The Semantic Web - ISWC 2005 Yolanda Gil, Enrico Motta, V. Richard Benjamins, Mark Musen, 2005-10-17 A little over a decade has passed since the release of the first Netscape browser In 1995 the World Wide Web was viewed largely as an academic curiosity Now of course the Web is an integral part of the fabric of modern society It is impossible to imagine science education commerce or government functioning without the Web We take the Web for granted and often assume that Internet connectivity is guaranteed to all of us as a birthright Although the Web indeed has become world wide and has lost a bit of its original aura as a consequence of its ubiquity a burgeoning community of researchers and practitioners continues to work toward the next generation of the Web a Web where information will be stored in a machine processable form and where intelligent computer based agents will access and automatically combine myriad services on the Internet of the kind that are now available only to people interacting directly with their Web browsers

Do Ask, Do Tell, Let's Talk Brad Hambrick, 2016-03-01 Conversations among friends accomplish more than debates between opponents Conversations on controversial issues do not to go well when the dialogue happens community to community or figurehead to figurehead Whether it s race religion or politics groups don t talk well with groups Too much is at stake when we feel like our words and actions speak for the collective whole Platforms and podiums will never accomplish what can only be done around dinner tables and in living rooms Two individuals from those respective groups are much more likely to forge a good relationship influencing one another in various ways Unfortunately an individual who listens well is often viewed by his or her collective compatriots as engaging in compromise at the group level representing each side fairly feels too much like agreement That is why the aim of this book is friendship Friendship is the level at which influence can be had because the dialogue does not seek to represent an agenda but to understand a person Friendship is what protects good points from becoming gotcha moments The subject for which this approach may be most vital for the modern church may be homosexuality and same sex attraction SSA Yet our approach has tended to be more polemical or political than pastoral and personal Churches have articulated their position on a conservative sexual ethic Churches have re examined the key biblical texts that are challenged in defense of a progressive sexual ethic As important as these things are however they do not equip everyday Christians to

develop meaningful friendships with people who experience same sex attraction or have embraced a gay identity In the absence of relationship our theology becomes theory Many Christians are seeing that the church s unwillingness to befriend people who experience SSA has blocked us from engaging with the subject of homosexuality on a person to person level We are reticent to engage relationships where it feels probable that there will be awkwardness Admittedly this book is not as neat as you might like for it to be Many tensions will be navigated maybe not all contradictions will be avoided However when it comes to being salt and light for the sake of the gospel it seems far better to choose possible messiness over guaranteed ineffectiveness That means we must realize that it is good for us to have conversations where we don t know what to say This is part of the essence of being a growing person When we re not having conversations that challenge us to think about new things we will commit sins either of pride or apathy We should always be praying that God will bring people into our lives who will provide the opportunity for us to ask new and important questions The desire of this book is to be a resource God uses to grow his people into excellent ambassador friends to their classmates colleagues and family members who experience SSA If this is what you want to do and be then God will be faithful to complete this work in you regardless of the strengths and weaknesses insights and oversights of this book Philippians 1:6 Thank you for taking this journey with me
Brad Hambrick True Stories of the Second World War: Usborne True Stories Paul Dowswell,2012-09-01 Twelve thrilling true stories of the Second World War Includes real life tales of epic naval battles monumental battles and duels between solitary snipers for control of Stalingrad amongst other tales of bravery and heroism Stories are illustrated with maps and line drawings and there are notes on sources and ideas for further reading Gripping and engaging for readers who prefer real life to fiction **Mathematics and War** Bernhelm Booss,Jens Høyrup,2003-09-25 Mathematics has for centuries been stimulated financed and credited by military purposes Some mathematical thoughts and mathematical technology have also been vital in war During World War II mathematical work by the Anti Hitler coalition was part of an aspiration to serve humanity and not help destroy it At present it is not an easy task to view the bellicose potentials of mathematics in a proper perspective The book presents historical evidence and recent changes in the interaction between mathematics and the military It discusses the new mathematically enhanced development of military technology which seems to have changed the very character of modern warfare **Unsung Stories of Black Women's Activism in the UK** Adele Jones,Diana Watt,2024-09-27 This book is a long overdue contribution to the history of Black feminist activism in the UK It provides unique insights into both historical and contemporary issues that impact Black women their families and their communities including immigration education policing domestic violence and poverty It fills a void in sociological and feminist literature by centring the voices lived experiences and perspectives of women of the African and Caribbean Diaspora in the UK Through the use of research archival materials narrative interviews photographs poems and reflective conversations the authors explore the social issues which inspired these women s action for change In drawing on personal and professional

