America Ascendant Dennis M. Spragg,2019-12-01 *America Ascendant* vividly portrays the global crisis that brought the media and the government into an alliance that changed the course of American and world history President Franklin D Roosevelt organized an extraordinary partnership between the U S government and America s media outlets to communicate to the reluctant and isolationist American public the nature of the threat that World War II posed to the nation and the world The coalition s aim was to promote the concept of American exceptionalism and use it to galvanize the public for the government s cause *America Ascendant* details the efforts of many prominent individuals and officials to harness the collective energy of the nation and guide the United States throughout World War II then describes its aftermath and the Cold War period Dennis M Spragg demonstrates how the news and entertainment of American broadcasters such as David Sarnoff William Paley and Elmer Davis helped rally the American people to fashion a new liberal democratic order to stop the global spread of Communism This media government alliance however was not achieved without difficulty Spragg highlights the competing visions and personalities that clashed as media and government leaders tried to develop the paradigm that ultimately shifted American cultural and political thought Throughout this searching history he sheds light on the underappreciated coordination between the media and the government to establish a liberal democratic world order and demonstrates why American exceptionalism still matters

International Bibliography of Business History Francis Goodall,Terry Gourvish,Steven Tolliday,2013-12-16 The field of business history

has changed and grown dramatically over the last few years There is less interest in the traditional company centred approach and more concern about the wider business context With the growth of multi national corporations in the 1980s international and inter firm comparisons have gained in importance In addition there has been a move towards improving links with mainstream economic financial and social history through techniques and outlook The International Bibliography of Business History brings all of the strands together and provides the user with a comprehensive guide to the literature in the field The Bibliography is a unique volume which covers the depth and breadth of research in business history This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians

[Holding Patterns: Air Transport and Foreign Policy in the Netherlands](#) Marc Dierikx, Jean Guillaume Petit, 2024-11-11 Read the interviews with Marc Dierikx [here](#) and [here](#) Although air transport is indispensable to modern society we know little about the diplomatic efforts that establish airline services Nonetheless aviation features prominently in the spectrum of international relations in conflicts between states for example the suspension of landing rights is one of the first acts to symbolize serious discord In tracing the unique cooperation between government and industry this historical study underscores aviation as a prominent but understudied topic in Dutch foreign relations

Over Empires and Oceans Robert Bluffield, 2014-11-19 This is a story of pioneers intrepid aviators adventurers tycoons and innovators It is also a story of dedication and determination for despite fixed wing aircraft proving their value over the battlefields of the Western Front during the First World War convincing governments and public alike that they had a role in peacetime proved far more challenging The Americans as inventors of heavier than air powered flight had briefly courted with a passenger airline across Tampa Bay in 1914 yet it took a further nine years for mail to be flown coast to coast In 1919 a British company made the first international scheduled flight between London and Paris but the continuation of regular services was thwarted by a less than enthusiastic government that allowed its generously subsidised French competition for a short time at least to fly cross Channel passenger schedules unimpeded The British eventually realized that fast links with their Empire were vital followed the example of the French and Dutch who had forged air links with their cousins in North Africa and the Far East Meanwhile in South America the Germans forbidden under the Versailles Treaty from any major aircraft building were establishing cunning supremacy by forming airlines throughout South America and in China While America awaited a transcontinental passenger service Juan Trippe's Pan American Airways was crossing swords with Ralph O'Neill of New York Rio Buenos Aires Line NYRBA for air supremacy between the US Brazil Argentina and elsewhere in Latin America that led to the formation of arguably the world's greatest airline In Russia Igor Sikorsky had built a vast passenger carrying aircraft the Il ya Muromets and politicians debated whether giant airships or fixed wing aircraft should rule the skies an issue that was put firmly to bed when the mighty German airship Hindenburg exploded while mooring at Lakehurst in 1937 Robert Bluffield's highly researched and detailed account tells the dramatic stories of explorers such as Kingsford

Smith Lindbergh and Cobham and flamboyant entrepreneurs some well known others forgotten who risked fortunes and reputations to follow their dreams of reaching and ruling the skies over empires continents and oceans Against bewildering adversity corruption underhanded deals and dwindling resources these tenacious individuals braved the elements using primitive entirely unsuitable equipment to establish earth shrinking aerial services that criss crossed the great oceans and the globe s most inhospitable territories These are the stories of those pioneers of A ropostale CNAC Air Orient Imperial Airways KLM Deutsche Luft Hansa Pan Am SCADTA The Condor Syndicat Qantas and others that had a far reaching impact on the way the modern world would travel

Sovereign Skies Sean Seyer,2021-03-23 This work is a history of US aviation regulation in the interwar period of the early twentieth century The author presents the Air Commerce Act as the institutionalization of a specific American regulatory ideology that arose in response to the technological nature of the airplane the US Constitution and the Paris Convention of 1919

[More Precious Than Gold](#) Dave Hollett,2008 The sixteenth century Conquistadors led by Pizarro came to Peru for three reasons God gold and glory but after the initial glory of their conquest they tended to concentrate on gold rather than God Direct colonial rule by Spain lasted for almost three hundred years only ending in 1826 when the last Spanish flag was hauled down from the battlements of Real Felipe Fortress However just a few short years after Peru had declared its independence from Spain the attention of some people in Lima began to focus on a potential source of untold wealth that was to prove more precious than gold This was guano which in its greatest concentration was found on the diminutive Chincha Islands that lie just off the Peruvian coast some seventy miles south of Callao This book covers the story of this international guano trade It outlines the fate of the unfortunates recruited to cut and load the guano It also gives full details of the hardships endured by mariners employed in this trade The story of those who grew rich on the proceeds of this trade is also outlined Importantly it explains just how the Peruvian government mismanaged the trade to the extent that Peru became burdened with debts rather than prospering on the proceeds of their vast new guano based income
