Alcohol And The Developing World A Public Health Perspective:

The Bottom Line Or Public Health William H. Wiist, 2010-03-03 In this book authors from around the world reveal the range of tactics used across the corporate world that ultimately favor the bottom line over the greater good

Biomedicalization of Alcohol Studies Lorraine Midanik, 2019-01-22 Biomedicalization is seen as the natural outgrowth of continued scientific progress a movement towards improving the quality and quantity of life through scientific inquiries using biomedical perspectives and methods This approach carries with it the assumption that with proper risk assessment detection and treatment our lives can be lengthened improved and indeed more fulfilling Yet critics question biomedicalization's ability to deliver There is concern about how biomedicalization can change our traditional concepts of health as we discover more conditions for which we are at risk and health maintenance is seen as the responsibility of the individual The purpose of the book is to describe assess and critique biomedicalization and its influence as a larger social trend on the health field and specifically in the area of alcohol research policy and programs Chapter 1 gives a broad overview of biomedicalization Chapter 2 lays the groundwork for a historical understanding of how medicalization and biomedicalization have developed and are expressed in diverse fields such as aging psychiatry mental health and women's health Chapter 3 focuses in depth on alcoholism and assesses the development and assumptions underlying the two movements that have greatly influenced the substance abuse field the medicalization of deviance and the growth of the disease model of alcoholism Chapter 4 discusses the origins and development of the National Institute on Alcohol Abuse and Alcoholism NIAAA from its inception in 1970 Chapter 5 illustrates the growing biomedicalization that has occurred in the alcohol field prior to NIAAA's movement to the National Institute of Health NIH Chapter 6 assesses how Sweden has handled alcohol problems and currently funds alcohol research Chapter 7 concludes with a rationale for an expanded discourse between social scientists and biomedical researchers working on social problems particularly alcohol issues This volume will stimulate discussion of the processes by which social problems and specifically alcohol issues are framed managed and studied It will hold particular interest for researchers and students in the areas of alcohol studies social science and social welfare Lorraine Midanik is a professor in the School of Social Welfare University of California Berkeley

Neuroscience of Psychoactive Substance Use and Dependence World Health Organization, 2004 Provides an authoritative summary of current knowledge of the biological basis of substance use behaviours including their relationship with environmental factors

A public health perspective on alcohol establishments: licensing, density and locations. Policy brief. Brief 8, November 2022 World Health Organization, 2022-11-11 This publication by the World Health Organization provides a comprehensive overview of alcohol control policies focusing on licensing density and location from a public health perspective It explores the evidence and policy options available to reduce alcohol consumption and its associated harms The document is part of a series aimed at public health professionals policymakers and researchers offering guidance on reducing alcohol availability

and affordability It highlights the role of cultural social and religious norms in influencing alcohol consumption and emphasizes the need for health promotion interventions The series serves as a resource for implementing high impact strategies to address alcohol related issues globally

Mental and Neurological Public Health Vikram Patel,Alistair Woodward,Valery Feigin,Stella R. Quah,Kristian Heggenhougen,2010-06-07 Colin Mathers who leads the Global Burden of Disease group in WHO has confirmed that in the 2004 GBD 13 1% of global Daily Adjusted Life Years are attributable to mental or neurological disorders While the proportions vary very widely from about 10% in low income countries to over 25% in high income countries it is clear that there is a need for understanding how to address this issue This volume aims to provide a comprehensive overview of the public health principles of mental and neurological disorders This vast range of health conditions affects people across the life course from developmental disabilities in childhood to schizophrenia and substance abuse in adults and dementia in old age Despite this diversity they all share many features they are mostly mediated through brain dysfunction or abnormalities are often chronic in course typically benefit from multi component interventions and are amongst the most neglected conditions in global health The volume will bring together chapters from the Psychiatry Neurology Substance Abuse and Child Development sections of the Encyclopedia of Public Health The volume will be the first comprehensive text on a public health approach to this diverse group of health conditions and has no obvious competitor Highlights the common features of many mental and neurological disorders Provides insights into potential cross over methods of identification and treatment Includes chapters on the most frequently diagnosed mental and neurological challenges faced by public health systems

