Round River Aldo Leopold, 1972-03-30 To those who know the charm of Aldo Leopold's writing in *A Sand County Almanac* this collection from his journals and essays will be a new delight The journal entries included here were written in camp during his many field trips hunting fishing and exploring and they indicate the source of ideas on land ethics found in his longer essays They reflect as well two long canoe trips in Canada and a sojourn in Mexico where Leopold hunted deer with bow and arrow The essays presented here are culled from the more contemplative notes which were still in manuscript form at the time of Leopold's death in 1948 fighting a brush fire on a neighbor's farm *Round River* has been edited by Leopold's son Luna a geologist well known in the field of conservation It is also charmingly illustrated with line drawings by Charles W Schwartz All admirers of Leopold's work indeed all lovers of nature will find this book richly rewarding

Aldo Leopold Della A. Yannuzzi, 2002-01-01 A biography of the American naturalist who was a leader in wildlife conservation

Aldo Leopold: A Sand County Almanac & Other Writings on Conservation and Ecology Aldo Leopold, 2013-03-21 Since his death in 1948 Aldo Leopold has been increasingly recognized as one of the indispensable figures of American environmentalism A pioneering forester sportsman wildlife manager and ecologist he was also a gifted writer whose farsighted land ethic is proving increasingly relevant in our

own time Now Leopold's essential contributions to our literature some hard to find or previously unpublished are gathered in a single volume for the first time Here is his classic *A Sand County Almanac* hailed with Thoreau's *Walden* and Carson's *Silent Spring* as one of the main literary influences on the modern environmental movement Published in 1949 it is still astonishing today a vivid firsthand philosophical tour de force Along with *Sand County* are more than fifty articles essays and lectures exploring the new complexities of ecological science and what we would now call environmental ethics Leopold's sharp eyed often humorous journals are illustrated here for the first time with his original photographs drawings and maps Also unique to this collection is a selection of over 100 letters most of them never before published tracing his personal and professional evolution and his efforts to foster in others the love and sense of responsibility he felt for the land [Aldo Leopold's Odyssey, Tenth Anniversary Edition](#) Julianne Lutz Warren, 2016-05-24 In 2006 Julianne Lutz Warren ne Newton asked readers to rediscover one of history's most renowned conservationists Aldo Leopold's *Odyssey* was hailed by The New York Times as a biography of ideas making us feel the loss of what might have followed *A Sand County Almanac* by showing us in authoritative detail what led up to it Warren's astute narrative quickly became an essential part of the Leopold canon introducing new readers to the father of wildlife ecology and offering a fresh perspective to even the most seasoned scholars A decade later as our very concept of wilderness is changing Warren frames Leopold's work in the context of the Anthropocene With a new preface and foreword by Bill McKibben the book underscores the ever growing importance of Leopold's ideas in an increasingly human dominated landscape Drawing on unpublished archives Warren traces Leopold's quest to define and preserve land health Leopold's journey took him from Iowa to Yale to the Southwest to Wisconsin with fascinating stops along the way to probe the causes of early land settlement failures contribute to the emerging science of ecology and craft a new vision for land use Leopold's life was dedicated to one fundamental dilemma how can people live prosperously on the land and keep it healthy too For anyone compelled by this question the Tenth Anniversary Edition of Aldo Leopold's *Odyssey* offers insight and inspiration **Aldo Leopold's Southwest** Aldo Leopold, 1995-03 Gathers the pre *Sand County Almanac* writings of Aldo Leopold showing that he was not born an ecologist but evolved over time through experimentation and thought [Leopold's Shack and Ricketts's Lab](#) Michael Lannoo, 2010-05-01 Aldo Leopold and Ed Ricketts are giants in the history of environmental awareness They were born ten years and only about 200 miles apart and died within weeks of each other in 1948 Yet they never met and they didn't read each other's work This illuminating book reveals the full extent of their profound and parallel influence both on science and our perception of natural world today In a lively comparison Michael J Lannoo shows how deeply these two ecological luminaries influenced the emergence both of environmentalism and conservation biology In particular he looks closely at how they each derived their ideas about the possible future of humanity based on their understanding of natural communities Leopold and Ricketts both believed that humans cannot place themselves above earth's ecosystems and continue to survive In light of climate change invasive species

and collapsing ecosystems their most important shared idea emerges as a powerful key to the future

The Rights of Nature Roderick Frazier Nash, 1989-01-17 Charting the history of contemporary philosophical and religious beliefs regarding nature Roderick Nash focuses primarily on changing attitudes toward nature in the United States His work is the first comprehensive history of the concept that nature has rights and that American liberalism has in effect been extended to the nonhuman world A splendid book Roderick Nash has written another classic This exploration of a new dimension in environmental ethics is both illuminating and overdue Stewart Udall His account makes history come alive Sierra So smoothly written that one almost does not notice the breadth of scholarship that went into this original and important work of environmental history Philip Shabecoff New York Times Book Review Clarifying and challenging this is an essential text for deep ecologists and ecophilosophers Stephanie Mills Utne Reader

