Time history data of airspeed altitude and acceleration obtained with the NACA VGH recorder from a twin engine airplane operated by a regional feeder airline in the Rocky Mountains are evaluated to determine the magnitude and frequency of occurrence of gusts and gust accelerations and the operating airspeeds and altitudes The results obtained are compared with the results previously obtained from a representative short haul and long haul operation Structural Members and Frames Theodore V. Galambos, 2016-04-10 Geared toward graduate students and professionals in structural engineering this text presents a detailed treatment of the elastic and inelastic behavior of metal beams columns beam columns and rigid frames All four topics receive separate chapters in which the background for their general behavior is discussed in terms of specific structural tests The chapters also examine theoretical elastic behavior and the termination of usefulness by elastic buckling behavior in the inelastic region and the uses of various conceptual models in predicting inelastic instability The final section of each chapter covers procedures and provides interpretations of structural specifications Two additional chapters offer an introduction to the text and derive the differential equations governing the elastic deformations of prismatic thin walled open members Numerous examples throughout the treatment illustrate theory and applications *The Application of Aluminum in Poultry Buildings* Herman William Glover, 1949 **Effect of Brake Forming in Various Tempers on the Strength of Alclad 75S-T Aluminum-alloy Sheet** Walter Woods, George J.