Alcohol Control Policies in Public Health Perspective ,1975 [The Link between Masculinity, Alcohol and HIV/Aids in Malawi](#) Norwegian Church Aid,2016-04-30 It is common knowledge that HIV is widespread in Malawi as it is in many other countries of Southern Africa It is also a well known fact that women suffer most and frequently are blamed the most Many attempts are being made to address the pandemic and reduce the suffering and often women are the focus This book differs in that it looks at the other side men It contends that men have to play a major role in the fight not only by changing behaviour but also by understanding concepts of masculinity and that women may also profit from that

Neurologic Consequences of Malnutrition Marco T. Medina,2007-08-07 Nearly 800 million people in the world do not have enough to eat In many developing countries inadequate amounts of food and inadequate diversity of food continue to be priority health problems Malnutrition in all its forms increases the risk of disease and early death Neurologic Consequences of Malnutrition edited by Dr Marco T Medina seeks to underline the magnitude of neurologic diseases related to malnutrition and the importance of early detection and opportune treatment Designed particularly for neurologists practicing in low resource environments this text is written by a multinational group of expert practicing neurologists who treat patients suffering from the neurologic consequence of malnutrition Neurologic Consequences of Malnutrition begins

with an overview of the epidemiology and incidence of malnutrition and neurologic disorders There is a discussion of the clinical and functional assessment of undernourished patients focusing on patients with Protein Energy Malnutrition as well as an extensive and complete classification of the different micronutrient deficiencies related to neurologic symptoms Other topics covered include the relationship between alcoholism and malnutrition a major public health challenge in developing nations and the neurophysiologic findings in undernourished patients *A public health perspective on zero- and low-alcohol beverages. Brief 10, 2023* World Health Organization,2023-04-11 There is an expanding market of no and low alcohol beverages NoLos However their effects on global ethanol consumption and overall public health are still in question Concerns have been raised about the impact of NoLos in reducing alcohol consumption and its associated harm and the possible drawbacks and implications such as misleading minors pregnant women abstainers or those seeking to stop drinking about their actual ethanol content There are also concerns about the impact of NoLo branded products being displayed close to the brand s main alcoholic beverages and their potential to normalize alcohol consumption There is a need to monitor their consumption and impact on aggregated alcohol consumption to understand the public health implications of NoLos The alcohol by volume content of NoLos must be defined harmonised and clearly labelled *Environmental Health Perspectives* ,2003-07

Alcohol And Emerging Markets Marcus Grant,2013-05-13 Divided into two parts Alcohol and Emerging Markets begins with a series of case studies that assess alcohol issues in four regions Asia Central and Eastern Europe Latin America and Sub Saharan Africa and four countries China India Mexico and Russia Issues such as past and current public policy developments prevention programs and treatment of alcohol related disorders are addressed as well as the health consequences of alcohol use and abuse In the second part the contributors consider the issues relevant to the entire geographical region covered by the book The book also includes a chapter that examines the role of the industry in emerging markets and suggests a set of guidelines that address alcohol misuse issues *Drinking in Context* Gerry Stimson,Marcus Grant,Marie Choquet,Preston Garrison,2013-05-13 Drinking beverage alcohol is a widespread source of individual and social pleasure in most countries around the world Yet some drinking patterns can lead to serious physical mental and social harms Drinking in Context is intended to complement existing volumes dealing with international alcohol policy by focusing on three main themes drinking patterns targeted interventions and partnership development An understanding that patterns of drinking are important predictors of outcomes has led to a growing realization that alcohol policies and prevention strategies need to focus on excessive or irresponsible drinking As a result there has been a shift towards interventions that address the targeted reduction of harm These approaches recognize socio cultural differences and avoid trying to impose a one size fits all solution In this context multi stakeholder partnerships offer an excellent opportunity to promote the complex mix of measures required by each society Shared responsibilities lead to shared solutions **Alcohol and Pleasure** Stanton Peele,Marcus Grant,2013-05-13 There is no simple threshold between the experience of drinking and the pleasure it can

