The Airspeed AS.12 Horsa glider was a British World War II troop-carrying glider designed by Airspeed Limited and was used by British and Allied forces. British gliders were all bad names starting with H, the name Horsa came from the legendary 5th century conqueror of Southern Britain.

The aircraft was built with a wooden semi-monocoque fuselage built in three sections that were bolted together. The front section consisted of the cockpit and main freight loading door, the main section accommodated up to 18 troops or freight and the rear section supported the tail assembly. The wing had large "Burn Doors" flaps which allowed steep approaches and were actuated by a small air bottle, but could only be deployed once. This allowed the aircraft land in confined spaces. The fuselage undercarriage was fixed and could be jettisoned after take off, although if often was not. If jettisoned, the aircraft landed on a spring skid under the fuselage.

The aircraft first flew on 12th September 1942 with a total of 1,650 being built by Airspeed, Austin Motors and furniture manufacturer Morris Lubell.

The Horsa was first used operationally on the night of 16/17th September 1942 on Operation Freshwater, a raid on the German Heavy Water plant in Norway. The next use was on 10th July 1943 on Operation Husky, the invasion of Sicily but the most famous use was during Operation Tonga, the paratrooper operation of 6th July including the capture of Pegasus Bridge. Other operations included Operation Dragoon, the invasion of Southern France, Operation Market Garden, Ardennes and Operation Varsity, the crossing of the Rhine.

The Horsa was towed by a number of different aircraft types, including Albatross, Dakota, Halifax, Stirling and Whitley's.

Britain's Glorious Aircraft Industry J Paul Hodgson, 2021-03-03 The rich and diverse history of the British aircraft industry is captured in superb detail by the author in this weighty tome Aviation News Great Britain's aircraft industry started in 1908 with the first formally registered organization in the world to offer to design and build an aeroplane for commercial gain This book tells the complete story of the 110 years since the start all the companies formed and the aircraft they produced highlighting the advances in aeronautical ambition and technology It is the story of the creation survival and decline of all one hundred and twenty three of the aircraft design and construction companies formed between 1908 and 2018 The exhilaration of success and the magic of aviation technology are vividly illustrated by the technical and political birth stories of iconic projects such as the Cirrus Gypsy Moths the Tiger Moth the flying boats of Imperial Airways Spitfire Lancaster Viscount Vulcan Harrier Buccaneer and many more The rotary wing industry is not forgotten The birth of the jet turbine engine and the quest for supersonic speed is included The stories of the disappointments of failure and disaster such as the Brabazon Comet Princess Rotodyne and TSR 2 and the growth of international collaboration in Concorde Tornado Airbus Eurofighter Typhoon and other projects are included in the context of the international scene and domestic politics The conclusion highlights the prominent reminiscences and speculates on the future of the aircraft industry in Britain An outstanding reference book and a thoroughly enjoyable canter through the decades from the days of wood and fabric to the modern composite structure of the wings of the A400 Atlas RAF Historical Society *Silent Invaders* Gary A.

Best, 2017-05-17 The guys would come into the glider like a bunch of piss ants skittering around real cocky like But they settled down in the glider Some got airsick and they began thinking about what was ahead One time we were fired on just as we were landing and exiting the glider and one of the boys was hit His friends dragged him to cover beneath a tree He looked up at me and said Take my rifle I'm dying I reached down and took his weapon and he slumped back and died That was pretty tough Combat gliders were called by some as Death Crates Purple Heart Boxes Flying Coffins and Tow Targets They were not pretty and had no graceful lines Viewed from the front they had a pug nose and a sloping Neanderthal forehead Their wings looked like the heavily starched ears of a jackrabbit placed at right angles on a canvas covered frame Twice the length of the body these wings were eighty four feet in length 70 per cent as long as the Wright Brothers first powered flight at Kitty Hawk They could not become airborne let alone fly unless assisted by an engine powered tow plane And for those riding in the back it was like flying through the gates of hell The men who were trained and assigned to guide gliders into battle were said to be the only pilots who had no motors armament parachutes and no second chances Like the aircraft they commanded they were called inglorious names such as The Bastards Nobody Wanted Glider Gladiators in Wooden Chariots Hybrid Jackasses and Glory Boys Beautifully written profoundly illustrated and researched *Silent Invaders* Combat Gliders of the Second World War is a work that is dedicated to those brave men under impossible odds from the

