Get Better Results with high quality content exercise sets and step by step pedagogy. The Miller O'Neill Hyde author team continues to offer an enlightened approach grounded in the fundamentals of classroom experience in *Beginning and Intermediate Algebra 4e*. The text reflects the compassion and insight of its experienced author team with features developed to address the specific needs of developmental level students. Throughout the text the authors communicate to students the very points their instructors are likely to make during lecture and this helps to reinforce the concepts and provide instruction that leads students to mastery and success. Also included are Problem Recognition Exercises designed to help students recognize which solution strategies are most appropriate for a given exercise. These types of exercises along with the number of practice problems and group activities available permit instructors to choose from a wealth of problems allowing ample opportunity for students to practice what they learn in lecture to hone their skills. In this way the book perfectly complements any learning platform whether traditional lecture or distance learning; its instruction is so reflective of what comes from lecture that students will feel as comfortable outside of class as they do inside class with their instructor.

ALEKS Assessment and Learning in Knowledge Spaces is a web based artificially intelligent assessment and learning system. ALEKS uses adaptive questioning to quickly and accurately determine exactly what a student knows and doesn't know in a course. ALEKS then instructs the student on the topics she is most ready to learn. As a student works through a course, ALEKS periodically reassesses the student to ensure that topics learned are also retained. ALEKS courses are very complete in their topic coverage and ALEKS avoids multiple choice questions. A student who shows a high level of mastery of an ALEKS course will be successful in the actual course she is taking.

Hendricks,Oiyin Pauline Chow,2011-12-01 Today's Developmental Math students enter college needing more than just the math and this has directly impacted the instructor's role in the classroom Instructors have to teach to different learning styles within multiple teaching environments and to a student population that is mostly unfamiliar with how to be a successful college student Authors Andrea Hendricks and Pauline Chow have noticed this growing trend in their combined 30

years of teaching at their respective community colleges both in their face to face and online courses As a result they set out to create course materials that help today s students not only learn the mathematical concepts but also build life skills for future success Understanding the time constraints for instructors these authors have worked to integrate success strategies into both the print and digital materials so that there is no sacrifice of time spent on the math Furthermore Andrea and Pauline have taken the time to write purposeful examples and exercises that are student centered relevant to today s students and guide students to practice critical thinking skills Beginning and Intermediate Algebra and its supplemental materials coupled with ALEKS or Connect Math Hosted by ALEKS allow for both full time and part time instructors to teach more than just the math in any teaching environment without an overwhelming amount of preparation time or even classroom time