bring on the one hand and the pain and suffering caused by alcohol abuse on the other But if we are to understand the role of alcohol in society then at the very least we need to acknowledge the pleasure as well as the pain Alcohol and Pleasure aims to bring together existing knowledge on the role of pleasure in drinking and determine whether the concept is useful for scientific understanding and policy consideration *Binge Drinking and Alcohol Misuse Among College Students and Young Adults* Rachel Winograd, Kenneth J. Sher, 2015-04-20 This book provides clear guidance about effective evidence based approaches to treating alcohol misuse in young adults Heavy drinking and its associated problems are an integral part of many college students and other young adults lives Though some young drinkers are able to consume alcohol without incident many face significant negative fallout from their excessive consumption This volume in the series *Advances in Psychotherapy Evidence Based Practice* describes the nature of alcohol misuse its epidemiology its causes and methods for treatment specifically as they pertain to college students and other young adults It provides practitioners and trainees with a range of evidence based treatment approaches to help clients change their alcohol use habits The information presented is both thorough and concise and will help readers with varied backgrounds and experience improve their understanding of the many nuanced factors involved in assessing and treating problematic drinking in young adults *Epidemiology of Chronic Disease: Global Perspectives* Randall E. Harris, 2019-04-11 *Epidemiology of Chronic Disease Global Perspectives* is the most current and authoritative resource on the epidemiology etiology pathogenesis risk factors and preventive factors of over 50 major chronic diseases and conditions This comprehensive text provides readers with an excellent basis for examining current hypotheses regarding chronic disease epidemiology *Equity, Social Determinants and Public Health Programmes* World Health Organization, 2010 Description of WHO's major health programmes with particular reference to patterns of inequity and the identification of social determinants Identifies promising interventions and ways of reducing obstacles to better health both within countries and between countries **Disease Control Priorities in Developing Countries** Dean T. Jamison, Joel G. Breman, Anthony R. Measham, George Alleyne, Mariam Claeson, David B. Evans, Prabhat Jha, Anne Mills, Philip Musgrove, 2006-04-02 Based on careful analysis of burden of disease and the costs of interventions this second edition of *Disease Control Priorities in Developing Countries* 2nd edition highlights achievable priorities measures progress toward providing efficient equitable care promotes cost effective interventions to targeted populations and encourages integrated efforts to optimize health Nearly 500 experts scientists epidemiologists health economists academicians and public health practitioners from around the world contributed to the data sources and methodologies and identified challenges and priorities resulting in this integrated comprehensive reference volume on the state of health in developing countries *The HIV Pandemic* Peter Piot, 2007-12-14 As we approach the 25th anniversary of the first recognition of HIV AIDS in 1981 this book reflects on the international impact of the disease It has persistently remained a global issue with more than 50 million people worldwide estimated to have been infected since that date This ambitious book

written by 165 authors from 30 countries offers a multi country comparative study that examines how the response to the common global threat of HIV is shaped by the history culture institutions and health systems of the individual countries affected Increasingly the shift of health systems has been from prevention only as the main containment strategy to a strategy that includes scaling up HIV treatment and care and prevention services including antiretroviral therapy Thus all parts of the health system must be involved policy makers healthcare professionals and users of the services have been forced to think differently about how services are financed how resources are allocated how systems are structured and organized how services are delivered to patients and how the resulting activity is monitored and evaluated in order to improve the effectiveness efficiency equity and acceptability of the response This book is unique in attempting to describe and assess a range of responses across the globe by situating them within the characteristics of each country and its health system Most chapters combine a health policy expert with an HIV specialist allowing both a top down health system approach and a bottom up HIV specific perspective There are thematic and analytical sections which provide an overview and some suggestions for solutions to the most serious outstanding issues and chapters which analyse specific country and organisational responses There is no perfect health system but the evidence provided here allows the sharing of knowledge and a opportunity to assess the impact and reactions to an epidemic that must be considered a long term issue
