Tour of Duty Constantine Nomikos Vaporis, 2009-11-12 Alternate attendance sankin kotai was one of the central institutions of Edo period 1603 1868 Japan and one of the most unusual examples of a system of enforced elite mobility in world history It required the daimyo to divide their time between their domains and the city of Edo where they waited upon the Tokugawa shogun Based on a prodigious amount of research in both published and archival primary sources Tour of Duty renders alternate attendance as a lived experience for not only the daimyo but also the samurai retainers who accompanied them Beyond exploring the nature of travel to and from the capital as well as the period of enforced bachelorhood there Constantine Vaporis elucidates for the first time the significance of alternate attendance as an engine of cultural intellectual material and technological exchange Vaporis argues against the view that cultural change simply emanated from the center Edo and reveals more complex patterns of cultural circulation and production taking place between the domains and Edo and among distant parts of Japan What is generally known as Edo culture in fact incorporated elements from the localities In some cases Edo acted as a nexus for exchange at other times culture traveled from one area to another without passing through the capital As a result even those who did not directly participate in alternate attendance experienced a world much larger than their own Vaporis begins by detailing the nature of the trip to and from the capital for one particular large scale domain Tosa and its men and goes on to analyze the political and cultural meanings of the processions of the daimyo and their extensive entourages up and down the highways These parade like movements were replete with symbolic import for the nature of early modern governance Later chapters are concerned with the physical and social environment experienced by the daimyo s retainers in Edo they also address the question of who went to Edo and why the network of physical spaces in which the domainal samurai lived the issue of staffing political power and the daily lives and consumption habits of retainers Finally Vaporis examines retainers as carriers of culture both in a literal and a figurative sense In doing so he reveals the significance of travel for retainers and their identity as consumers and producers of culture thus proposing a multivalent model of cultural change

World Report on Ageing

and Health World Health Organization, 2015-10-22 The WHO World report on ageing and health is not for the book shelf it is a living breathing testament to all older people who have fought for their voice to be heard at all levels of government across disciplines and sectors Mr Bjarne Hastrup President International Federation on Ageing and CEO DaneAge This report outlines a framework for action to foster Healthy Ageing built around the new concept of functional ability This will require a transformation of health systems away from disease based curative models and towards the provision of older person centred and integrated care It will require the development sometimes from nothing of comprehensive systems of long term care It will require a coordinated response from many other sectors and multiple levels of government And it will need to draw on better ways of measuring and monitoring the health and functioning of older populations These actions are likely to be a sound investment in society's future A future that gives older people the freedom to live lives that previous generations might never have imagined The World report on ageing and health responds to these challenges by recommending equally profound changes in the way health policies for ageing populations are formulated and services are provided As the foundation for its recommendations the report looks at what the latest evidence has to say about the ageing process noting that many common perceptions and assumptions about older people are based on outdated stereotypes The report's recommendations are anchored in the evidence comprehensive and forward looking yet eminently practical Throughout examples of experiences from different countries are used to illustrate how specific problems can be addressed through innovation solutions Topics explored range from strategies to deliver comprehensive and person centred services to older populations to policies that enable older people to live in comfort and safety to ways to correct the problems and injustices inherent in current systems for long term care Music of the Final Fantasy Series , Aki Kuroda A. Writing Otherwise Jeanette Gaudet, 2023-07-17 Essentially a comparative and contrastive analysis *Writing Otherwise* examines the prose of five French women authors Liliane Atlan Marguerite Duras Liliane Giraudon Marie Redonnet and Monique Wittig Through close readings of texts published after 1985 this book explores the broad concerns and preoccupations infusing the ontological enterprise that is critique While maintaining a sensitivity to the diversity of styles and themes as well as the unique qualities of the poetic voice evident in the five texts under consideration this study seeks to highlight in very general terms what is common to them The intertextual ground that informs the works the construction of subjectivity and the ambivalence and tension inherent to the practice writing constitute significant and important areas of convergence These features form the ground of each chapter while specific areas of divergence complete the discussion of individual aesthetics Inspired by feminist literary theory *Writing Otherwise* is also concerned with how these five women writers negotiate their relationship to writing
