Aircraft Wrecks In The Mountains And Deserts Of California 19091996:

Historic Aircraft Wrecks of San Diego County G. Pat Macha, 2016-08-29 Clear weather and a natural harbor made San Diego an early aviation hub but success in flight came with devastating tragedies The remains of more than four hundred aircrafts lie scattered across the county's deserts and mountains Experts estimate that dozens more are on the ocean floor off the coast In 1922 army pilot Charles F Webber's DeHavilland biplane went missing over Cuyamaca Rancho State Park In 1978 Pacific Southwest Airlines Flight 178 collided midair over San Diego and crashed in the residential North Park neighborhood claiming the lives of 144 people in what was the worst airline disaster of the era Author and aircraft accident research specialist G Pat Macha recounts these and other stories of astonishing survival heroism and heartbreaking fatality

Historic Aircraft Wrecks of Los Angeles County G. Pat Macha, 2014-11-18 A century of aviation research and military flights over Los Angeles County has left the San Gabriel Mountains Mojave Desert and the near shore Pacific Ocean strewn with more than 1 500 aircraft crash sites Barnstormers and test pilots too often made unexpected final landings Accidents occurred on a nearly daily basis during World War II training maneuvers Private planes a sign of 1950s prosperity also met tragic ends These epic incidents include the 1971 tragedy of Flight 706 in which an airliner collided with a marine fighter jet above Mount Bliss killing fifty people Renowned aircraft crash search specialist G Pat Macha recounts dozens of sorrowful triumphant and surprising true stories of those who lived through these ordeals while offering touching tributes to those who did not

Historic Aircraft Wrecks of San Bernardino County G. Pat Macha, 2013-09-24 Weather darkness and twists of fate have contributed to more than three hundred airplane crashes in San Bernardino County California Many of these accidents occurred in the vast Mojave Desert others on the cloud shrouded snow capped mountains of the largest county in the lower forty eight states Searches often were labored yet fruitless even for the privileged Frank Sinatra's mother perished here in a downed plane The quest for an aircraft containing 5 000 in cash has become the stuff of legend Tales of survival in uninhabited rugged landscapes have been especially harrowing Join renowned aircraft crash search specialist G Pat Macha for dozens of sorrowful triumphant touching and surprising true stories of those who lived through the ordeals of plane crashes and others who didn't

Fatal Army Air Forces Aviation Accidents in the United States, 1941-1945 Anthony J. Mireles, 2006-05-09 During World War II the air over the continental United States was a virtual third front The little known statistics are alarming the Army Air Forces lost more than 4 500 aircraft in combat against Japanese army and naval air forces in the war During the same time the AAF lost more than 7 100 aircraft in the United States to accidents in training and transportation Such accidents claimed the lives of more than 15 530 pilots crewmembers and ground personnel and the stories of their deaths are largely forgotten This work chronicles the 6 350 known fatal AAF aircraft accidents that occurred in the continental United States from January 1941 through December 1945 Each crash summary based on official records provides details such as crash location and cause the people involved and the type and number of aircraft An aircraft serial

bright sunshine from many miles away Weather is not usually too much of a factor although we have witnessed some ferocious thunderstorms and flash flooding which can be very dangerous We also need to limit our hiking to early mornings or spring and fall months to avoid the intense heat of the summer Normally crash sites are located miles out in the middle of nowhere in the southwestern deserts and accessed only by four wheel drive vehicles Because of this we bring at least two vehicles to have a backup in case if one breaks down The vehicles are equipped with winches shovels and spare tires because getting stuck in sand is all too common Before making trips out on the desert our wreck hunting groups usually conduct meetings early in the mornings to make sure that everyone is accounted for and that we have plenty of survival supplies This means that our backpacks are loaded with food and water that we have cell phones and portable radios and that we have several cases of extra drinking water The vehicles are topped with gas checked for tools and equipment and tires are deflated to give better traction in sand It is not uncommon to lose all cell phone coverage so we test and make sure that each individual hiker has a functioning hand held radio We also bring along medical supplies onboard the vehicles and in the backpacks of each hiker Without cell phone coverage we are unable to call for help and it is usually at least an hour drive out of the desert We exercise caution and good judgment in knowing that help is going to be a long time coming

McCurry,Cye Laramie,Dan Thomas Nelson,2013-03-01 Merriam Press Aviation History 1 First Edition March 2013 Aviation archaeology has grown significantly within the past ten years and is represented by groups throughout the entire United States and several countries abroad mainly in Europe As aircraft wrecks become much older their historical significance becomes much greater It is hoped by many modern day aviation archaeologists that with more public awareness the historical significance

becomes better understood and valued and that many of these old crash sites will be saved and protected Most surviving family members of those who lost their lives in these accidents consider these sites as hallowed ground and the mention of these to surviving crewmembers themselves still brings tears to their eyes Recently it has become fairly common for surviving family members to contact aviation archaeology groups in an effort to locate crash sites to help bring some type of closure to these families As a group we have been successful in making these connections and in expressing our gratitude in helping with this effort many aviation archaeologists have spent a lot of their own money time and research establishing and building memorials at these sites It is an expression of their own respect for these families