testimonies grounded in over two decades of community activism and scholarly analysis the authors weave together the story of the Abasindi Cooperative a woman s organisation famed for its progressive and far reaching social justice programmes In so doing the authors reveal narratives of political struggle that have their resonance in present day society This book is an acknowledgment and celebration of the sociopolitical activism and achievements of Black women in the UK and represents the hope solidarity and triumph possible when women organise collectively to tackle social and racial injustice

Infrastructures of Reality: Metaverse Stories, Spaces, Bodies Chris Hesselbein, Paolo Bory, 2025-08-09 This open access book focuses on two dimensions of the development of the metaverse that are crucial to reality namely spatiality and embodiment Metaversal technologies are thought to fundamentally affect both our spaces and bodies which are two central aspects of the constitution of social reality Both spatiality and embodiment are core elements of world making that are being pulled into the ambit of metaversal projects On the one hand metaversal technologies are profoundly spatial in the sense that they render space in virtual form or overlay digital layers onto pre existing physical spaces On the other hand metaversal technologies are directly geared towards the body in that they not only seek to extend or expand our embodied senses and emplace our bodies in virtual spaces but they also seek to capture their behaviours and actions on a far more granular level This can create new opportunities in terms of work social interaction and leisure but can also open our bodies up to new tech driven interventions and control Whether in the form of VR or AR such technologies not only reproduce space but also rely on making spaces more legible and open to automated interventions Taken together the metaversification of spaces and bodies gives rise to crucial questions about the goals and implications of metaversal developments by large technology companies and about the relationship between the developments of the metaverse and AI systems Drawing on our combined background and expertise in Science and Technology Studies and the History of Media and Communication we critically analyse the development of metaversal technologies and platforms by discussing a broad set of developments and examples from a wide range of technology and gaming companies Written in clear concise and accessible language and combining and applying novel theoretical frameworks and concepts to a currently emergent phenomenon this book will find a large audience not only within academic and professional circles but also in popular culture **Hollywood or History?** Sarah J. Kaka, 2022-01-01

The rationale for the present text Hollywood or History An Inquiry Based Strategy for Using Film to Teach About Inequality and Inequity Throughout History stems from two main things First and foremost is the fact that the reviews of the first two volumes in the Hollywood or History series have been overwhelmingly positive especially as it pertains to the application of the strategy for practitioners Classroom utility and teacher practice have continued to be the primary objectives in developing the Hollywood or History strategy The second thing is that this most recent volume in the series takes it in a new direction rather than focusing on eras in history it focuses on the themes of inequity and inequality throughout history and how teachers can utilize the Hollywood or History strategy to tackle some of the more complicated content throughout

history that many teachers tend to shy away from There is a firm belief that students connection to film along with teachers ability to use film in an effective manner will help alleviate some of the challenges of teaching challenging topics such as inequity and inequality in terms of gender race socioeconomic status and so much more The book provides 30 secondary lesson plans grades 6 12 that address nine different topics centered around inequity and inequality throughout history many of which connect students to the world we are living in today The intended audience for the book are teachers who teach social studies at the 6th 12th grade level both in the United States and other countries An additional audience will be college and university social studies history methods professors in the United States and worldwide