In Defense of the Land Ethic J. Baird Callicott, University Distinguished Research Professor J Baird Callicott, 1989-01-01 In Defense of the Land Ethic Essays in Environmental Philosophy brings into a single volume J Baird Callicott's decade long effort to articulate defend and extend the seminal environmental philosophy of Aldo Leopold A leading voice in this new field Callicott sounds the depths of the proverbial iceberg the tip of which is The Land Ethic The Land Ethic Callicott argues is traceable to the moral psychology of David Hume and Charles Darwin's classical account of the

origin and evolution of Hume's moral sentiments Leopold adds an ecological vision of organic nature to these foundations How can an evolutionary and ecological environmental ethic bridge the gap between is and ought How may wholes species ecosystems and the biosphere itself be the direct objects of moral concern How may the intrinsic value of nonhuman natural entities and nature as a whole be justified In addition to confronting and resolving these distinctly philosophical queries Callicott engages in lively debate with proponents of animal liberation and rights finally to achieve an integrated theory of animal welfare and environmental ethics He critically discusses the land ethic that is alleged to have prevailed among traditional American Indian peoples and points toward a new and equally revolutionary environmental aesthetic

The Landscape of Reform Ben A. Minteer, 2006 In *The Landscape of Reform* Ben Minteer offers a fresh and provocative reading of the intellectual foundations of American environmentalism focusing on the work and legacy of four important conservation and planning thinkers in the first half of the twentieth century Liberty Hyde Bailey a forgotten figure in the Progressive conservation movement urban and regional planning theorist Lewis Mumford Benton MacKaye the forester and conservationist who proposed the Appalachian Trail in the 1920s and Aldo Leopold author of the environmentalist classic *A Sand County Almanac* Minteer argues that these writers blazed a significant third way in environmental ethics and practice a more pragmatic approach that offers a counterpoint to the anthropocentrism versus ecocentrism use versus preservation narrative that has long dominated discussions of the development of American environmental thought Minteer shows that the environmentalism of Bailey Mumford MacKaye and Leopold was also part of a larger moral and political program one that included efforts to revitalize democratic citizenship conserve regional culture and community identity and reclaim a broader understanding of the public interest that went beyond economics and materialism Their environmental thought was an attempt to critique and at the same time reform American society and political culture Minteer explores the work of these four environmental reformers and considers two present day manifestations of an environmental third way Natural Systems Agriculture an alternative to chemical and energy intensive industrial agriculture and New Urbanism an attempt to combat the negative effects of suburban sprawl By rediscovering the pragmatic roots of American environmentalism writes Minteer we can help

bring about a new civic minded environmentalism today Eavesdropping on Texas History Mary L. Scheer, 2017-02-15

Most writers and readers of history have at one time or another wished that they could have been at some particular defining event in history Whether it was a moment of a great decision a major turning point that changed everything or simply an intriguing occurrence many scholars and others have on occasion wished that they could have been there Texas history provides infinite Lone Star episodes to consider rooted in the widespread assumption that Texas is a colorful unique and exceptional place with larger than life heroes and narratives Mary L Scheer has assembled fifteen contributors to explore special moments in Texas history The contributors assembled for this anthology represent many of the all stars among Texas historians two State Historians of Texas two past presidents of TSHA four current or past presidents of ETHA two past presidents of WTHA nine fellows of historical associations two Fulbright Scholars and seven award winning authors Each is an expert in his or her field and provided in some fashion an answer to the question At what moment in Texas history would you have liked to have been a fly on the wall and why The choice of an event and the answers were both personal and individual ranging from familiar topics to less well known subjects One wanted to be at the Alamo Another chose to explore when Sam Houston refused to take a loyalty oath to the Confederacy One chapter follows the first twenty four hours of Lyndon Baines Johnson s presidency after Kennedy s assassination Others write about the Dust Bowl coming to Texas or when Texas Southern University was created Their respective essays are not written as isolated occurrences or moments but as causal developments presented within the larger social and political context of the period The Wilderness Debate Rages on Michael P. Nelson, J. Baird Callicott, 2008 Ten years ago The Great New Wilderness Debate began a cross disciplinary conversation about the varied constructions of wilderness and the controversies that surround them The Wilderness Debate Rages On will reinvigorate that conversation and usher in a second decade of debate Like its predecessor the book gathers both critiques and defenses of the idea of wilderness from a wide variety of perspectives and voices The Wilderness Debate Rages On includes the best explorations of the concept of wilderness from the past decade underappreciated essays from the early twentieth century that offer an alternative vision of the concept and importance of wilderness and writings meant to clarify or help us rethink the concept of wilderness Narrative writers such as Wendell Berry Scott Russell Sanders Marilynne Robinson Kathleen Dean Moore and Lynn Maria Laitala are also given a voice in order to show how the wilderness debate is expanding outside the academy The writers represented in the anthology include ecologists environmental philosophers conservation biologists cultural geographers and environmental activists The book begins with little known papers by early twentieth century ecologists advocating the preservation of natural areas for scientific study not as did Thoreau Muir and the early Leopold for purposes of outdoor recreation The editors argue that had these writers influenced the eventual development of federal wilderness policy our national wilderness system would better serve contemporary conservation priorities for representative ecosystems and biodiversity
