs and professionals in business CSR fair trade who work in the increasingly celebritized field *The Ashgate Research Companion to Ethics and International Relations* Patrick Hayden,2016-04-01 While skepticism about the role of moral considerations in international politics has been influential within the discipline of international relations IR those writing on topics such as war peace rights and trade up until the twentieth century took seriously the importance of ethical values and moral debates The 1990s and 2000s have seen a substantial growth of attention to the ways in which IR conceives and analyzes themes of an ethical nature and how issues problems and policies involving ethics are addressed by a variety of actors within the international system This indispensable research companion widens the perspective from ethics and international relations to ethics in international relations redressing the mis perception that ethical concepts principles norms and rules are not in part constitutive of the international system and the agents acting within that system Necessarily cross disciplinary expertise is drawn from IR and also philosophy political theory religious studies history and law making this an ideal volume for any library reference collection *Humanitarianism and Modern Culture* Keith Tester,2010 An examination of humanitarianism in Western society Argues that humanitarianism has become a staple part of modern media and celebrity culture Provided by publisher *The Persistence of Subsistence Agriculture* Tony Waters,2008-01-01 This book is about how the modern market world transformed the lives of remote agricultural farmers Waters uses diverse examples to illustrate how the modern market economy captured persistent subsistence farms in 18th century Scotland 19th century United States 20th century Tanzania and indeed the entire modern world [Tsunami Recovery in Sri Lanka](#) Dennis B. McGilvray,Michele R. Gamburd,2013-05-13 The Indian Ocean Tsunami which devastated 70 percent of Sri Lanka s coastline and killed an estimated 35 000 people was remarkable both for the magnitude of the disaster and for the unprecedented scale of the relief and recovery operations mounted by national and international agencies The reconstruction process was soon hampered by political patronage by the competing efforts of hundreds of foreign humanitarian organizations and by the ongoing civil war The book is framed within this larger political and social context offering descriptions and comparisons between two regions southwest vs eastern coast and four ethnic communities Sinhalese Tamils Muslims and Burghers to illustrate how disaster relief unfolded in a culturally pluralistic political landscape Approaching the issue from four disciplinary perspectives anthropology demography political science and disaster studies chapters by experts in the field analyse regional and ethnic patterns of post tsunami reconstruction according to different sectors of Sri Lankan society Demonstrating the key importance of comprehending the local cultural contexts of disaster recovery processes the book is a timely and useful contribution to the existing literature

From Migrants to Refugees Jill Rosenthal, 2023-10-06 In *From Migrants to Refugees* Jill Rosenthal tells the history of how Rwandan migrants in a Tanzanian border district became considered either citizens or refugees as nation state boundaries solidified in the wake of decolonization Outlining the process by which people who have long lived and circulated across the Rwanda Tanzania border came to have a national identity Rosenthal reveals humanitarian aid's central role in the ideological processes of decolonization and nation building From precolonial histories to the first Rwandan refugee camps during decolonization in the 1960s to the massive refugee camps in the 1990s Rosenthal highlights the way that this area became a testing ground for novel forms of transnational aid to refugees that had global implications As local and national actors refugees and international officials all attempted to control the lives and futures of refugee groups they contested the authority of the nation state and the international refugee regime This history Rosenthal demonstrates illuminates how tensions between state and international actors divided people who share a common history culture and language across national borders

Rules for the World Michael Barnett, Martha Finnemore, 2012-04-15 *Rules for the World* provides an innovative perspective on the behavior of international organizations and their effects on global politics Arguing against the conventional wisdom that these bodies are little more than instruments of states Michael Barnett and Martha Finnemore begin with the fundamental insight that international organizations are bureaucracies that have authority to make rules and so exercise power At the same time Barnett and Finnemore maintain such bureaucracies can become obsessed with their own rules producing unresponsive inefficient and self defeating outcomes Authority thus gives international organizations autonomy and allows them to evolve and expand in ways unintended by their creators Barnett and Finnemore reinterpret three areas of activity that have prompted extensive policy debate the use of expertise by the IMF to expand its intrusion into national economies the redefinition of the category refugees and decision to repatriate by the United Nations High

Commissioner for Refugees and the UN Secretariat's failure to recommend an intervention during the first weeks of the Rwandan genocide By providing theoretical foundations for treating these organizations as autonomous actors in their own right *Rules for the World* contributes greatly to our understanding of global politics and global governance New Humanitarianism T. Schümer, 2007-10-23 In 1998 the UK adopted a policy of new humanitarianism to address the shortcomings of humanitarian assistance Sierra Leone became a test case This book provides an analysis of this approach placing the experience of Sierra Leone in context with Sudan and Iraq and showing how the policy affects the future of international humanitarian policy *The Good Project* Monika Krause, 2024-05-31 NGOs set out to save lives relieve suffering and service basic human needs They are committed to serving people across national borders and without regard to race ethnicity gender or religion and they offer crucial help during earthquakes tsunamis wars and pandemics But with so many ailing areas in need of assistance how do these organizations decide where to go and who gets the aid In *The Good Project* Monika Krause dives into the intricacies of the decision making process at NGOs and uncovers a basic truth It may be the case that relief agencies try to help people but in practical terms the main focus of their work is to produce projects Agencies sell projects to key institutional donors and in the process the project and its beneficiaries become commodities In an effort to guarantee a successful project organizations are incentivized to help those who are easy to help while those who are hardest to help often receive no assistance at all The poorest of the world are made to compete against each other to become projects and in exchange they offer legitimacy to aid agencies and donor governments Sure to be controversial *The Good Project* offers a provocative new perspective on how NGOs succeed and fail on a local and global level The Book Review Digest, 2003