Concepts Division, 1962      **Aircraft of World War II** Les Perera, 2020-08-27 It is generally accepted that the Spitfire was not only a great fighter aircraft but was also a symbol of Britain's defiance of the Luftwaffe in the early years of WWII. Britain had been slow to react to German rearmament in the 1930s. Since WWI the RAF's front line aircraft were mainly used in the colonial policing role where their mostly 1920s technology was not an issue. However the political appeasement of Hitler's Germany and subsequent lack of realisation had left the RAF ill equipped to combat the potential threat posed by the German build up. Almost too late the government started to modernise Britain's ageing fighter force with orders for the Hurricane and Spitfire that were to prove invaluable in the defence of the country. These aircraft together with others to follow began to replace the biplane fighters and bombers that would have been hopelessly outclassed in the forthcoming war. Weapons technology radar and electronic countermeasures all played a part in Britain's ultimate victory. Without the aircraft and the courage of the crews who operated them this outcome would not have been possible. Some of the aircraft that served during that period are profiled in this illustrated book with archive photography. There are many familiar names featured such as the Supermarine Spitfire, Hawker Hurricane and Avro Lancaster but also lesser known types including the Boulton Paul Defiant, Fairey Battle and Westland Lysander      **Leading the Way to Victory** Mark C. Vlahos, 2023-01-10 Leading the Way to Victory is the official history of the 60th Troop Carrier Group featuring unpublished first person accounts by participating veterans and expertly written by retired USAF Colonel Mark C Vlahos combat veteran and former Vice Wing Commander of 314th Airlift Wing at the Little Rock Air Force Base. The December 7 1941 surprise attack on Pearl Harbor thrust the United States into World War II. Just six months later in May 1942 flying new C 47 transport aircraft the 60th Troop Carrier Group led the way as the first U S TCG to deploy to England and the European Theater of Operations in World War II. Leading the way to victory the 60th TCG's first mission dropping U S paratroopers outside of Oran North Africa was not only the first combat airborne mission in U S Army history but also the longest airborne mission of the entire war. This drop spearheaded Operation TORCH also known as the Invasion of North Africa by taking key Axis airfields just inland from the amphibious landing zones. The 60th TCG went on to fly some of the first combat aeromedical evacuation missions and the first combat mission towing CG 4A Waco gliders during Operation HUSKY the Invasion of Sicily. As the new airborne air land aeromedical evacuation and glider missions matured in World War II the 60th TCG continued to play a major role paying in blood for valuable lessons learned in the school of hard knocks. The group later flew dramatic missions into Yugoslavia supporting Partisans as part of the secret war in the Balkans an episode of World War II history still all but unknown today and dropped British paratroops in the airborne invasion of Greece. The Group was inactivated at the end of the war. Drawing on official United States Army Air Forces microfilm records operational

records in the National Archives photographs from both collections published historical materials and many personal accounts author Mark C Vlahos expertly written and highly readable volume is certain to become the standard history and go to reference for the 60th TCG This work offers scholars and lay readers alike an authoritative informative and engaging saga of the Group s battles adversity hardships and triumphs from inception through the Allied victory in Europe *Boulton Paul Aircraft Since 1915* Alec Brew,2020-05-29 The ancient Norwich firm of Boulton Paul were brought into aircraft construction in 1915 and quickly became one of the great innovators They pioneered metal construction and built the frame of the largest aircraft ever built in Britain the R 101 airship The Overstrand the last of their superlative medium bombers was the first aircraft in the world to feature a power operated gun turret and after their move to Wolverhampton in 1936 and change of name to Boulton Paul Aircraft their gun turrets became a vital component of the war effort not least in their own Defiant which fought in the Battle of Britain and was the most successful night fighter in the dark nights of the Blitz Their post war Balliol trainer was the World s first single engine turboprop and their last production aircraft because the technology of their gun turrets was translated into their world lead as manufacturers of power operated control units and then fly by wire Becoming part of the Dowty Group and later GE Aviation their advanced aerospace product line is now invested in the firm of Moog still in Wolverhampton still innovating **Secret Christchurch** Andrew Jackson,2024-11-15 Secret Christchurch explores the lesser known history of the town of Christchurch through a fascinating selection of stories unusual facts and attractive photographs **Shute: The engineer who became a prince of storytellers** Richard Thorn,2017-08-08 Nevil Shute was a writer whose books were frequently looked down on by literary critics and yet when he died in 1960 he was one of the best selling novelists of his day Today books such as A Town Like Alice and On the Beach continue to attract new generations of fans However there was more to Shute than his books a great deal more Richard Thorn explores Shute s personal and professional life drawing from extensive research carried out using archives and sources in the UK USA and Australia Nevil Shute Norway began his professional life as an aeronautical engineer working on the outskirts of London for the newly established de Havilland Aircraft Company He quickly went on to play a key role in Britain s ill fated and final airship programme before co founding an aircraft manufacturing company at the height of an economic depression All the while using the pseudonym Nevil Shute he spent his time writing for relaxation in the evenings After the Second World War he flew a single engined aeroplane to Australia and back in search for new material for his novels Fascinated by the new world that he had seen the novelist sold up and moved his family to Australia buying a farm in a small town on the outskirts of Melbourne For the remainder of his life Australia was his home and the inspiration for many of his best loved novels Shute tells the story of the life and times of an extraordinary man who made a significant contribution to twentieth century popular literature This book will appeal to fans of Shute s work those interested in his background and personal life or to readers interested in the early years of the aviation industry in Britain **Normandy Beyond The Beaches** Jon

Diamond,2024-12-30 This latest Images of War series book examines the controversial development of the Allied campaign in Normandy in the weeks after the D Day landings After overcoming Rommel s beach obstacles and Atlantic Wall fortifications a secure Allied lodgment of the five beaches developed along the Caen Bayeux Carentan axis with a period of consolidation while reinforcements and supplies were built up The early arrival of 12th SS Hitlerjugend 21st Panzer and the Panzer Lehr Divisions delayed Montgomery s Anglo Canadian capture of Caen until mid July and prevented an early breakout into the countryside inland from Gold Juno and Sword which was suitable for armored combat An early American goal was to cut the Cotentin Peninsula in two at its southern base to prevent the Germans from supplying and strengthening the deep water port of Cherbourg which U S VII Corps captured on 26 June Inland from Omaha and Utah the close bocage country proved advantageous to the German defenders The Allied breakout occurred at the end of July with Bradley s Operation COBRA near St Lo followed by the entire Allied front first moving to close the Falaise Gap before heading southward and then pivoting to the east for the capture of the Seine River crossings These crucial and testing weeks for the Allies are described in graphic contemporary images with full captions and authoritative text **Kites, Birds & Stuff - Over 150 Years of British**
