Cross-Cultural Approaches to the Study of Alcohol Michael W. Everett, Jack O. Waddell, Dwight B. Heath, 2011-06-03 No detailed description available for Cross Cultural Approaches to the Study of Alcohol **The Alcoholic Republic** W.J. Rorabaugh, 1981-09-17 Rorabaugh has written a well thought out and intriguing social history of America's great alcoholic binge that occurred between 1790 and 1830 what he terms a key formative period in our history A pioneering work that illuminates a part of our heritage that can no longer be neglected in future studies of America's social fabric A bold and frequently illuminating attempt to investigate the relationship of a single social custom to the central features of our historical experience A book which always asks interesting questions and provides many provocative answers **Alcohol in Italian culture** Giorgio Lolli, Emidio Serianni, Grace M. Golder, Pierpaolo Luzzatto Fegiz, 1958 **The American Experience with Alcohol** G.M. Ames, L.A. Bennett, 2013-11-11 This volume is an important contribution to our understanding of culture and alcohol in the United States Its appearance is also a milestone in the history of alcohol studies in American anthropology Over the last six years the volume's editors initially along with Miriam Rodin have served as the coorganizers of the Alcohol and Drug Study Group of the American Anthropological Association AAA In this capacity they have organized sessions at the AAA and other meetings greatly strengthened the research network with a regular and informative newsletter and painstakingly promoted the publication of anthropological work on alcohol and drugs Appearing just as the responsibility for the Study Group is passed on to others this book is a fitting emblem of the care and energy with which its editors have built an institutional nexus for alcohol and drug anthropology in North America The contents of this volume offer a uniquely wide sampling of the diversity of cultural patterns that make up the American experience with

alcohol The collective portrait the editors have assembled extends in several dimensions through time and history across such social differentiations as gender age grade and social class and through such major social institutions as the church and the family Clearly the dominant dimension of variation in the material that follows however is ethnicity The book offers us a sampler of unprecedented richness of the different experiences with alcohol of American ethnoreligious groups **The Natural History of Alcoholism Revisited** George E. Vaillant, 2009-07-01 In this updated version of his landmark study on alcoholism George Vaillant returns to the same subjects but with the perspective gained from fifteen years of further follow up Alcohol & Alcoholism National Institute on Alcohol Abuse and Alcoholism (U.S.), 1972 **Alcohol Labeling and Fetal Alcohol Syndrome, 1978** United States. Congress. Senate. Committee on Human Resources. Subcommittee on Alcoholism and Drug Abuse, 1978 **Swimming with Crocodiles** Marjana Martinic, Fiona Measham, 2008-06-19 There is evidence that a distinct pattern of alcohol consumption is emerging across the world and is a cause for concern because of its relationship with a range of health and social problems Its visibility particularly its high involvement of young people makes this not only an issue for public safety and order in many countries but also a highly contentious and politicized subject This book examines the rapid and heavy drinking behavior by young people described in a number of countries positioning it within its appropriate social historical and cultural contexts The book argues in favor of a new term extreme drinking to fully encapsulate the many facets of this behavior taking into account the underlying motivations for the heavy excessive and unrestrained drinking patterns of many young people It also acknowledges the drinking process itself and accommodates greater focus on outcomes that are likely to follow In many ways extreme drinking is not so far removed from other extreme behaviors such as extreme sports all offer a challenge their pursuit is motivated by an expectation of pleasure and they are by design not without risk to those who engage in them others around them and society as a whole Edited by Marjana Martinic and Fiona Measham *Swimming with Crocodiles* is the ninth volume in the ICAP Book Series on Alcohol in Society The authors discuss the factors that motivate extreme drinking address the developmental cultural and historical contexts that have surrounded it and offer a new approach to addressing this behavior through prevention and policy The centerpiece of the book is a series of focus groups conducted with young people in Brazil China Italy Nigeria Russia South Africa and the United Kingdom which examine their views on extreme drinking motivations behind it and the cultural similarities and differences that exist conferring at once risk and protective factors **Special Report to the U.S. Congress on Alcohol & Health from the Secretary of Health, Education, and Welfare** United States. Helzer,Glorisa J. Canino,1992 This volume represents a landmark in the important and rapidly expanding literature of cross cultural epidemiology that has been made possible by the worldwide popularity of the DSM III and the multi national use of a single survey instrument the Diagnostic Interview Schedule DIS Reviewing population survey findings across ten regions of North America Europe and Asia this study is the first direct cross national comparison of personal interview data on alcoholism including prevalence rates and risk factors The book carefully describes the background of the various surveys and the methods of analysis and comparison Chapters on each region describe the prevalence of drinking problems the symptomatic expression of alcoholism in that culture aspects of the cultural background that are relevant to drinking behavior and the association between alcoholism and other psychiatric disorders Of particular importance in this volume is the inclusion of a chapter on alcoholism in the Socialist Republic of China from which very little scientific information has been readily available The inclusion of eastern and western cultural perspectives offers insight into both universal and culturally distinct aspects of alcoholism The volume is essential reading for psychiatrists epidemiologists sociologists and alcohol theorists researchers and clinicians *Special Report to the U.S. Congress on Alcohol and Health from the Secretary of Health, Education, and Welfare* ,1971 **Drinking, Homicide, and Rebellion in Colonial Mexican Villages** William B. Taylor,1979 This study analyzes the impact of Spanish rule on Indian peasant identity in the late colonial period by investigating three areas of social behavior Based on the criminal trial records and related documents from the regions of central Mexico and Oaxaca it attempts to discover how peasants conceived of their role under Spanish rule how they behaved under various kinds of street and how they felt about their Spanish overlords In examining the character of village uprisings typical relationships between killers and the people they killed and the drinking patterns of the late colonial period the author finds no warrant for the familiar picture of sullen depredation and despair Landed peasants of colonial Mexico drank moderately on the whole and mostly on ritual occasions they killed for personal and not political reasons Only when new Spanish encroachments threatened their lands and livelihoods did their grievances flare up in rebellion and these occasions were numerous but brief The author bolsters his conclusions with illuminating comparisons

with other peasant societies
