De Stijl Continued Jonneke Jobse, 2005 From 1958 to 1964 the journal *Structure* was a major platform for artists reconsidering the design tenets and underlying principles of the Bauhaus Constructivism and De Stijl This book explores the artists body of ideas in meticulous detail

The Situationist City Simon Sadler, 1999-08-18 Simon Sadler searches for the Situationist City among the detritus of tracts manifestos and works of art that the Situationist International left behind From 1957 to 1972 the artistic and political movement known as the Situationist International SI worked aggressively to subvert the conservative ideology of the Western world The movement s broadside attack on establishment institutions and values left its mark upon the libertarian left the counterculture the revolutionary events of 1968 and more recent phenomena from punk to postmodernism But over time it tended to obscure Situationism s own founding principles In this book Simon Sadler investigates the artistic architectural and cultural theories that were once the foundations of Situationist thought particularly as they applied to the form of the modern city According to the Situationists the benign professionalism of architecture and design had led to a sterilization of the world that threatened to wipe out any sense of spontaneity or playfulness The Situationists hankered after the pioneer spirit of the modernist period when new ideas such as those of Marx Freud and Nietzsche still felt fresh and vital By the late fifties movements such as British and American Pop Art and French Nouveau Ralisme had become intensely interested in everyday life space and mass culture The SI aimed to convert this interest into a revolution at the level of the city itself Their principle for the reorganization of cities was simple and seductive let the citizens themselves decide what spaces and architecture they want to live in and how they wish to live in them This would instantly undermine the powers of state bureaucracy capital and imperialism thereby revolutionizing people s everyday lives Simon Sadler searches for the Situationist City among the detritus of tracts manifestos and works of art that the SI left behind The book is divided into three parts The first *The Naked City* outlines the Situationist critique of the urban environment as it then existed The second *Formulary for a New Urbanism* examines Situationist principles for the city and for city living The third *A New Babylon* describes actual designs proposed for a Situationist City

Mystery and Matter Michel Remery, 2010-12-20 Most of the scholarship regarding the Dutch monk and

architect Dom Hans van der Laan OSB 1904 1991 has been narrowly focused on his architectural theory and projects The liturgical and theological dimensions have been virtually neglected though they are vital for a proper understanding of his thought Through a thorough reading of the original sources including previously unexplored documents from various archives this book takes an interdisciplinary approach to Van der Laan s theory It brings together the different aspects of his work by studying both the liturgical theological and architectural elements On this basis the book offers a synthesis of the way in which Van der Laan was able to link earthly matter to the divine Mystery *Journal of the Society of Architectural Historians* Society of Architectural Historians,1995 Includes special issues Het vooruitperspectief Kris Peeters,2000

The Low Countries Stichting Ons Erfdeel,2000 **Works** Aldo van Eyck,1999 For the present publication the architect opened his substantial archive and provided unpublished original texts plans and photographs All main buildings and projects from 1944 to the present day are documented in depth Back dust cover Avery Index to Architectural Periodicals, 1995 Avery Library,1997-02 **Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl** Avery Library,1995 *In Praise of Common Sense* Coen van der Wal,1997 Overzicht in woord en beeld **Critical seventies** Martien de Vletter,2004

There is no period in the history of the Netherlands which excites such emotion resistance or aversion as the decade of the 1970s Following in the wake of the democratization wave of 1968 some regard the 1970s as a period when pluralism was possible and desirable at all levels For others the crowning moment of 1968 degenerated into a quagmire of public consultation and a culture of always inconclusive committee meetings The 70s were either hip and groundbreaking or dogmatic and rigid The architecture of the time which headed off in pursuit of new definitions and forms is similarly divisive Though a number of architectural trajectories were driven by a devoted social engagement and a profound belief in architecture as a means of molding society the sheer plethora of movements failed to generate a single and unanimous alternative resulting instead in polarization and pluralism The Critical Years focuses on architecture urban planning and spatial planning from 1968 to 1982 Specific projects from the period are discussed and extensively documented on the basis of six themes and an introductory essay considers the context in which building and planning changed so radically With the imminent demolition and renovation of much of the infrastructure and architecture of the 1970s this book is a critical and timely document of one of the most important periods for architecture in the Netherlands **De tussenmaat** Like Bijlsma,Jochem Groenland,2006 Om flerfamiliehuset som bygningstype Med plan og bebyggelsestyper fra arkitekturhistorien
