Alain Touraine:

The Age of Structuralism ,1996-01-01 Structuralism began in linguistics and was enlarged by Claude Levi Strauss into a new way of thinking that views our world as consisting of relationships between structures we create rather than of objective realities The Age of Structuralism examines the work of seven writers who either expanded upon or reacted against Levi Strauss In a panoramic overview of the origins of deconstructionism and its critics Edith Kurzweil offers a lucid and penetrating portrait of the movement that dominated French intellectual life for much of the postwar era and which continues to influence the French intellectual milieu She explains Levi Strauss s strikingly original contributions then proceeds to illuminate the ideas of crusaders and critics The key figures dealt with include Louis Althusser who reinterpreted Marxism through a rereading of Marx s texts with the help of structuralist techniques Henri Lefebvre who remained faithful to Marx s humanism and was one of the earliest and most vehement critics of structuralism Paul Ricoeur whose phenomenology sought to reconcile ethical theory and intellectual pursuits Alain Touraine a socialist whose sociology of political action led him to dismiss structuralist concerns Jacques Lacan who criticized ego oriented psychoanalytic theory and practice and whose own work emphasized linguistic structures in psychoanalysis Roland Barthes whose literary criticism in its determination to reject all false notions and systems led to a highly idiosyncratic approach that drew upon all systems and finally Michel Foucault whose social histories of deviance medicine psychology grammar language sexuality criminology have reexamined every facet of social theory Placing these major figures in the context of political historical and psychoanalytic currents of the time The Age of Structuralism is a commanding and far reaching study of a decisive epoch in intellectual history Kurzweil s new opening essay explains how these towering figures prefigured current emphasis on semiotics post structuralism deconstruction and post postmodernism Kurt H Wolff called it lucid splendid and unobtrusive when the book first appeared It remains a central work in the appreciation of the French giants upon whose shoulders the new crop of thinkers expect to stand The Havoc of Capitalism ,2010-01-01 Havoc of Capitalism brings together an interdisciplinary community of scholars from around the world to contribute to the dialogue about alternative global futures in the current context of environmental crisis uncertainty and inequality The contributors to this book provide insight into the havoc wrought by processes of capitalism colonialism and consumption Drawing on present environmental matters of concern such as the aftermath of Hurricane Katrina First Nation perspectives on ecological colonization and the possibilities for transformation and action this book makes a timely intervention in debates about accumulated historical debts ordinary ecological crises and the challenges for sustaining social and environmental alternatives Democracy Inter-parliamentary Union,1998 Principles to realization Cherif Bassiouni *Alain Touraine* Jon Clark,Marco Diani,2013-12-19 First published in 2004 The seventeen essays in this volume discuss the work of Alain Touraine and consider his contribution to the social sciences The text includes his most recent thinkings on the market and communities **Civil Society and Political Theory**

Movements Across Disciplines Bert Klandermans, Conny Roggeband, 2007-09-26 Researchers and students from divergent academic disciplines share an interest in the study of social movements and collective action Through a variety of disciplinary approaches and techniques researchers seek to understand the emergence and development of collective action In the last few decades the field of social movements studies has proliferated enormously covering a wide array of movements issues

and places With this growth social movement scholars have criticized the traditional vision of collective mobilization as the results of irrational behavior and have instead developed a range of new approaches The expansion of the field has also led to increased theoretical debates and attempts to synthesize the different perspectives But these attempts have met with the obstacle of the field being multidisciplinary Discussion a theory from many areas of research can lead to misunderstandings

Can We Live Together? Alain Touraine, David Macey, 2000

In this book a leading French social thinker grapples with the gap between the tendency toward globalization of economic relations and mass culture and the increasingly sectarian nature of our social identities as members of ethnic religious or national groups Though at first glance it might seem as if the answer to the question Can we live together is that we already do live together watching the same television programs buying the same clothes and even using the same language to communicate from one country to another the author argues that in important ways we are farther than ever from belonging to the same society or the same culture Our small societies are not gradually merging into one vast global society instead the simultaneously political territorial and cultural entities that we once called societies or countries are breaking up before our eyes in the wake of ethnic political and religious conflict The result is that we live together only to the extent that we make the same gestures and use the same objects we do not communicate with one another in a meaningful way or govern ourselves together What power can now reconcile a transnational economy with the disturbing reality of introverted communities The author argues against the idea that all we can do is agree on some social rules of mutual tolerance and respect for personal freedom and forgo the attempt to forge deeper bonds He argues instead that we can use a focus on the personal life project the construction of an active self or subject ultimately to form meaningful social and political institutions The book concludes by exploring how social institutions might be retooled to safeguard the development of the personal subject and communication

between subjects and by sketching out what these new social institutions might look like in terms of social relations politics and education

End of Millennium Manuel Castells, 2010-03-29 END OF MILLENNIUM This final volume in Manuel Castells trilogy studies the key defining processes taking place in the last decade of the twentieth century as an expression of the crises resulting from the transition between the old industrial society and the emerging global network society Every now and then one reads a book of social science that is uplifting and mind expanding These books are

ambitious and lustrous teaching us much about our world Such is this work from the brilliant sociologist Manuel Castells There is no other sociological work today that brings together in one panoramic expanse so many of the changes now occurring This is a story not simply of global economic change but of cultural upheavals It is a tale not simply of the decline of sovereign states but of the emergence of the new bases of power And it is a narrative not merely about computer technology or the media but of the very terms in which those agents work Anthony M Orum *Contemporary Sociology* A magnum opus if ever there was one In my view the finest piece of contemporary social analysis for at least a generation Frank Webster *British Journal of Sociology* A truly stunning achievement A scholar who with remarkable mastery has brought his experience over a lifetime to bear on astonishingly diversified data set pulling them together into a compelling account of the complex relationship between the progressive and the reactionary the globalizing and particularizing forces that are transforming our perplexing world Benjamin Barber *The Los Angeles Times Sunday Book Reviews* *The Curriculum of Everything: Understanding education and curriculum* José Augusto Pacheco, 2023-11-06 The Curriculum of Everything advances as the eternal future in which artificial intelligence surpasses the human capacity to do but not that of understanding and feeling Now even the father of Artificial Intelligence worries even those bedrocks of being understanding and feeling may be at risk Pacheco reminds us that curriculum study is a normative question now necessarily with its technological dimension Then in a stunningly synoptic sentence that students could usefully study all semester he summarizes the curriculum as a socially culturally ideologically politically and economically constructed practice is a formal and informal dispositive of interwoven relationships between knowledge power and technology Penetrated we become impregnated with the structures of software as Pacheco appreciates Technological devices are powerful instruments of subjectivity production moving the subject into predefined ways of knowing Old fashioned rhetoric alright but insightfully implying we need to return to the past when we were still sort of human before we were seduced by supranational citizenship in the software state before we became submerged in the curriculum of everything Step back from the brink Pacheco has Let us join him William F Pinar Preface *Routledge Handbook of European Sociology* Sokratis Koniordos, Alexandros Kyrtsis, 2014-09-04 The Routledge Handbook of European Sociology provides over forty original groundbreaking state of the art accounts each expert contribution teasing out the distinctively European features of the sociological theme it explores The Handbook is divided in four parts intellectual and institutional settings regional variations thematic variations and European concerns **Visões de uma certa Europa** Juremir Machado da Silva, 1998
