**Airlift 1870** John Stirling Fisher, 1965      **A Study Guide for Guy de Maupassant's "Two Friends"** Gale, Cengage Learning, A Study Guide for Guy de Maupassant's Two Friends excerpted from Gale's acclaimed Short Stories for Students This concise study guide includes plot summary character analysis author biography study questions historical context suggestions for further reading and much more For any literature project trust Short Stories for Students for all of your research needs      **Air Mobility** Robert C. Owen, 2013 Global air mobility is an American invention During the twentieth century other nations developed capabilities to transport supplies and personnel by air to support deployed military forces But only the United States mustered the resources and will to create a global transport force and aerial refueling aircraft capable of moving air and ground combat forces of all types to anywhere in the world and supporting them in continuous combat operations Whether contemplating a bomber campaign or halting another surprise attack American war planners have depended on transport and tanker aircraft      **Animals Strike Curious Poses** Elena Passarello, 2017-11-02 Beginning with Yuka a 39 000 year old mummified woolly mammoth recently found in the Siberian permafrost each of the sixteen essays in Animals Strike Curious Poses investigates a different famous animal named and immortalised by humans Here are the starling that inspired Mozart with its song Darwin's tortoise Harriet and in an extraordinary essay Jumbo the elephant and how they tried to electrocute him Modelled loosely on a medieval bestiary these witty playful provocative essays traverse history myth science and more introducing a stunning new writer to British readers      ***Aerial Aftermaths*** Caren Kaplan, 2017-12-21 From the first vistas provided by flight in balloons in the eighteenth century to the most recent sensing operations performed by military drones the history of aerial imagery has marked the transformation of how people perceived their world better understood their past and imagined their future In Aerial Aftermaths Caren Kaplan traces this cultural history showing how aerial views operate as a form of world making tied to the times and places of war Kaplan's investigation of the aerial arts of war painting photography and digital imaging range from England's surveys of Scotland following the defeat of the 1746 Jacobite rebellion and early twentieth century photographic mapping of Iraq to images taken in the immediate aftermath of 9 11 Throughout Kaplan foregrounds aerial imagery's importance to modern visual culture and its ability to enforce colonial power demonstrating both the destructive force and the potential for political connection that come with viewing from above      **Ballooning, 1782-1972** Roger Pineau, National Air and Space Museum, 1972      **To Ascend from a Floating Base** R. D. Layman, 1979      **The New Breed** Kate Darling, 2021-04-20 A must read for anyone interested in the emerging ethics of robotics Irene M Pepperberg A bold optimistic exploration of the relationship between robots and humans based on our history with animals from a renowned MIT researcher The robots are here They make our cars they deliver fast food they mine the sea floor And in the near future their presence will increasingly enter our homes and workplaces making human robot interaction a frequent everyday occurrence What will this future look like What will define

the relationship between humans and robots Here Kate Darling a world renowned expert in robot ethics shows that in order to understand the new robot world we must first move beyond the idea that this technology will be something like us Instead she argues we should look to our relationship with animals Just as we have harnessed the power of animals to aid us in war and work so too will robots supplement rather than replace our own skills and abilities A deeply original analysis of our technological future and the ethical dilemmas that await us *The New Breed* explains how the treatment of machines can reveal a new understanding of our own history our own systems and how we relate not just to non humans but also to each other

**The Scientific Journal** Alex Csiszar,2018-06-25 Not since the printing press has a media object been as celebrated for its role in the advancement of knowledge as the scientific journal From open communication to peer review the scientific journal has long been central both to the identity of academic scientists and to the public legitimacy of scientific knowledge But that was not always the case At the dawn of the nineteenth century academies and societies dominated elite study of the natural world Journals were a relatively marginal feature of this world and sometimes even an object of outright suspicion *The Scientific Journal* tells the story of how that changed Alex Csiszar takes readers deep into nineteenth century London and Paris where savants struggled to reshape scientific life in the light of rapidly changing political mores and the growing importance of the press in public life The scientific journal did not arise as a natural solution to the problem of communicating scientific discoveries Rather as Csiszar shows its dominance was a hard won compromise born of political exigencies shifting epistemic values intellectual property debates and the demands of commerce Many of the tensions and problems that plague scholarly publishing today are rooted in these tangled beginnings As we seek to make sense of our own moment of intense experimentation in publishing platforms peer review and information curation Csiszar argues powerfully that a better understanding of the journal s past will be crucial to imagining future forms for the expression and organization of knowledge
