Alchemy in Contemporary Art Urszula

Szulakowska, 2017-07-05 Alchemy in Contemporary Art analyzes the manner in which twentieth century artists beginning with French Surrealists of the 1920s have appropriated concepts and imagery from the western alchemical tradition This study examines artistic production from c 1920 to the present with an emphasis on the 1970s to 2000 discussing familiar names such as Andre Breton Salvador Dali Yves Klein Joseph Beuys and Anselm Kiefer as well as many little known artists of the later twentieth century It provides a critical overview of the alchemical tradition in twentieth century art and of the use of occultist imagery as a code for political discourse and polemical engagement The study is the first to examine the influence of alchemy and the Surrealist tradition on Australian as well as on Eastern European and Mexican art In addition the text considers the manner in which women artists such as Leonora Carrington Remedios Varo and Rebecca Horn have critically revised the traditional sexist imagery of alchemy and occultism for their own feminist purposes

Jan van Eyck and Portugal's 'Illustrious Generation' Barbara von Barghahn, 2013-12-31 This book investigates Jan Van Eyck's patronage by the Crown of Portugal and his role as diplomat painter for the Duchy of Burgundy following his first voyage to Lisbon in 1428 1429 when he painted two portraits of Infanta Isabella who became the third wife of Philip the Good in 1430 New portrait identifications are provided for the Ghent Altarpiece 1432 and its iconographical prototype the lost Fountain of Life These altarpieces are analysed with regard to King Joao I's conquest of Ceuta achieved by his sons who were hailed as an illustrious generation Strong family ties between the dynastic houses of Avis and Lancaster explain Lusitania's sustained fascination with Arthurian lore and the Grail quest Several chapters of this book are overlaid with a chivalric veneer A second secret mission to Portugal in 1437 by Jan van Eyck is postulated and this diplomatic visit is related to Prince Henry the Navigator's expedition to Tangier and King Duarte's attempts to forge an alliance with Alfonso V of Aragon Late Eyckian commissions are reviewed in the light of this ill fated crusade and additional new portraits are identified The most significant artist of Renaissance Flanders appears to have been patronized as much by the House of Avis as by the Duchy of Burgundy Barbara von Barghahn is Professor of Art History at George Washington University and a specialist in the art history of Portugal Spain and their colonial dominions as well as Flanders In 1993 she was conferred O Grao Comendador in the Portuguese Order of Prince Henry the Navigator She has spent nearly a decade completing research about Jan van Eyck's diplomatic visits to the Iberian Peninsula

The Bardo of Waking Life Richard Grossinger,2011-05-31 An avant garde set of improvisational essays Richard Grossinger s *The Bardo of Waking Life* is a meditation on the Tibetan Buddhist bardo realm which in popular culture is viewed as the bridge between lives the state people enter after death and before rebirth This book examines waking life and its history and language as if it were a bardo state rather than ultimate reality and thus seeks a context for life and dreams even as it addresses more mundane issues including genetic theory the war in Iraq and George W Bush s presidency North Korea advertising global warming Prison Industrial Culture childhood trauma even country western music Written with playfulness and precision Bardo takes a new probing approach to all the important questions of creation destruction and existence In these intellectual field notes Grossinger proves thematically fearless as he crosses quantum mechanics with totemic hexes and draws transcendental insight from the ephemeral space time we call daily life If as Tibetan cosmology holds true all conditional realms are bardos then the state we all share is nothing less than the bardo of waking life

The Subtle Energy Body Maureen Lockhart, 2010-09-23 A global study of the psychospiritual body and its central role in the esoteric and spiritual traditions of the world Explains the nature purpose and functions of the subtle body Explores the role of the subtle body in such traditions as Alchemy Ayurveda Tantra Qi Gong and Yoga Shows how the various layers of the subtle body provide a map for various levels of consciousness Ancient traditions of both the East and West have long maintained that the human being is a complex of material and nonmaterial systems or energy bodies The subtle body is an energetic psychospiritual entity of several layers of increasing subtlety and metaphysical significance through which the aspirant seeks knowledge of the self and the nature of God In many traditions the component parts of the subtle body serve as a map of the different levels of consciousness The practices and disciplines that evolved from an awareness and

understanding of the subtle body and how the material and nonmaterial work together form a coherent system of psychospiritual transformation that is central to numerous and extremely diverse spiritual practices including those of the Gnostics Sufis Native Americans Vedic seers Chinese and Greeks The subtle body plays an essential part in more recent traditions such as Anthroposophy and Gurdjieff's Fourth Way and the cutting edge science of Ervin Laszlo's research into the Akashic field But the benefits of understanding the role of the subtle energy body are not confined solely to the spiritual plane The energetic bodies provide a coherent system of life affirming principles and practices for the diagnosis and treatment of the whole person that is not only part of many traditional healing systems such as Acupuncture and Ayurveda but also is forming the basis for a synthesis of traditional and contemporary healing practices that could lay the foundation for the medicine of the future

pattern of nature Explores important scientific discoveries that reveal the self organizing intelligence at the heart of nature
 Examines the idea of a living cosmos from its roots in the earliest cultures to its eclipse during the Scientific Revolution to its
 return today Reveals ways to reengage our creative partnership with nature and collaborate with nature s intelligence For
 millennia the world was seen as a creative interconnected web of life constantly growing developing and restoring itself But
 with the arrival of the Scientific Revolution in the 16th and 17th centuries the world was viewed as a lifeless clock like
 mechanism bound by the laws of classical physics Intelligence was a trait ascribed solely to human beings and thus humanity
 was viewed as superior to and separate from nature Today new scientific discoveries are reviving the ancient philosophy of a
 living interconnected cosmos and humanity is learning from and collaborating with nature s intelligence in new life
 enhancing ways from ecological design to biomimicry Drawing upon the most important scientific discoveries of recent times
 David Fideler explores the self organizing intelligence at the heart of nature and humanity s place in the cosmic pattern He
 examines the ancient vision of the living cosmos from its roots in the world soul of the Greeks and the alchemical tradition to
 its eclipse during the Scientific Revolution to its return today He explains how the mechanistic worldview led to humanity s
 profound sense of alienation for if the universe only functioned as a machine there was no longer any room for genuine
 creativity or spontaneity He shows how this isn t the case and how even at the molecular level natural systems engage in self
 organization self preservation and creative problem solving mirroring the ancient idea of a creative intelligence that exists
 deep within the heart of nature Revealing new connections between science religion and culture Fideler explores how to
 reengage our creative partnership with nature and new ways to collaborate with nature s intelligence *Embryos, Galaxies,
 and Sentient Beings* Richard Grossinger, 2003 Why is the universe conscious What kindles mind inside matter Why do
 fundamentalist sciences and religions never ask these questions This sequel to Embryogenesis deals with the theoretical
 issues brought up by Embryogenesis including the relationship between thermodynamics entropy and the emergence of life a
 speculative set of embryogenic principles for all creatures on all planets in the cosmos an explanation and critique of
 Intelligent Design and a proposal for a more dynamic psychospiritual theory of creature development a series of alternatives
 to genetic determinism a discussion of the relationship between consciousness and matter an interjection of 9 11 which
 occurred during the writing of this book and many other topics Chapters include What is Life Evolution Thermodynamics and
